

PROJECT BOOK / PROPOSAL TO PROPOSED SOLUTION

WHAT SHOULD BLUORNG MAKE NEXT?

BLUORNG blends global aesthetics with local sensibilities.

BLUPRINT helps its team decide what to make next for Instagram and Meta ads, and turns every idea into a brief they can shoot.

IN COLLABORATION WITH
BLUORNG, NEW DELHI

Bluorng

BLUORNG, pronounced Blue~Orange, blends global aesthetics with local sensibilities, and sits among the top streetwear brands in India. Every drop starts with a feed. This project is about what goes on it.

BLUPRINT

Project proposal

WORKING TITLE

**A content intelligence and ideation platform that helps
BLUORNG decide what to make for Instagram (organic) and
Meta ads (paid).**

NAME

BLU + PRINT

BLU from BLUORNG, PRINT from blueprint:
a plan for every piece of content before a
camera is switched on.

PARTNER

BLUORNG, NEW DELHI

Premium streetwear label, founded 2020.
GQ India Streetwear Label of the Year
2023.

MY ROLE

UI/UX DESIGNER

Working inside the content team, so the
content workflow can be observed first-
hand.

BACKGROUND AND PROBLEM

Today, results sit in Insights, Ads Manager and Shopify, and decisions happen on WhatsApp.

INITIAL BRIEF

Drop-led streetwear teams have no structured, evidence-backed way to decide what to make for Instagram and Meta ads. Effort and spend go on guesswork, wins aren't repeated, and organic and paid run as separate worlds.

AIM

Turn performance data, brand identity and trend signals into on-brand content suggestions and ready-to-shoot briefs, for organic and paid.

OBJECTIVES

OBJECTIVE 1

UNDERSTAND THE WORKFLOW

How the content and performance teams ideate, plan, shoot, publish and review.

OBJECTIVE 2

FIND THE GAPS

The pain points and decision gaps inside that workflow.

OBJECTIVE 3

KNOW THE AUDIENCE

What BLUORNG's audience actually engages with, and why.

OBJECTIVE 4

BUILD A SHARED LANGUAGE

A taxonomy of formats, series, hooks and angles the platform can learn from.

OBJECTIVE 5

CHOOSE A DIRECTION

Generate and evaluate three concepts, then select one.

OBJECTIVE 6

DESIGN AND TEST

IA, flows, wireframes, UI and a prototype, tested with real users.

SCOPE AND OUTCOME

IN SCOPE

Instagram organic ideas: Reels, carousels, stories and series like ASMR or story experiences

Meta ads ideas: angles, hooks, variations and fatigue alerts

Insights on what worked, briefs and a drop calendar

Desktop web app plus a mobile companion for set and approvals

OUT OF SCOPE

- Building the machine-learning model or backend
- Auto-posting or buying ads inside the tool
- YouTube and X, kept as future scope
- Redesigning the e-commerce site

HI-FI PROTOTYPE

BLUPRINT web app and mobile companion, researched and usability-tested.

DESIGN SYSTEM AND IA

Documented structure, navigation, labels and UI components.

USABLE RECOMMENDATIONS

Validated changes BLUORNG can apply even without building the product.

METHOD AND VALUE

Double Diamond: research, synthesise, ideate, deliver.

DOUBLE DIAMOND

DIVERGE, CONVERGE, TWICE

FOR BLUORNG

LESS GUESSWORK SPEND

Fewer wasted shoot days and ad budget, more repeatable wins.

FOR THE TEAM

FASTER, CLEARER WORK

Quicker decisions, clear briefs, less back-and-forth on WhatsApp.

FOR THE AUDIENCE

BETTER CONTENT

More of what they want to watch: less noise, more culture.

PROJECT TIMELINE

20 weeks, three reviews.

PART 02 OF 08

SECONDARY RESEARCH

The brand, the market, the platforms, the existing tools,
and twelve sources that shape the design.

- DOMAIN STUDY
- TOOL REVIEW
- LITERATURE REVIEW

THE BRAND

Domain study

BLUORNG MILESTONES

FROM SECONDARY SOURCES, VERIFY INSIDE

POSITIONING Premium Indian streetwear. Design-led, strong visual storytelling.	BUSINESS MODEL Drop-led: limited releases, sell-outs, collabs.	GROWTH ENGINE Instagram first for discovery and hype. Meta ads for conversion.	KNOWN CHALLENGE Low brand recall, and Instagram traffic not converting to sales at the needed rate (agency case study).
--	--	--	---

ADD FROM INSIDE

Follower count, posting frequency, team size, monthly content volume, typical shoot cost, ad budget band (indexed if confidential).

