

LATEST DROP / PROJECT BOOK

WHAT SHOULD BLUORNG MAKE NEXT?

BLUORNG blends global aesthetics with local sensibilities.
BLUPRINT helps its team decide what to make next for
Instagram and Meta ads, and turns every idea into a brief they
can shoot.

[READ THE PROJECT](#)

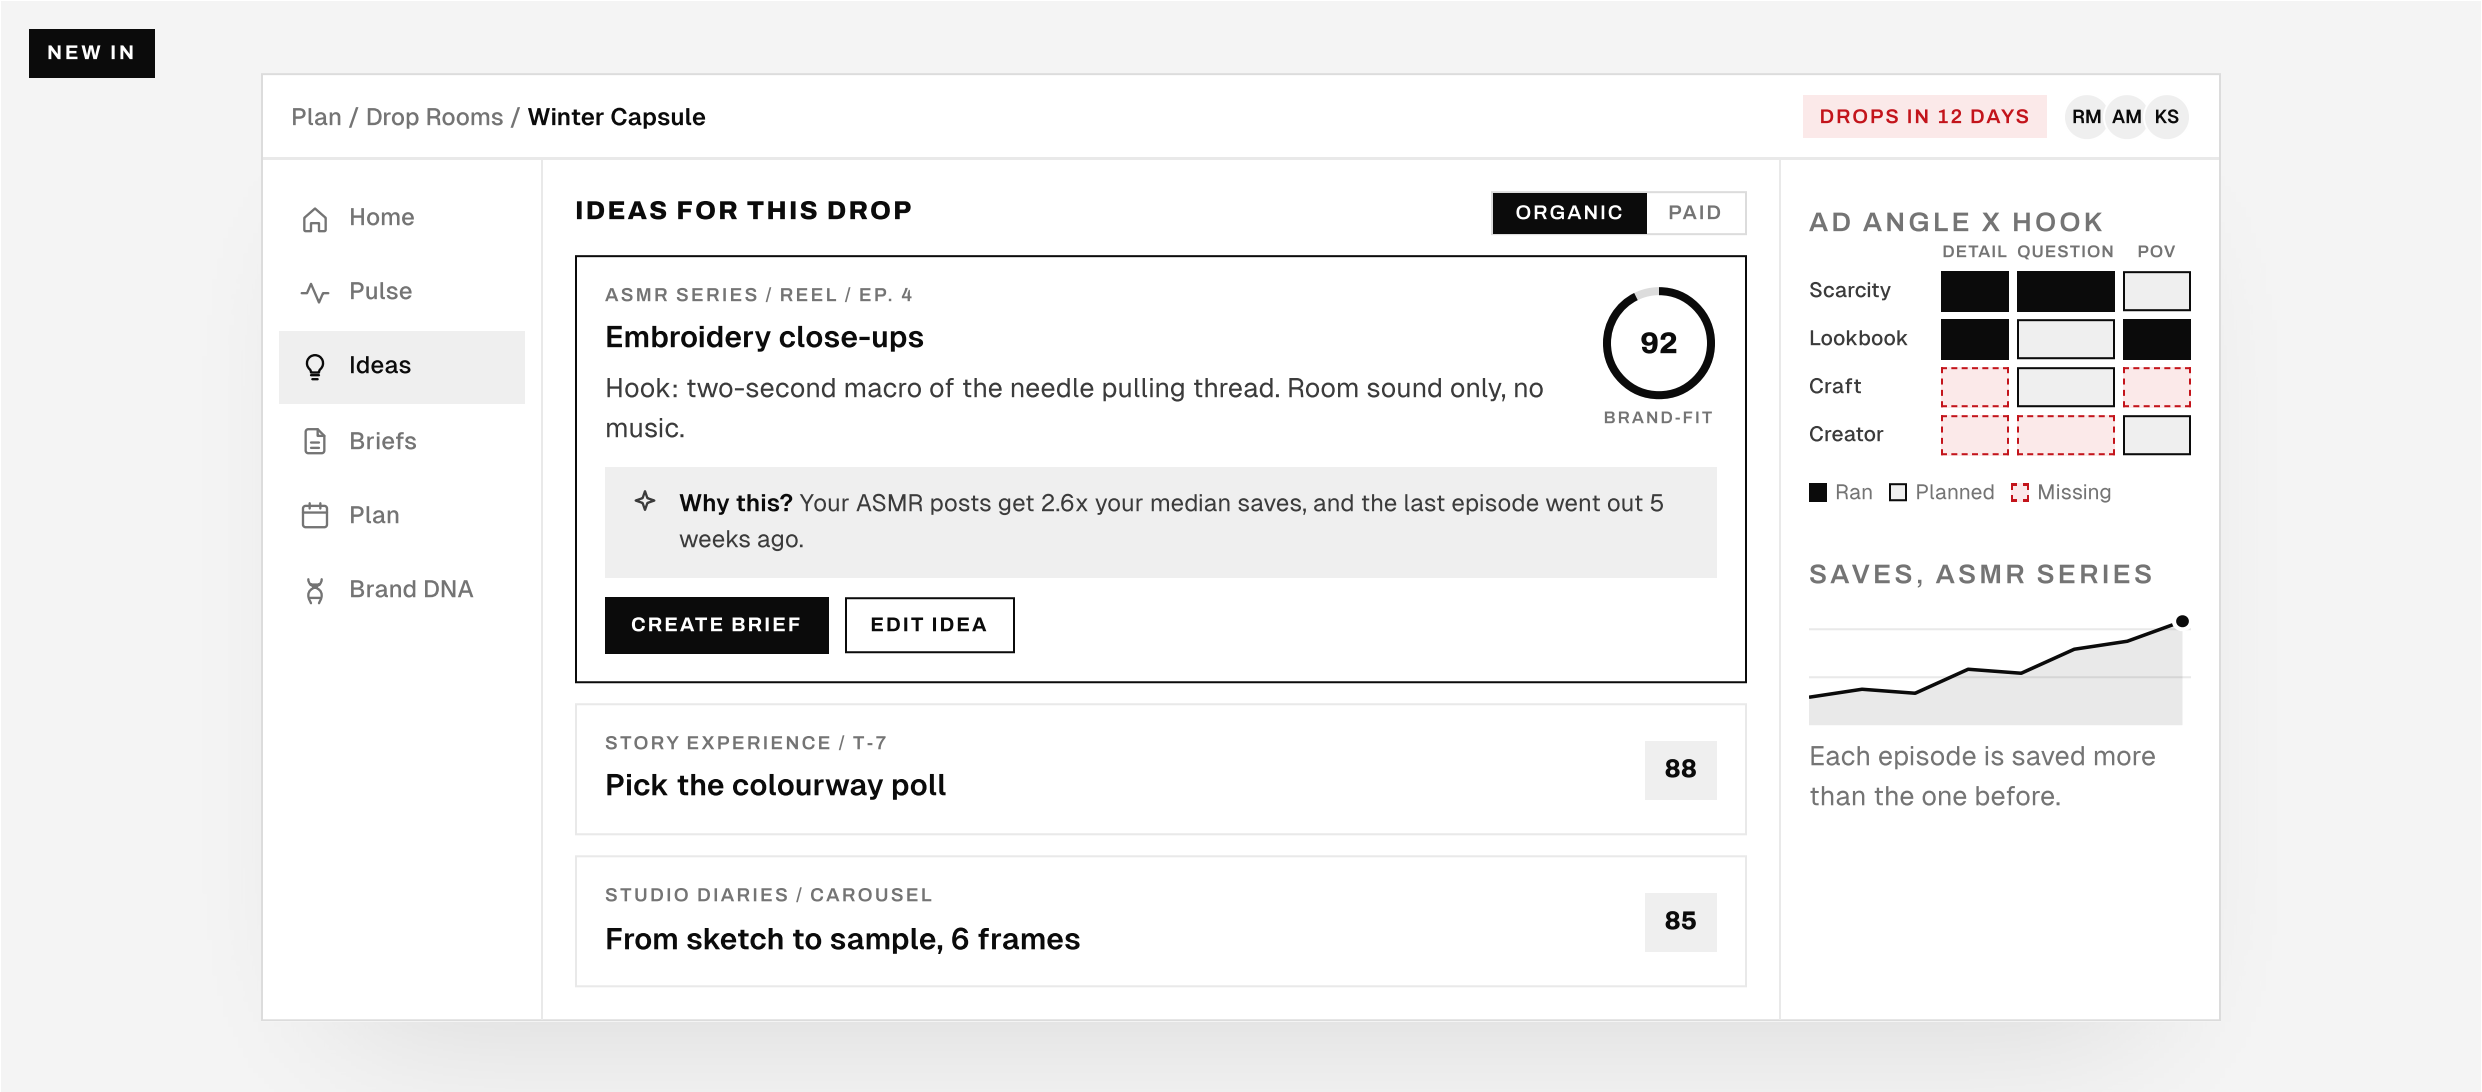

IN COLLABORATION WITH
BLUORNG, NEW DELHI

UI/UX GRADUATION PROJECT / 8 CHAPTERS

LATEST DROP: THE PRODUCT

4 MODULES / CONCEPT SCREENS

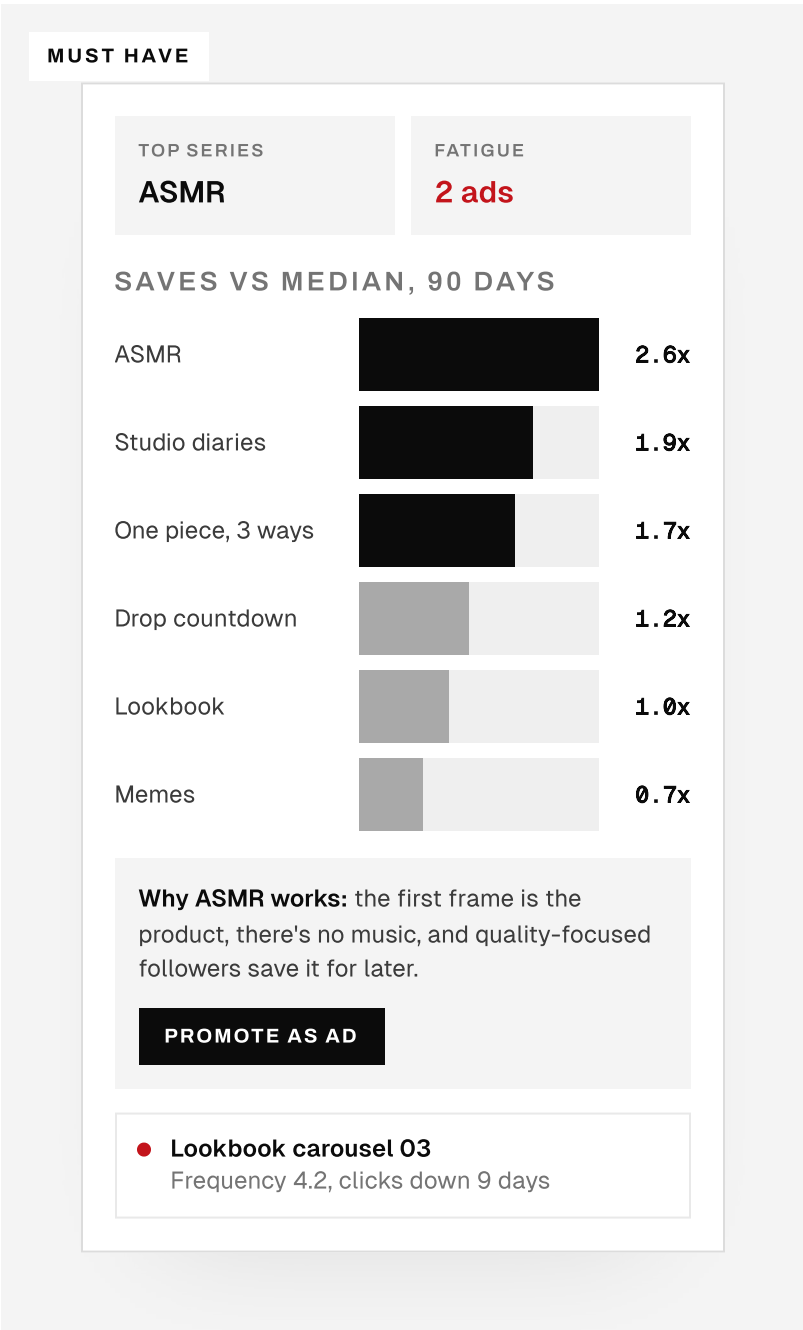

Pulse explains what worked. Ideas suggests what to make next. Set Mode carries it onto the shoot. Approvals keeps the founders in the loop without WhatsApp.

IDEAS

MODULE 02 / CORE

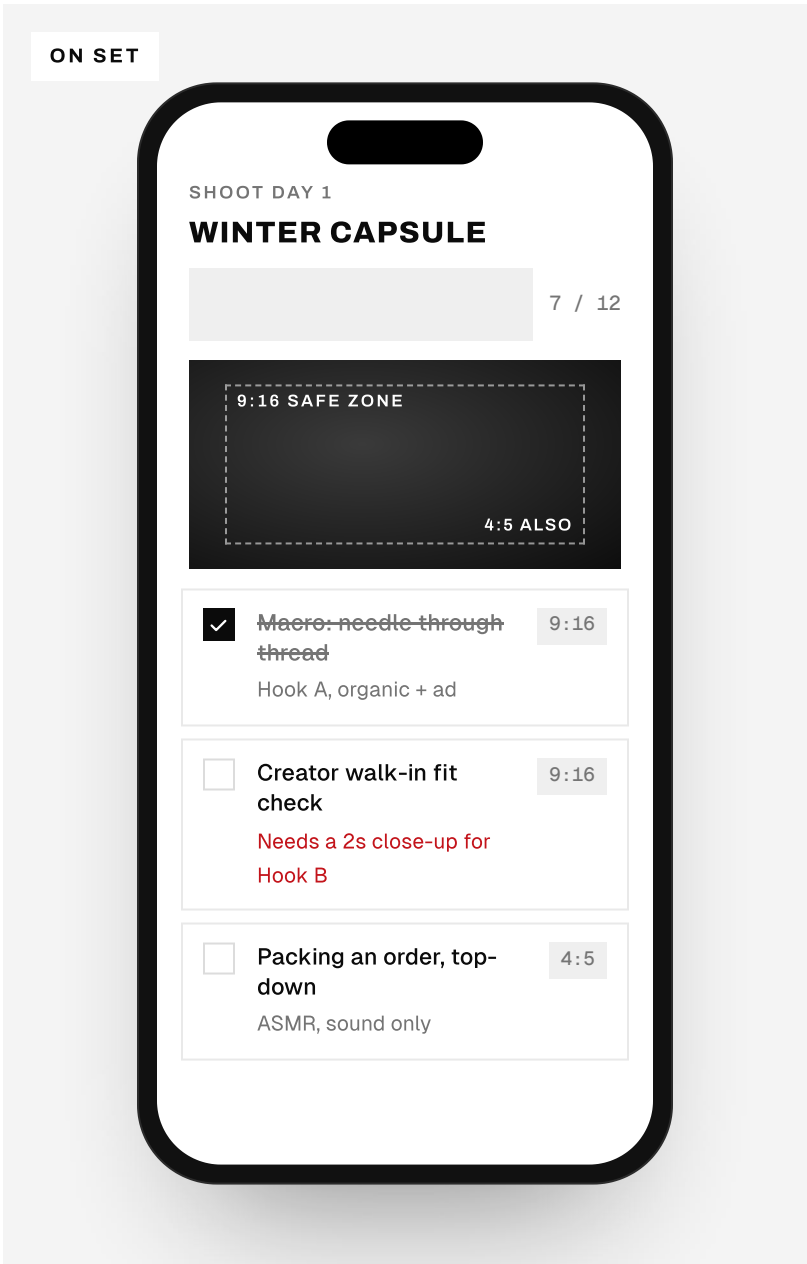

On-brand suggestions for Instagram series and Meta ad angles, each with a hook, a reason and a brand-fit score.

PULSE

MODULE 01

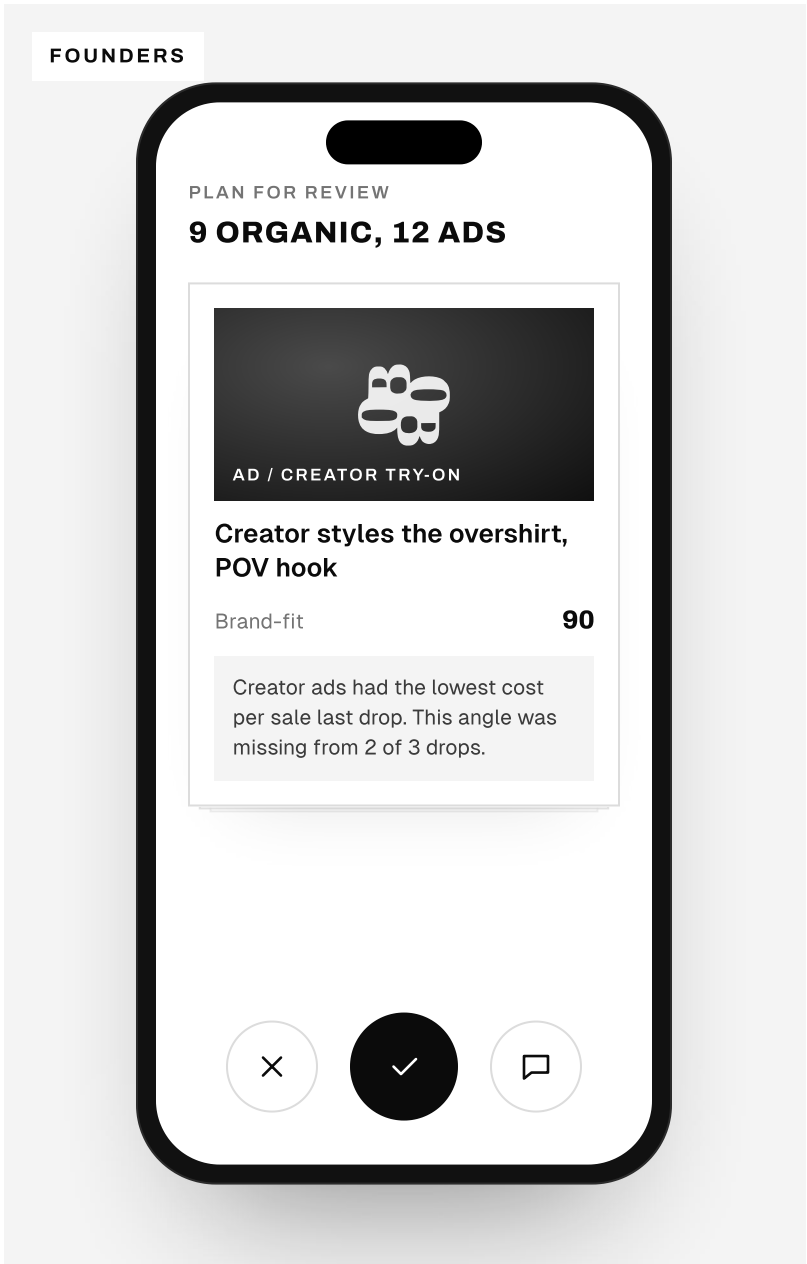

Results grouped by type of content, so the team sees which series work, and why.

SET MODE

MODULE 03

One merged shot list for organic and ads, on the cinematographer's phone.

APPROVALS

MODULE 04

Founders swipe through the plan with the reason and brand-fit on every card.

Bluorng

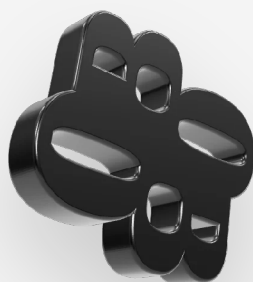

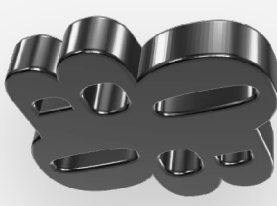

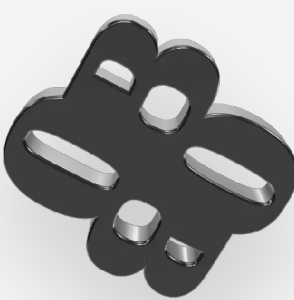

BLUORNG, pronounced Blue~Orange, blends global aesthetics with local sensibilities, and sits among the top streetwear brands in India. Every drop starts with a feed. This project is about what goes on it.

NEW DELHI / MUMBAI / ONLINE

THE BRIEF

2 STAGES

What we're building, who it's for, and the 20-week plan to get there.