THE MARKET

D2C SIGNAL

Fashion is one of India's largest D2C categories, and its growth runs on Instagram campaigns, creator collabs and social-led drops instead of seasonal calendars.

PEER BRANDS TO BENCHMARK CONTENT AGAINST

- JAYWALKING
- ALMOST GODS
- HUEMN
- CAPSUL
- URBAN MONKEY
- BONKERS CORNER
- THE SOULED STORE
- SNITCH
- FEAR OF GOD ESSENTIALS
- CORTEIZ
- REPRESENT
- AIMÉ LEON DORE
- STÜSSY

FILLED: INDIAN PEERS. OUTLINED: GLOBAL REFERENCES.

WHICH FORMATS WIN?

Fashion data favours Reels. Large accounts favour carousels.

INSTAGRAM ORGANIC

Reach is algorithmic, driven by watch time, shares and saves. The hook in the first 3 to 4 seconds matters, and series build habit and recall.

META ADS

Advantage+ automates targeting, so the creative itself now does the targeting. The team's main lever is creative diversity.

CREATIVE FATIGUE

Results drop as people see the same ad again. The team needs fresh variations, and to know when to refresh.

INFERENCE

No single format wins: fashion data favours Reels, large accounts favour carousels. BLUORNG needs a tool that learns from its own results, not generic rules.

6 QUESTIONS X 7 METHODS

EVERY QUESTION IS COVERED BY AT LEAST ONE METHOD

HYPOTHESES

What we expect to find. A rejected hypothesis is a finding too.

H1

Most content decisions come from intuition and trends, not structured data.

SURVEY A Q5

H2

Teams check data, but fewer than half use it to plan the next content.

A Q6, Q7

H3

Organic winners are rarely turned into ads.

A Q11

H4

Performance marketers don't get enough ad variations.

A Q14

H5

Vague briefs cause re-shoots or re-edits at least sometimes.

A Q17

H6

Drop weeks create last-minute content pressure.

A Q18

H7

The audience prefers BTS, ASMR detail and styling over plain product posts.

AUDIT

B Q6–8

H8

The audience prefers creator-style ads to ads that look like ads.

B Q10

H9

Teams trust AI only if it explains itself and can be edited.

A Q20

H10

Brand consistency is a top concern for premium brands.

INTERVIEWS

METHODS AND SAMPLE

CONTENT AUDIT

REDEFINED BRIEF, UPDATE WITH EVIDENCE

Design BLUPRINT, a decision and ideation tool for small, drop-led fashion content teams. It (1) learns which types of content work from the brand's own organic and paid data, (2) turns that into on-brand suggestions for Instagram series and Meta ad angles, and (3) turns chosen ideas into shootable briefs planned around the drop calendar, so one shoot feeds both organic and paid.

PROBLEM STATEMENT

PROBLEM STATEMENT

Content teams at drop-led fashion brands like BLUORNG lack a connected, brand-aware system that turns their own organic and paid results into clear, explainable ideas and shootable briefs. The result: guesswork content, repetitive ads, wasted production and spend, and little learning between drops.

HOW MIGHT WE...

HMW 1

Help the team see why content worked, by type, not just by number?

HMW 2

Turn insights into fresh, on-brand ideas for Instagram series?

HMW 3

Help performance marketers plan diverse ad angles before the shoot?

HMW 4

Make one shoot feed both organic and paid?

HMW 5

Make briefs so clear that makers never need a re-shoot?

HMW 6

Keep AI suggestions on-brand and trustworthy?

DESIGN GOALS

Each goal has a target we test in usability studies.

G1 MAKE PERFORMANCE MEANINGFUL

< 1 min

G4 BRIEF IN ONE CLICK

< 5 min

To create a brief. Makers rate clarity 4/5 or higher.

G5 PROTECT THE BRAND

70%

Of suggestions approved without major edits.

G6 PLAN AROUND DROPS

Eight home-screen layouts in eight minutes.

1
Feed of idea cards

This layout features a vertical stack of three horizontal rectangular cards. The top card is light gray with a thin black vertical bar on its left edge. The two cards below it are solid light gray.