PROJECT PROPOSAL

PROJECT TIMELINE

1. PROJECT PROPOSAL

1.1 WORKING TITLE

BLUPRINT: a content intelligence and ideation platform that helps BLUORNG decide what to make for Instagram (organic) and Meta Ads (paid).

Name logic: "BLU" (from BLUORNG) + "PRINT" (blueprint): a blueprint for every piece of content before a camera is switched on.

1.2 SPONSOR / CONTEXT

- **Industry partner:** BLUORNG, a New Delhi streetwear label (founded 2020 by Siddhant Sabharwal and Mokam Singh). Named GQ India's *Streetwear Label of the Year* for 2023. It runs stores in Delhi NCR and Mumbai and sells online, and it has done brand collaborations such as Jägermeister and Budweiser.
- **My role inside the partner:** I work inside BLUORNG's content team, which lets me observe directly how content gets planned, shot, posted and promoted. In this project I am the **UI/UX designer:** I research the content workflow and design a digital product that improves it.
- **Mentors:** Industry mentor (BLUORNG brand/marketing lead) + University guide.

Confidentiality: Any internal data (Instagram Insights, Meta Ads Manager numbers, sales figures, internal docs) must only be used with the written OK of the industry mentor. Anonymise or index numbers (e.g. "Reel A = 100, Reel B = 240") where needed.

1.3 BACKGROUND

BLUORNG grew from an Instagram-first niche label into a fast-rising fashion brand. Its content is a mix of:

- **Organic content:** drop teasers, lookbooks, campaign films, behind-the-scenes, store-launch content, collaborations, community/culture posts.
- **Inorganic (paid) content:** Meta ads (Instagram + Facebook) for drops, retargeting, store footfall and evergreen products.

Today, *what to make next* is decided mostly from experience, gut feel, trend-watching and scattered numbers. The numbers sit in Instagram Insights, Meta Ads Manager and Shopify, while the conversations happen on WhatsApp and in meetings. Nothing connects "what we posted / ran" to "what worked / sold" to "what we should make next".

1.4 PROBLEM (INITIAL BRIEF)

Content teams at drop-led streetwear brands like BLUORNG don't have a structured, evidence-backed way to decide **what content to produce**, both for organic Instagram (formats, series/IPs, stories) and for Meta ads (creative angles, hooks, variations). As a result, creative effort and ad spend are spent on guesswork, wins are not repeated systematically, and organic and paid content run as separate worlds.

1.5 AIM

Design a platform that turns **performance data + brand identity + trend signals** into **clear, brand-safe content recommendations and ready-to-shoot briefs**, for both organic and paid content.

1.6 OBJECTIVES

OBJECTIVE 1

UNDERSTAND THE WORKFLOW

How the content and performance teams ideate, plan, shoot, publish and review.

OBJECTIVE 2

FIND THE GAPS

The pain points and decision gaps inside that workflow.

OBJECTIVE 3

KNOW THE AUDIENCE

What BLUORNG's audience actually engages with, and why.

OBJECTIVE 4 BUILD A SHARED LANGUAGE A taxonomy of formats, series, hooks and angles the platform can learn from.	OBJECTIVE 5 CHOOSE A DIRECTION Generate and evaluate three concepts, then select one.	OBJECTIVE 6 DESIGN AND TEST IA, flows, wireframes, UI and a prototype, tested with real users.
--	---	--

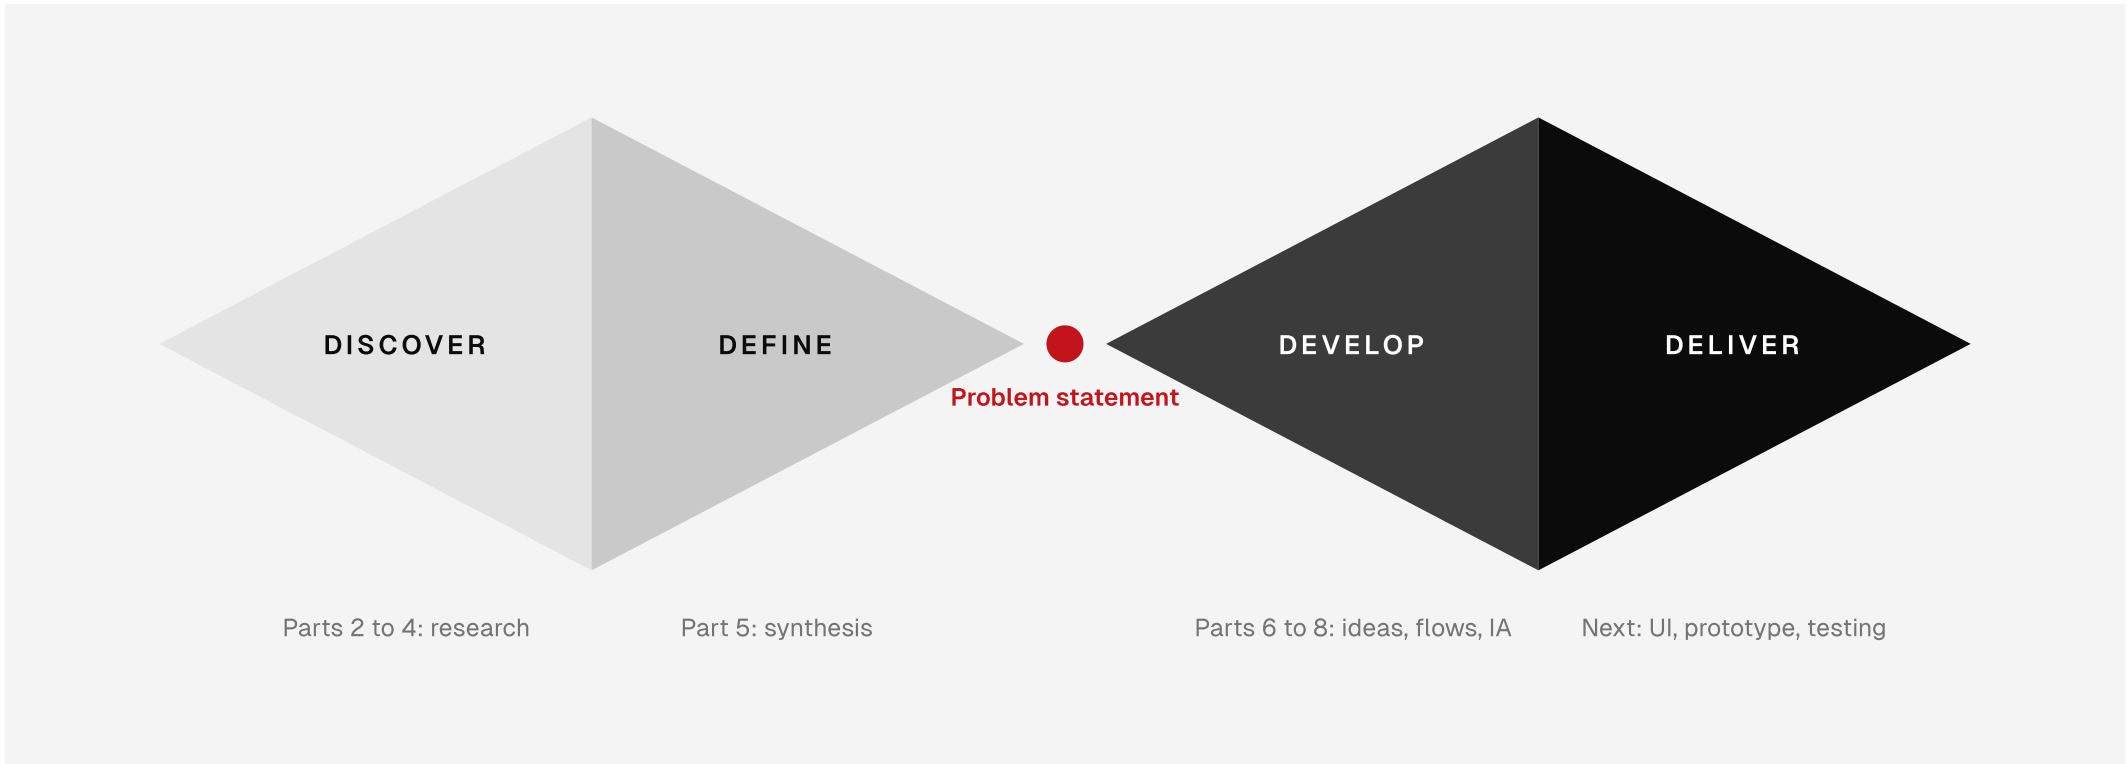

1.7 SCOPE

IN SCOPE Instagram organic ideas: Reels, carousels, stories and series like ASMR or story experiences Meta ads ideas: angles, hooks, variations and fatigue alerts Insights on what worked, briefs and a drop calendar Desktop web app plus a mobile companion for set and approvals	OUT OF SCOPE - Building the machine-learning model or backend - Auto-posting or buying ads inside the tool - YouTube and X, kept as future scope - Redesigning the e-commerce site
---	--

1.8 EXPECTED OUTCOME

📱 HI-FI PROTOTYPE BLUPRINT web app and mobile companion, researched and usability-tested.	🏗️ DESIGN SYSTEM AND IA Documented structure, navigation, labels and UI components.	✓ USABLE RECOMMENDATIONS Validated changes BLUORNG can apply even without building the product.
---	---	---

1.9 METHODOLOGY

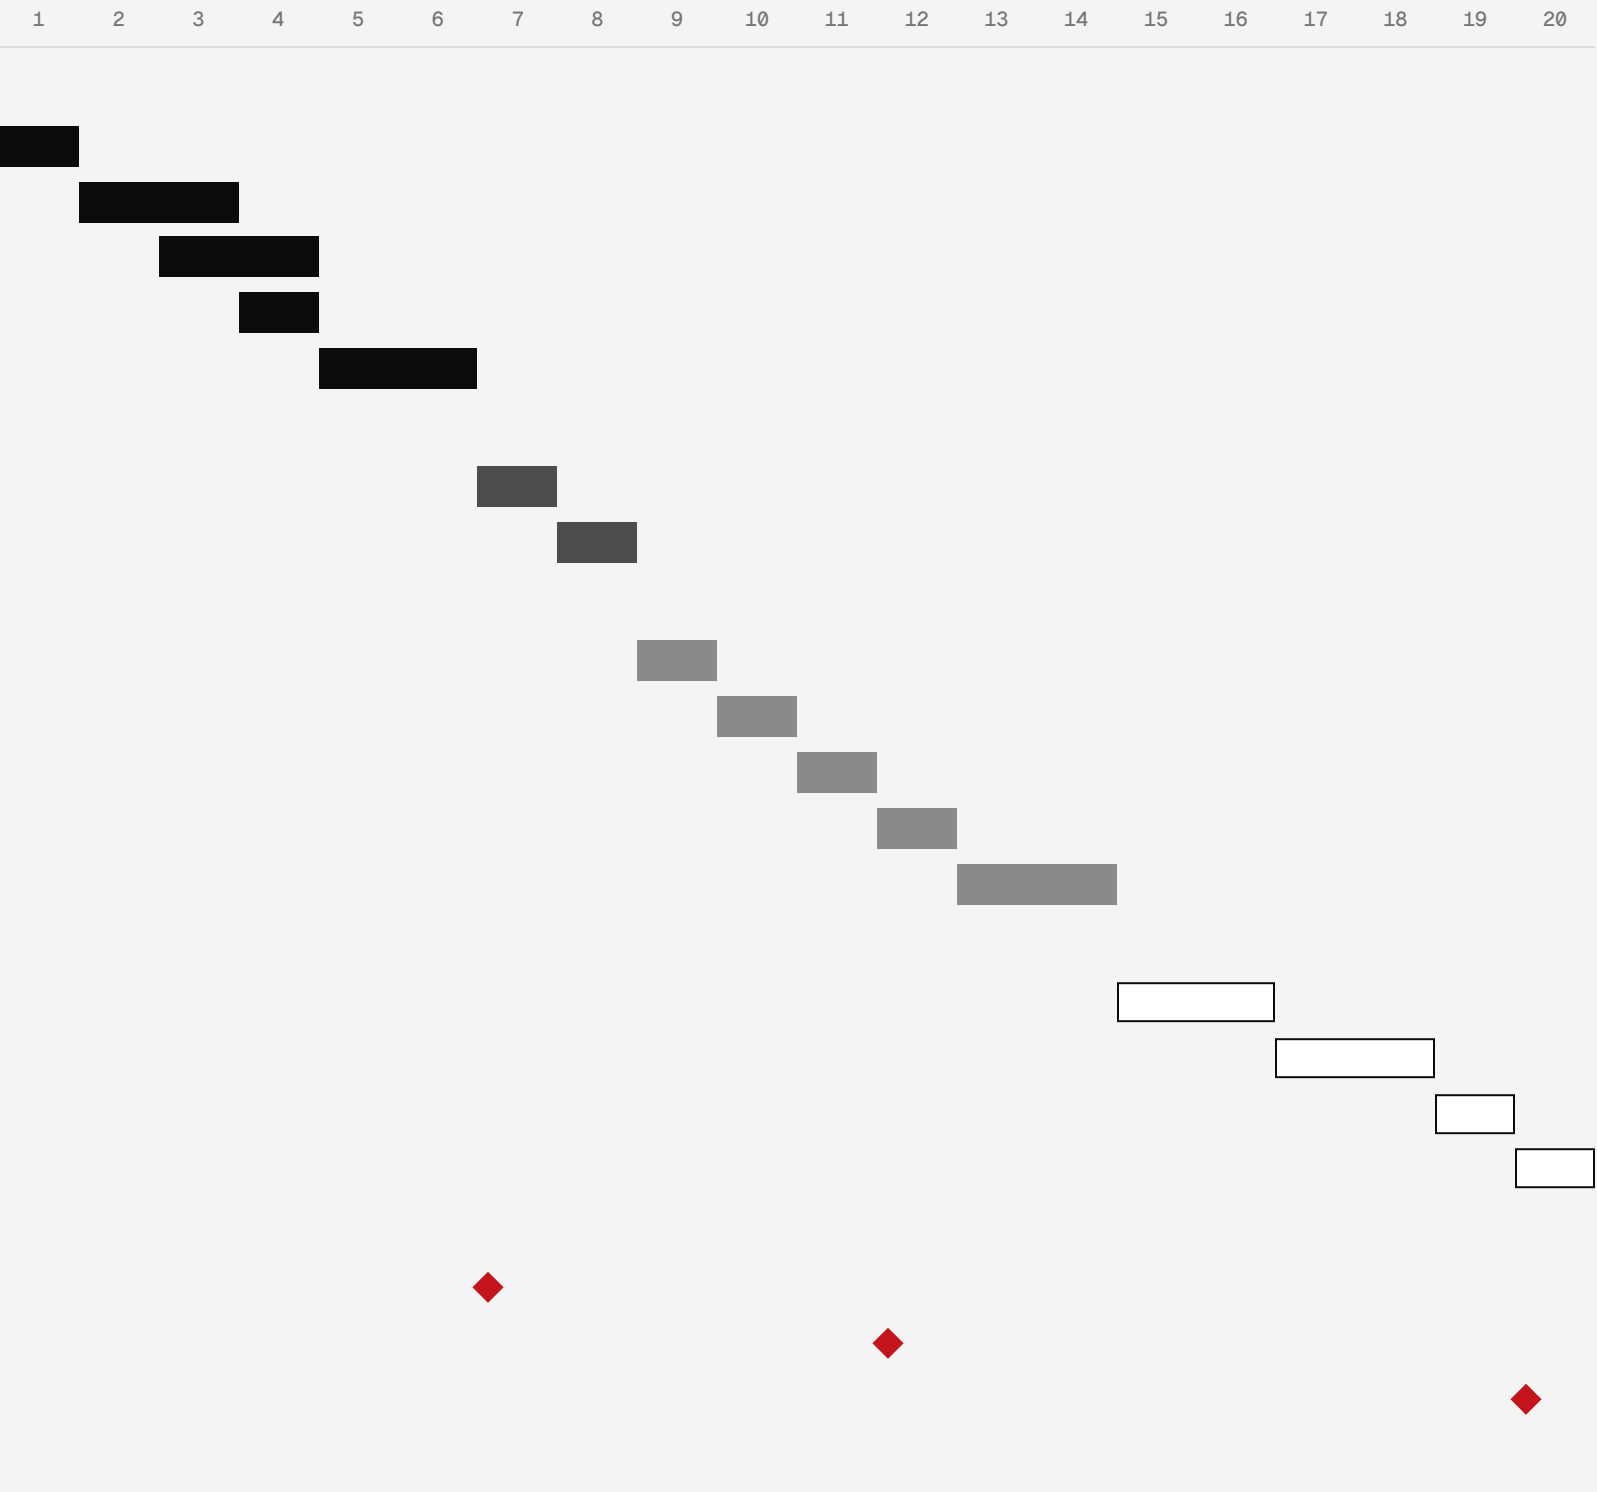

DOUBLE DIAMONDDIVERGE, CONVERGE, TWICE

1.10 WHY THIS MATTERS (VALUE)

FOR BLUORNG LESS GUESSWORK SPEND Fewer wasted shoot days and ad budget, more repeatable wins.	FOR THE TEAM FASTER, CLEARER WORK Quicker decisions, clear briefs, less back-and-forth on WhatsApp.	FOR THE AUDIENCE BETTER CONTENT More of what they want to watch: less noise, more culture.
---	---	--

2. PROJECT TIMELINE

WEEK 7 Pres. 1 End of research: report, charts, redefined brief.	WEEK 12 Pres. 2 Final concept, flows and information architecture.	WEEK 20 Jury Tested prototype and full documentation.
--	--	---

20-WEEK PLAN, DOUBLE DIAMOND

SHIFT THE WEEKS TO MATCH THE COLLEGE CALENDAR

SECONDARY RESEARCH

3 STAGES

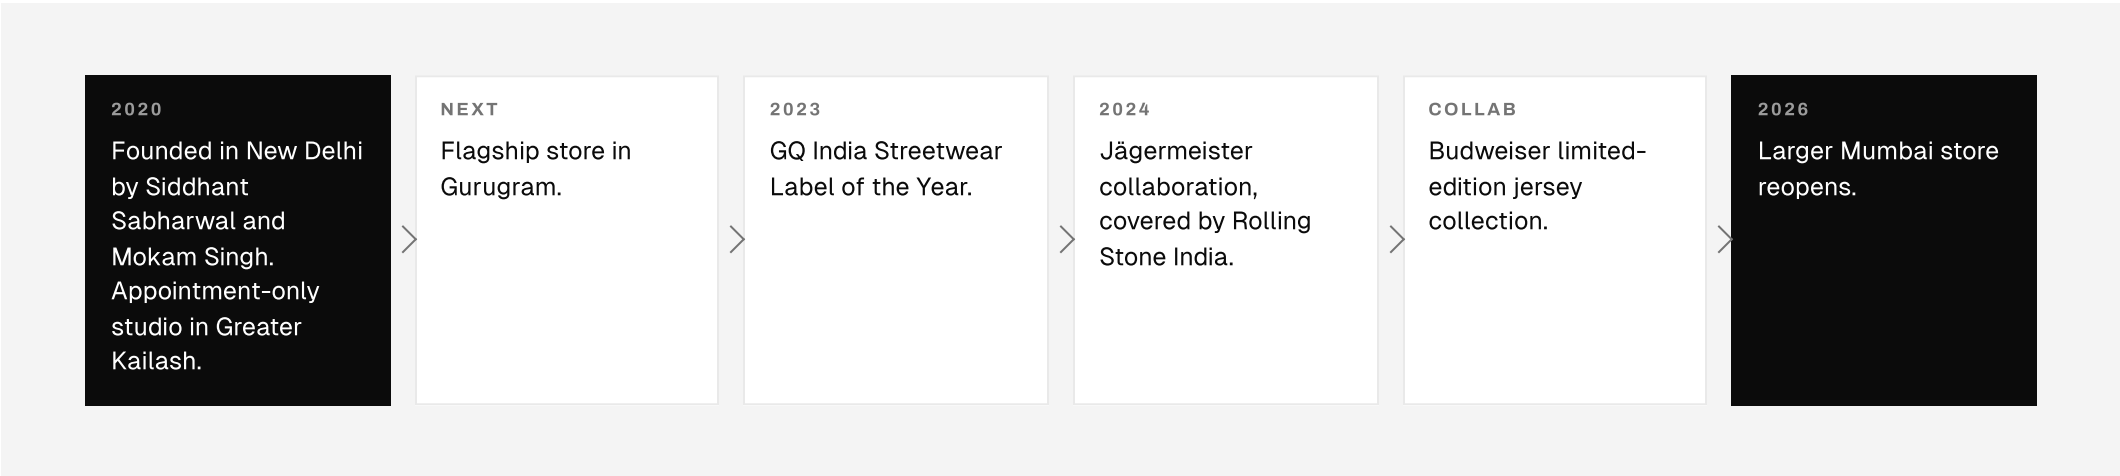

The brand, the market, the platforms, the existing tools, and twelve sources that shape the design.