2
Calendar first

This layout shows a 3x4 grid of squares. The top row consists of four light gray squares. The middle row has a light gray square, a solid black square, a light gray square, and a light gray square. The bottom row has a light gray square, a light gray square, a solid black square, and a light gray square.

3
Dashboard first

This layout displays a dashboard with three light gray rectangular boxes at the top. Below them is a bar chart with five vertical bars of varying heights, all in solid black.

4
Chat co-pilot

This layout features a chat interface with four horizontal rounded rectangular bubbles. The top two are light gray, the middle one is solid black, and the bottom one is a white bubble with a black border.

5
Swipe on ideas

This layout shows a large light gray square with a smaller, slightly offset light gray square on top of it. Below the squares are two circular icons: one with a black 'X' inside and one that is solid black.

6
Kanban: idea to live

This layout depicts a Kanban board with four vertical columns. The first three columns are light gray and each contains two smaller light gray rectangles at the top. The fourth column is light gray and contains a single solid black rectangle at the top.

7
Drop Room timeline

This layout shows a timeline with a vertical red line on the right side. Four horizontal bars of varying lengths are positioned at different heights, crossing the red line. The bars alternate in color: light gray, solid black, light gray, and solid black.

8
Mobile Set Mode

This layout features a vertical rounded rectangle containing three items, each consisting of a small square followed by a horizontal line. The top item has a solid black square, while the two items below it have white squares with black borders.

THREE CONCEPTS

Three directions, each sketched as a home screen and scored against the research needs and feasibility.

CONCEPT A

3.35 / 5

PULSE

An insight-first dashboard that pulls Instagram, Meta and Shopify data and ranks recommendations.

- + Strong data base, great for the marketer and founders
- + APIs already exist
- Doesn't help write ideas or briefs
- Risks becoming a dashboard nobody opens

CONCEPT B

4.05 / 5

STUDIO

An ideation co-pilot. Pick a goal and get on-brand ideas for series and ad angles, each with a hook, a reason and a one-click brief.

- + Solves idea block, writes briefs
- + Loved by the strategist and the maker
- Generic without real results behind it
- Trust depends on clear reasons

CORE OF THE FINAL CONCEPT

CONCEPT C

3.60 / 5

DROP ROOM

A calendar-first command centre. Each drop gets a room with a timeline, the organic plan, ad variations, shoot plan and approvals.

- + Matches how BLUORNG actually works
- + Joins organic and paid
- Weak on why and on new ideas
- Overlaps with Notion

WEIGHTED SCORE OUT OF 5 DRAFT SCORES, RE-SCORE WITH MENTORS

RESULT

Studio leads on solving "what to make". Pulse and Drop Room each win on data and workflow, so the final concept combines all three.

FINAL CONCEPT

Studio experience, powered by Pulse, organised by drop.

USER SCENARIOS

RIA / MONDAY /
LAPTOP

PLANS A DROP

Drop Room suggests ASMR Ep. 4 (2.6x saves) and a T-7 colourway poll. Brand-fit 92. She creates the brief.

ARJUN / PRE-SHOOT /
LAPTOP

PLANS 12 ADS

The matrix flags Craft and Creator as missing angles. He adds 4 angles x 3 hooks to the shoot plan.

KABIR / SHOOT DAY /
PHONE

SHOOTS FROM SET MODE

One merged shot list with hooks, ratios and safe zones. A nudge: shot 7 needs a 2s close-up.

FOUNDER /
ANYWHERE / PHONE

APPROVES IN MINUTES

Swipes 9 organic and 12 ad ideas. Approves 8, comments on 1, rejects 1, and BLUPRINT learns.

TEAM / T+7 / DIGEST

LEARNS

Creator ads beat lookbook ads on cost per sale (indexed). Next: make ASMR bi-weekly, brief 2 more creators.

VALUE

WHO	BEFORE		AFTER, TARGET
Social media manager	Guessing, idea block, manual reports	→	Ideas backed by data every week, auto digest
Performance marketer	3 similar ads per drop, late fatigue	→	10+ planned variations, early alerts
Maker	WhatsApp voice-note briefs	→	A clear shot list on the phone
Founder	Scattered approvals, brand risk	→	One queue, brand-fit score, the reason
Business	Spend on guesswork	→	Repeatable wins, better cost per sale, stronger recall