- DOMAIN STUDY
- TOOL REVIEW
- LITERATURE REVIEW

Sources are listed at the end of this file. Figures from market-research firms and ad-tech vendors are **estimates**. Present them as "industry estimates", not facts, and cross-check before your final document.

3. DOMAIN STUDY

3.1 THE BRAND: BLUORNG

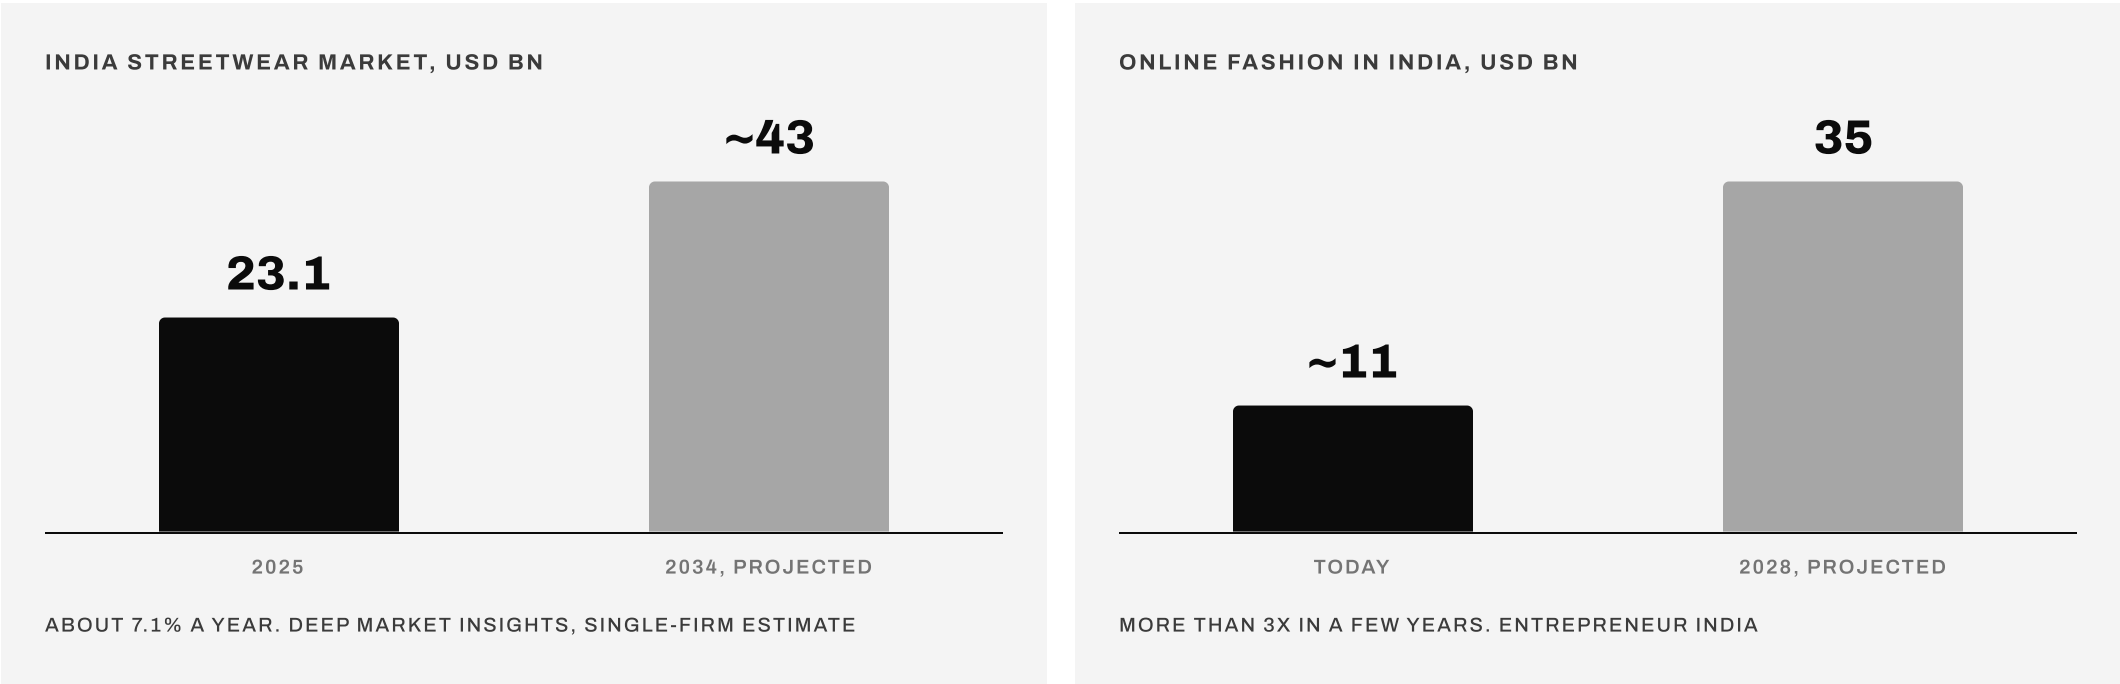

BLUORNG MILESTONESFROM SECONDARY SOURCES, VERIFY INSIDE

POSITIONING Premium Indian streetwear. Design-led, strong visual storytelling.	BUSINESS MODEL Drop-led: limited releases, sell-outs, collabs.	GROWTH ENGINE Instagram first for discovery and hype. Meta ads for conversion.	KNOWN CHALLENGE Low brand recall, and Instagram traffic not converting to sales at the needed rate (agency case study).
--	--	--	---

ADD FROM INSIDE

Follower count, posting frequency, team size, monthly content volume, typical shoot cost, ad budget band (indexed if confidential).

3.2 THE MARKET

D2C SIGNAL

Fashion is one of India's largest D2C categories, and its growth runs on Instagram campaigns, creator collabs and social-led drops instead of seasonal calendars.

PEER BRANDS TO BENCHMARK CONTENT AGAINST

- JAYWALKING
- ALMOST GODS
- HUEMN
- CAPSUL
- URBAN MONKEY
- BONKERS CORNER
- THE SOULED STORE
- SNITCH
- FEAR OF GOD ESSENTIALS
- CORTEIZ

FILLED: INDIAN PEERS. OUTLINED: GLOBAL REFERENCES.

3.3 THE PLATFORM ECOSYSTEM

**INSTAGRAM ORGANIC**

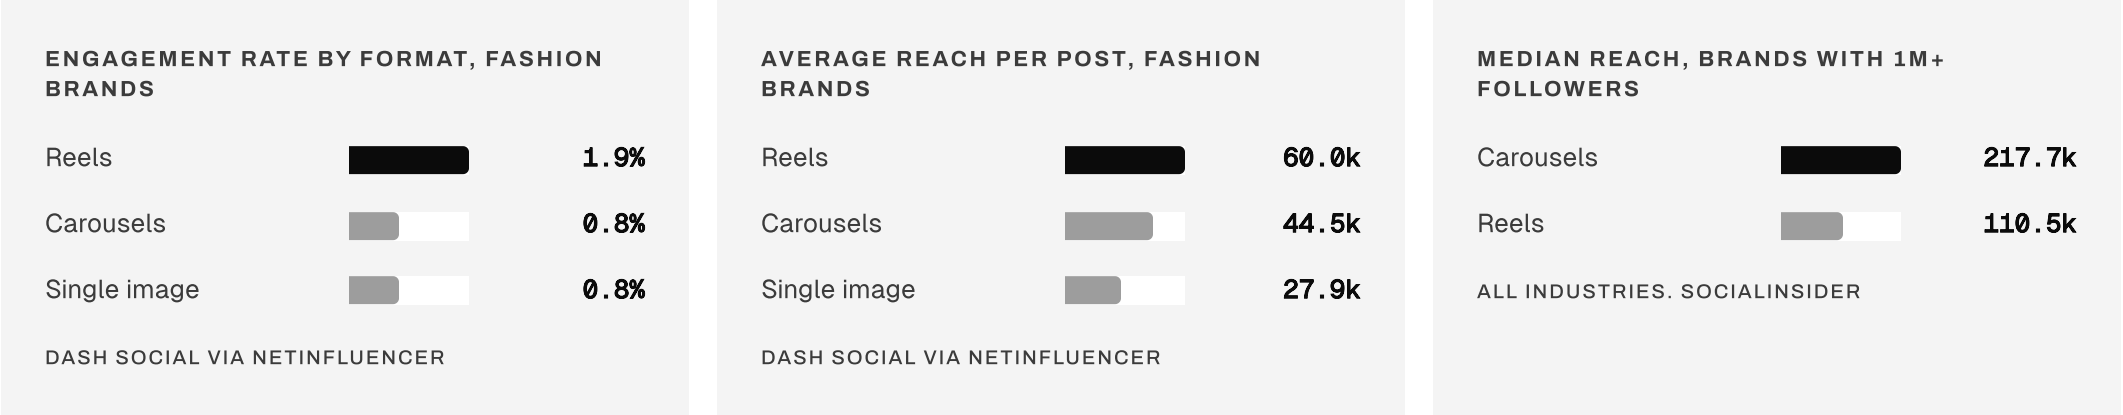

Reach is algorithmic, driven by watch time, shares and saves. The hook in the first 3 to 4 seconds matters, and series build habit and recall.

**META ADS**

Advantage+ automates targeting, so the creative itself now does the targeting. The team's main lever is creative diversity.

**CREATIVE FATIGUE**

Results drop as people see the same ad again. The team needs fresh variations, and to know when to refresh.

32%

Best-case improvement in cost per acquisition from diversified ad creative.

META VIA B&T

+9%

Incremental reach from diversified creative compared with similar-looking ads.

META VIA B&T

Wk 3–4

When fatigue typically sets in for prospecting campaigns.

VENDOR BENCHMARK

> 3

Ad frequency often flagged as the fatigue trigger.

VENDOR BENCHMARK

INFERENCE

No single format wins: fashion data favours Reels, large accounts favour carousels. BLUORNG needs a tool that learns from its own results, not generic rules.

3.4 CONTENT TAXONOMY (WORKING VOCABULARY FOR THE PROJECT)

ORGANIC SERIES (IPS) AND WHAT EACH IS FOR

DROP COUNTDOWN

Teasers, close-ups, "3 days left".

HYPE

NOTIFY

LOOKBOOK / FILM

Hero visual storytelling.

BRAND

DESIRE

ASMR

Fabric, embroidery, zips, packing orders, store sounds.

SAVES

QUALITY

STORY EXPERIENCE

Polls, quizzes, "pick the colourway".

ENGAGEMENT

RESEARCH

STUDIO DIARIES

Design, sampling, shoot.

CRAFT

RECALL

ONE PIECE, 3 WAYS

Styling guide.

SAVES

SALES

FIT CHECK

In-store and street community fits.

COMMUNITY

PROOF

COLLAB UNIVERSE

Brand and artist partner content.

REACH

NEW FANS

CULTURE / MEMES

Trends, audio, inside jokes.

REACH

SHARES

FOUNDER POV

The story behind a collection.

TRUST

RECALL

PAID ANGLES FOR META ADS

SCARCITY / DROP

"Drops Friday 8 PM. Limited units."

CRAFT & QUALITY

Macro fabric and detail video, ASMR-style.

SOCIAL PROOF

Store queues, creators wearing it, sold-out stamps.

CREATOR / UGC

A creator styling the piece in their own voice.

LOOKBOOK CAROUSEL

Multi-product catalogue feel.

RETARGETING / DPA

Dynamic product ads for viewers and cart-abandoners.

STORE FOOTFALL

"Now open in Mumbai", with a map.

COLLAB ANNOUNCE

Co-branded hero with the partner brand.

TOOL	ORGANIC	PAID	SUGGESTS WHAT TO MAKE	LEARNS THE BRAND	GAP FOR BLUORNG
IG Insights, Business Suite	●	◐	○	○	Data only, no "so what"
Ads Manager, Ads Library	○	●	○	○	Not built for ideation

 YES

◐

 PARTIAL OR MANUAL

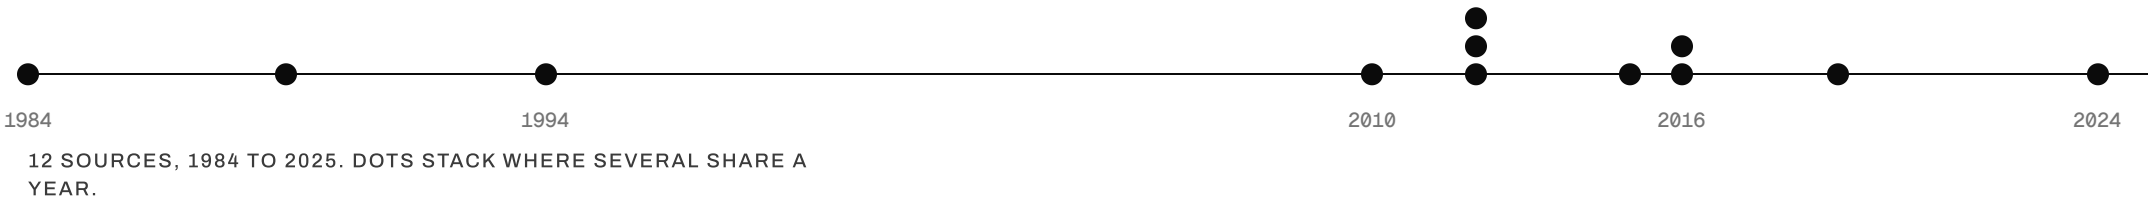

○

 NO

CAPABILITY MATRIX, 8 TOOL GROUPS

NO EXISTING TOOL COVERS ALL FOUR

4. LITERATURE REVIEW

DROPS

1984

CIALDINI, INFLUENCE

Scarcity raises perceived value.

Use: time drop content and don't overuse it.

ADOPTION

1989

DAVIS, TAM

Adoption depends on usefulness and ease.

Use: it must beat WhatsApp and gut feel.

USABILITY

1994

NIELSEN, 10 HEURISTICS

Visibility, real-world match, control, consistency.

Use: the usability test framework.

CONTENT

2010

KAPLAN & HAENLEIN

Brands must take part, not broadcast.

Use: participatory content like Story Experience and UGC.

CONTENT

2012

BERGER & MILKMAN

High-arousal emotions drive sharing.

Use: tag content by emotion, not just format.

CONTENT

2012

DE VRIES ET AL.

Vividness and interactivity change likes and comments.

Use: tag video vs static, and polls.

LUXURY

2012

KIM & KO

Entertainment, interaction, trendiness, customisation and word of mouth build luxury equity.

Use: content-goal tags for a premium brand.

ADS

2015

ASHLEY & TUTEN

Functional, emotional, experiential and user-image strategies.

Use: the basis of the ad-angle taxonomy.

LUXURY

2016

GODEY ET AL.

Social builds awareness and image, then loyalty.

Use: measure recall, not only sales.

JOURNEY

2016

LEMON & VERHOEF

Touchpoints across the whole journey.

Use: map content to discover, desire, drop, wear, share.

AI AND UX

2019

AMERSHI ET AL., CHI

18 human-AI guidelines: show why, allow correction, learn.

Use: explainable, editable ideas.

ADS

2023–25

META, CREATIVE IS TARGETING

Diverse creative improves cost and reach. Similar openers count as duplicates.

Use: push hook and angle diversity.

1 SUCCESS IS MULTI-DIMENSIONAL Format, emotion, interactivity, timing and angle all matter.	2 PREMIUM HAS ITS OWN RULES Equity and desire matter as much as clicks.	3 SCARCITY IS FRAGILE Drop content needs a calendar, not a reflex.	4 PAID RUNS ON VARIETY Different ideas, not more of the same.	5 AI MUST EXPLAIN ITSELF Explainable and editable, or the team rejects it.

SYSTEMS AND PROBLEMS

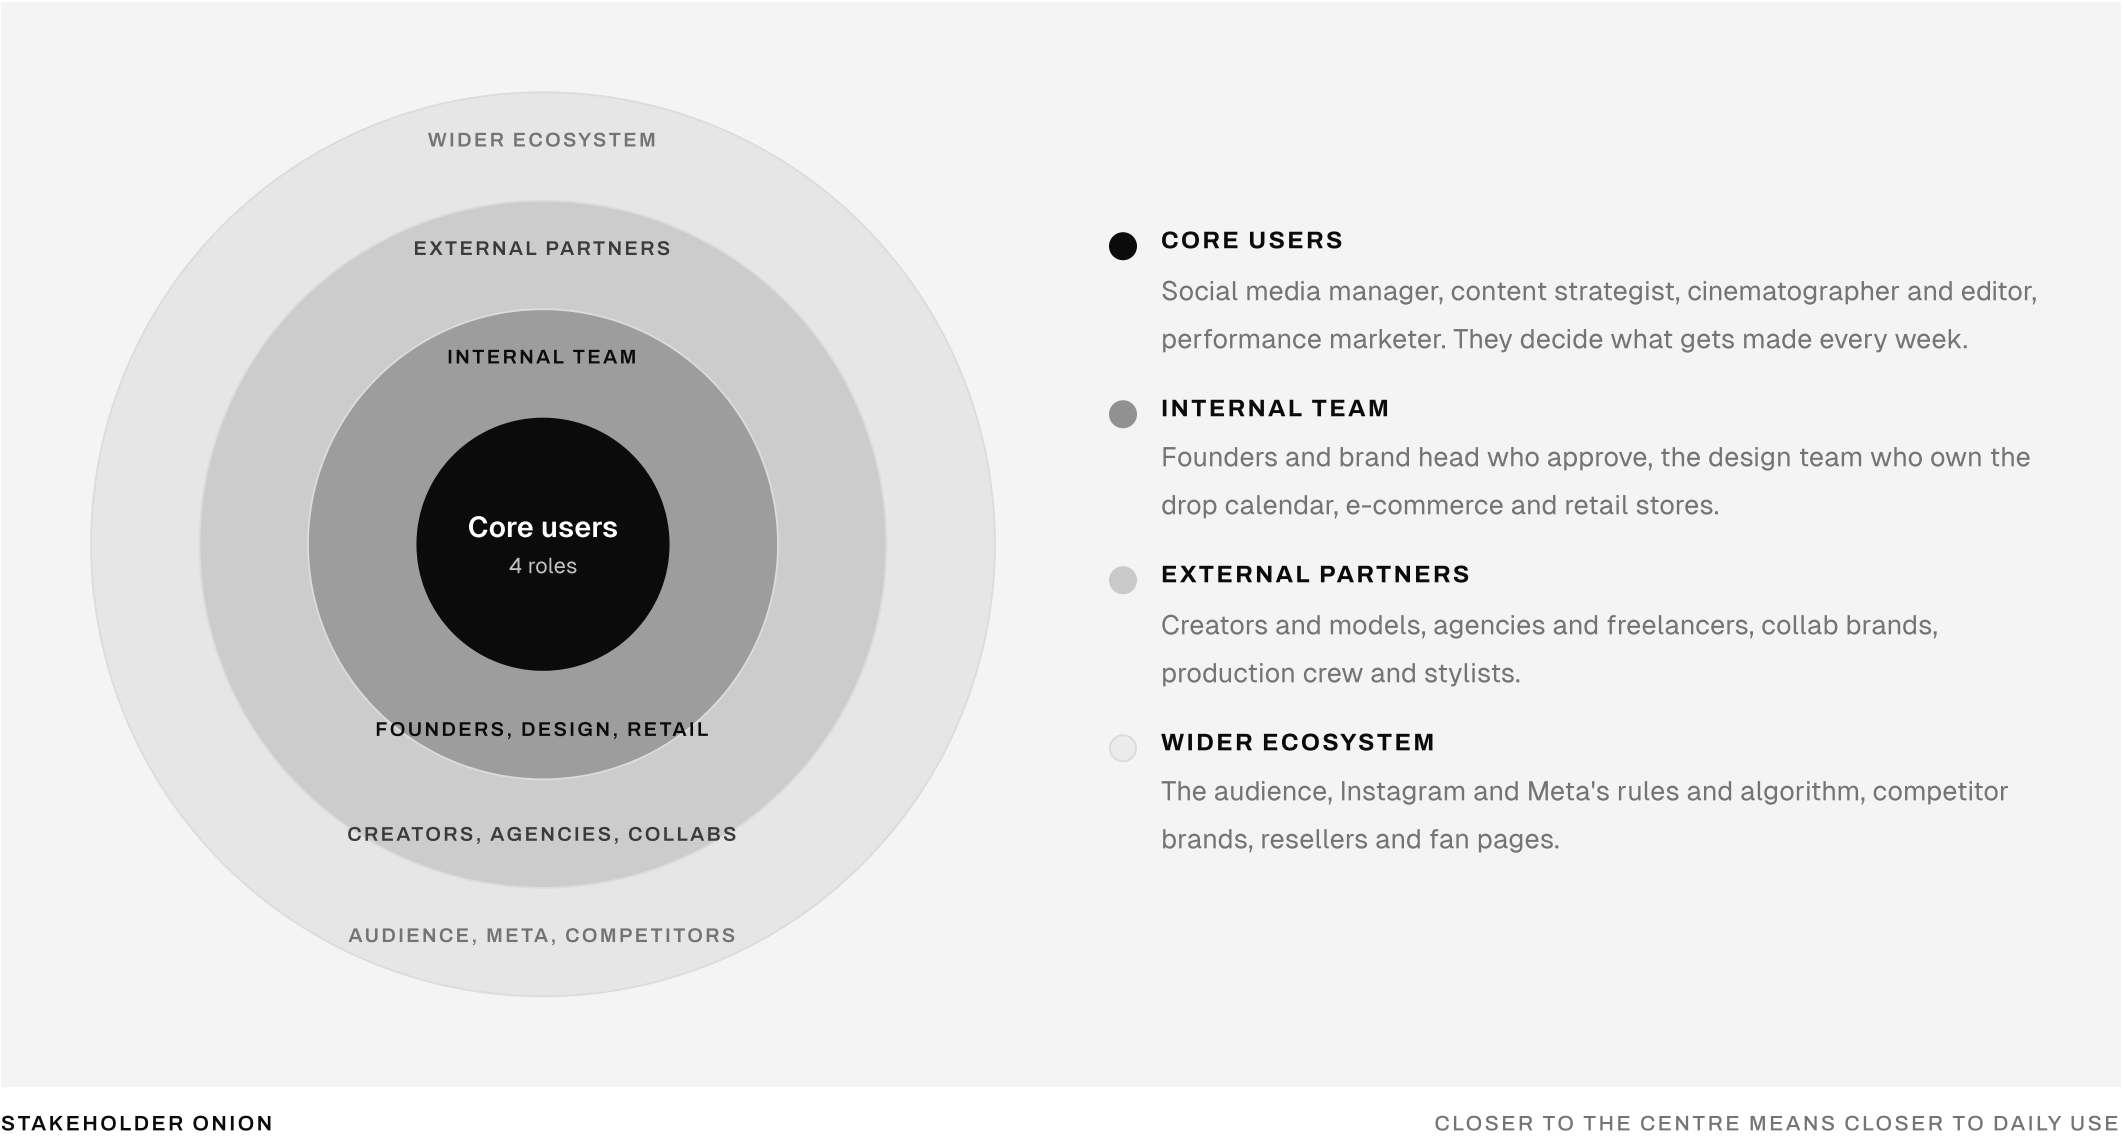

4 STAGES

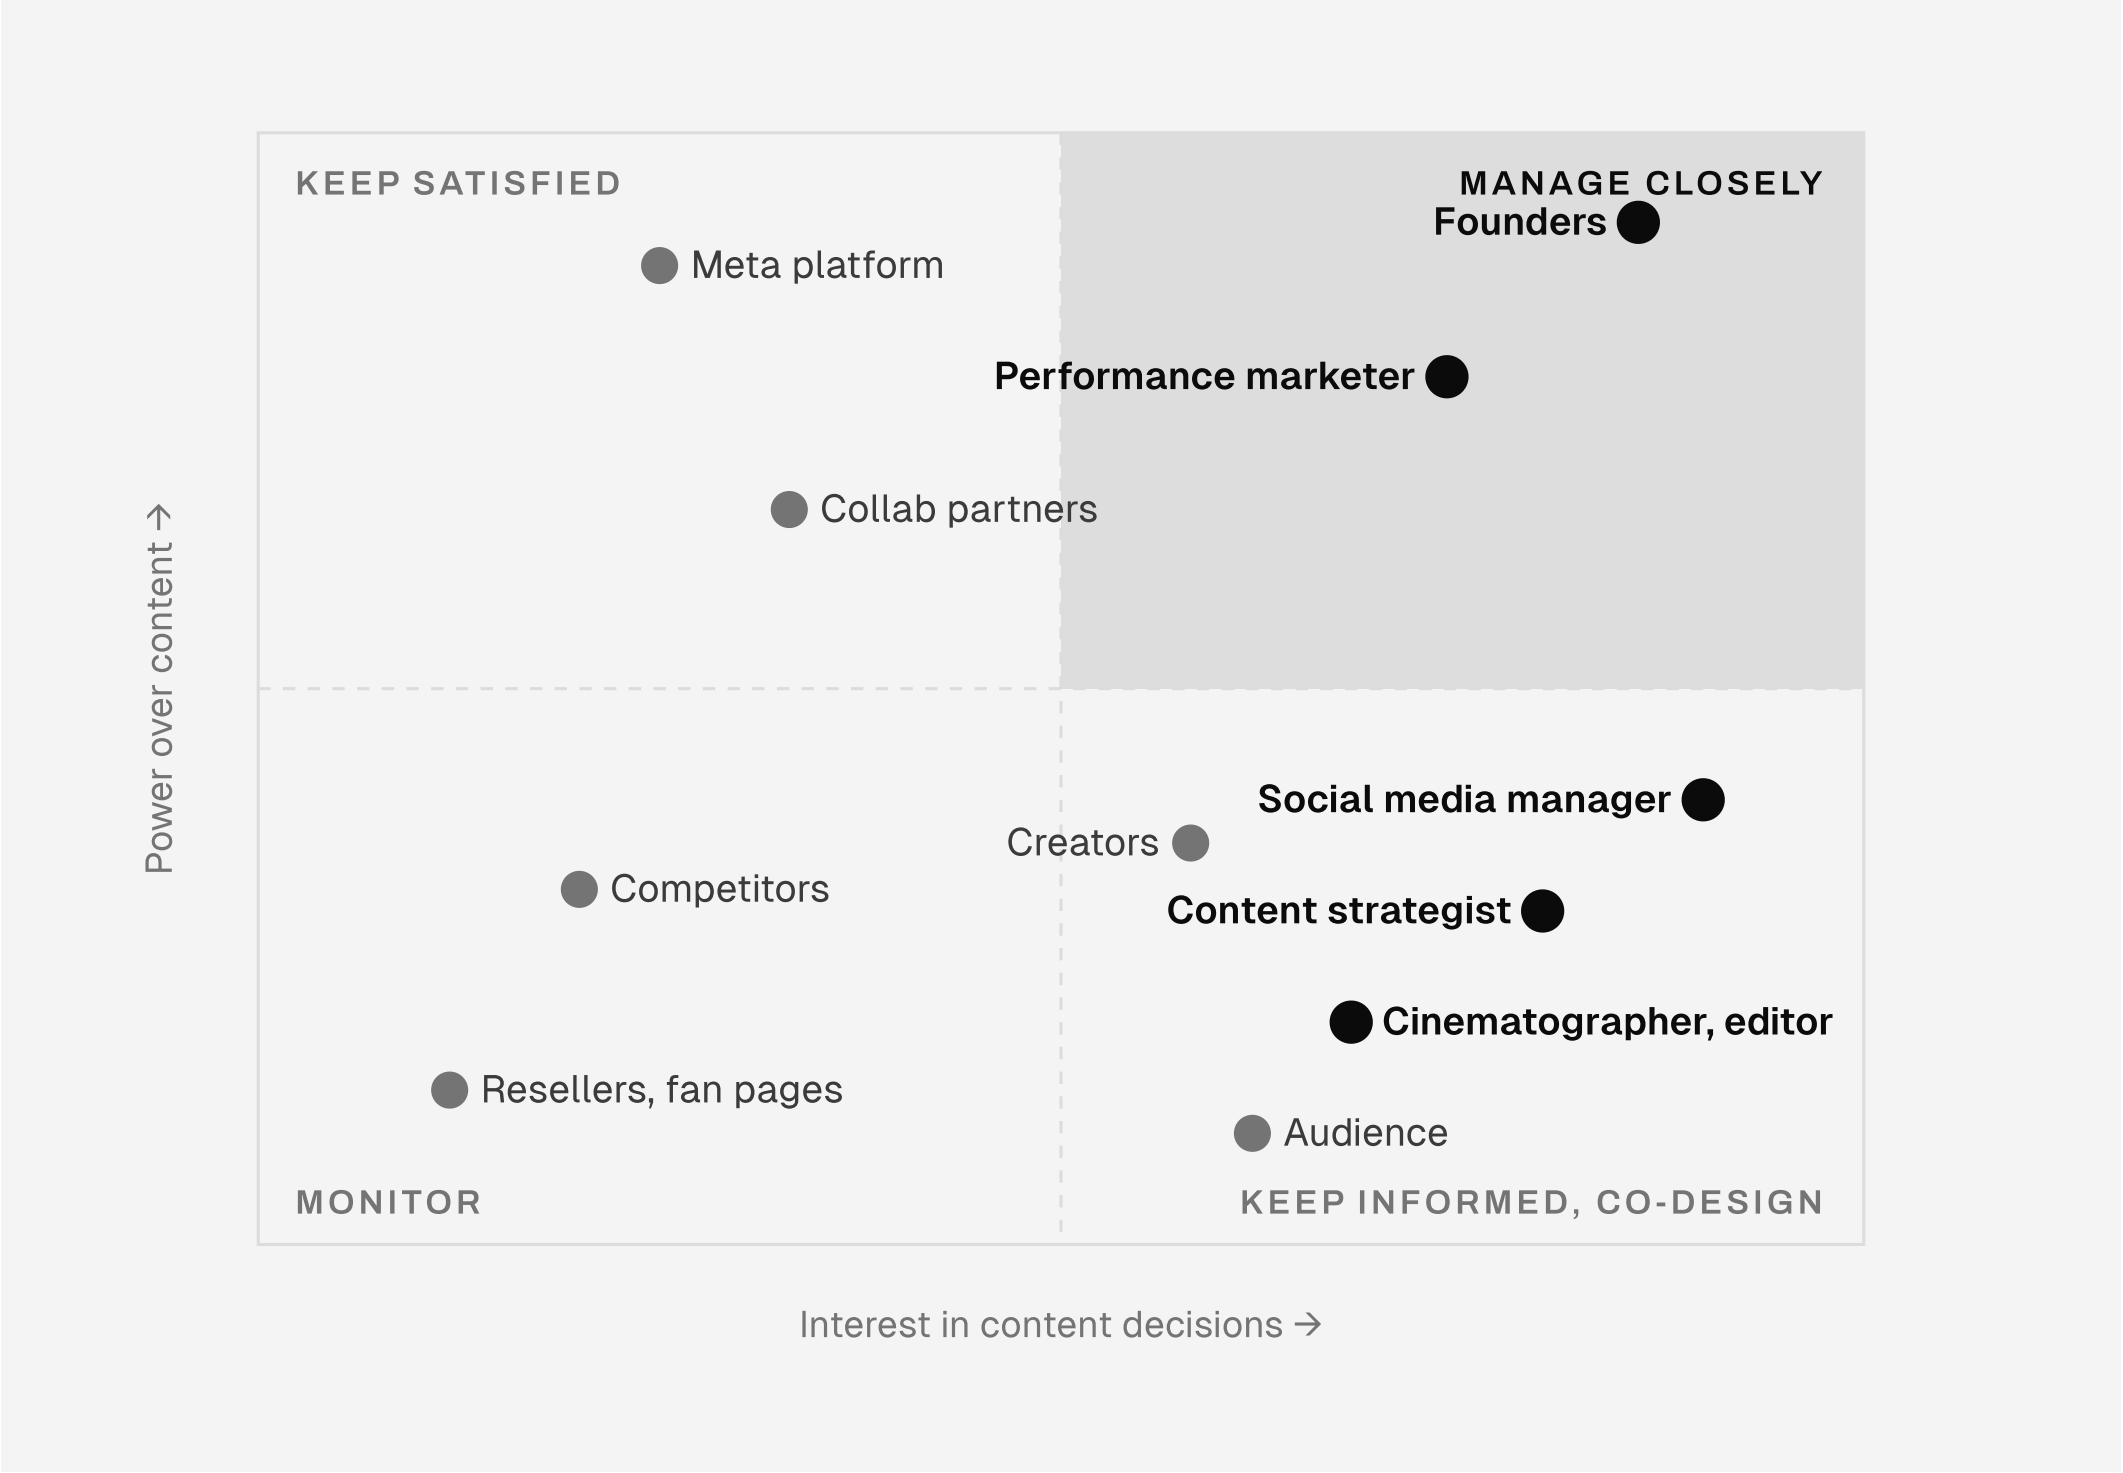

Who is involved, how content moves today, and exactly where it breaks.

- STAKEHOLDERS MAP
- SYSTEM MAPPING
- PROBLEM MAPPING
- TARGET USERS

5. STAKEHOLDERS MAP

5.1 ONION MAP (CORE → OUTER)

POWER AND INTEREST

BLUE DOTS ARE THE PRODUCT'S DAILY USERS

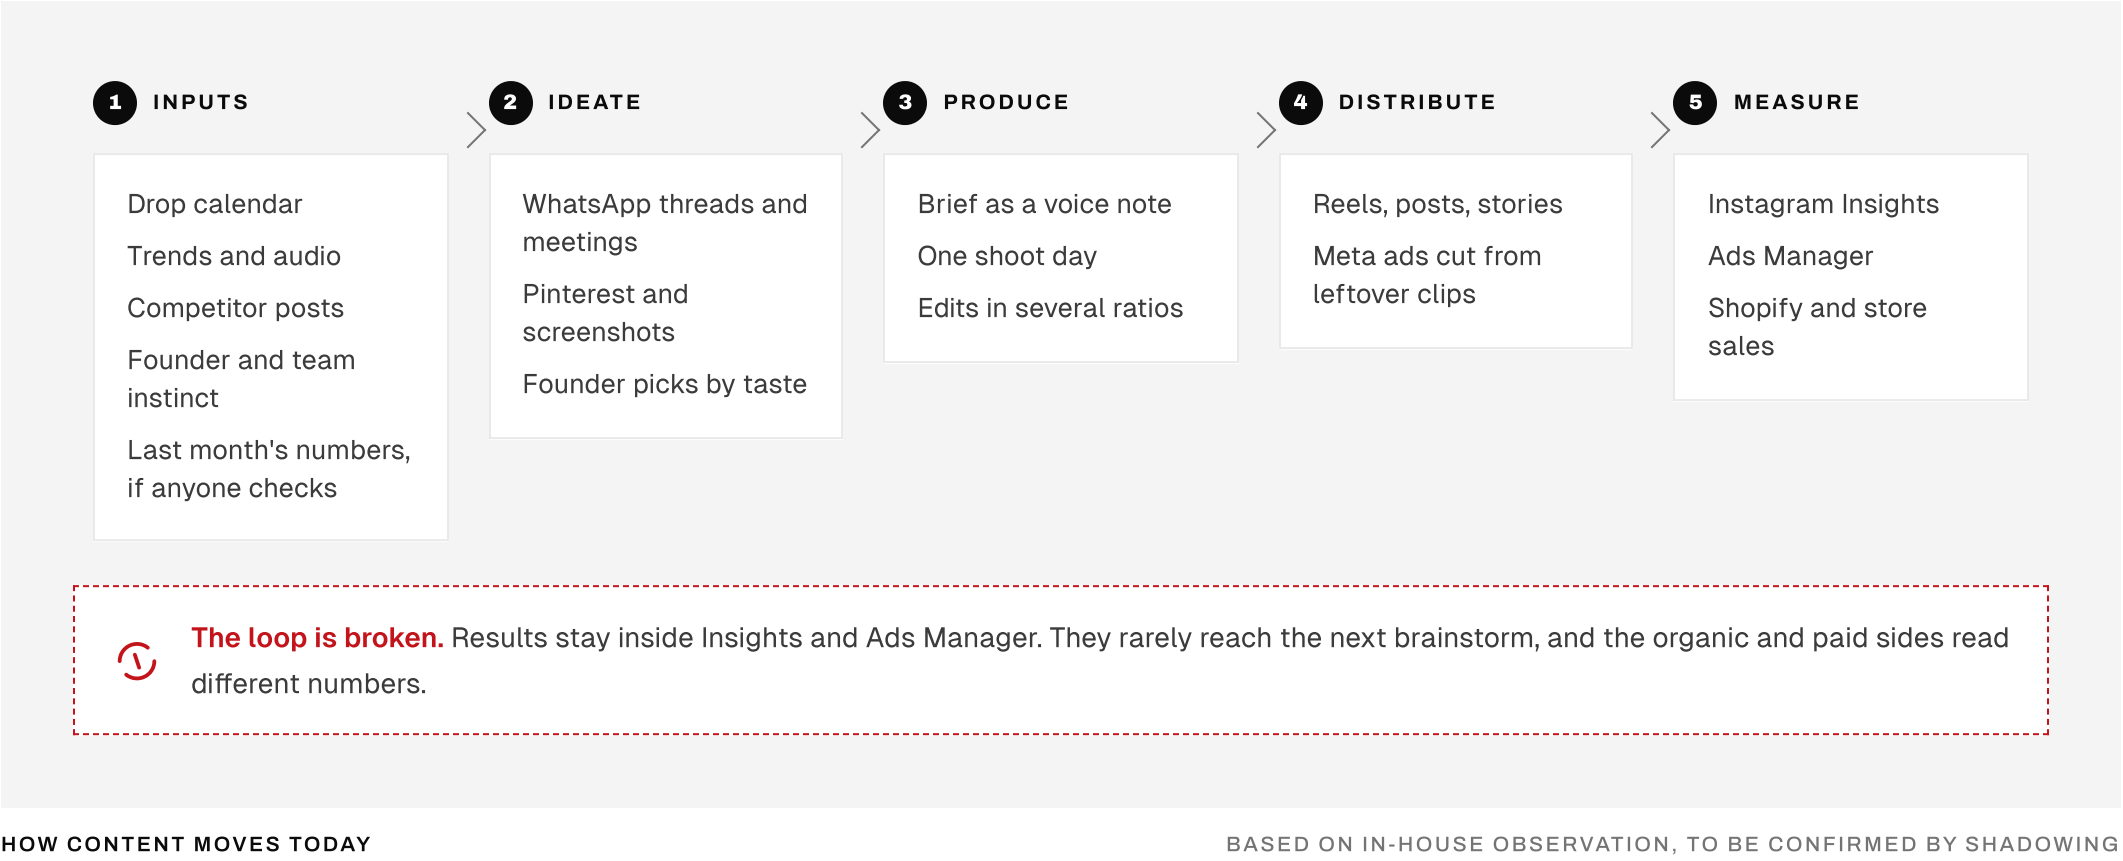

Strategy: manage the founders and the performance marketer closely by showing return and brand safety. Co-design with the content team. Keep Meta satisfied by staying inside its API and ad policies. Monitor competitors.

5.3 STAKEHOLDER NEEDS TABLE

STAKEHOLDER	NEEDS FROM CONTENT	PAIN TODAY	WHAT BLUPRINT GIVES THEM
Founders / Brand head	Brand stays premium; growth; recall	Can't see <i>why</i> things work; approvals over WhatsApp	Brand-guard score, clear rationale, one approval view
Social media manager	Consistent, fresh calendar	Idea block, trend chasing, manual reporting	Idea bank, IP series planner, auto insights
Content strategist / creative lead	Strong concepts, coherent narrative per drop	Briefs scattered; wins not repeated	Brief builder, "what worked" memory
Cinematographer / editor	Clear shot lists, references, deadlines	Vague briefs, last-minute changes, re-shoots	Shot list + hook + aspect ratios + references in one brief
Performance marketer	Many ad variations, fast; fatigue control	Waits on creative; doesn't know which angle to test next	Angle/hook matrix, fatigue alerts, "promote this organic winner"
Design/product team	Product story told well	Content not aligned with drop dates	Drop-calendar-linked content plan
Audience	Entertaining, cultural, not salesy	Repetitive ads, generic posts	Better, more varied content (indirect benefit)

6. UNDERSTANDING THE SYSTEM (SYSTEM MAPPING)

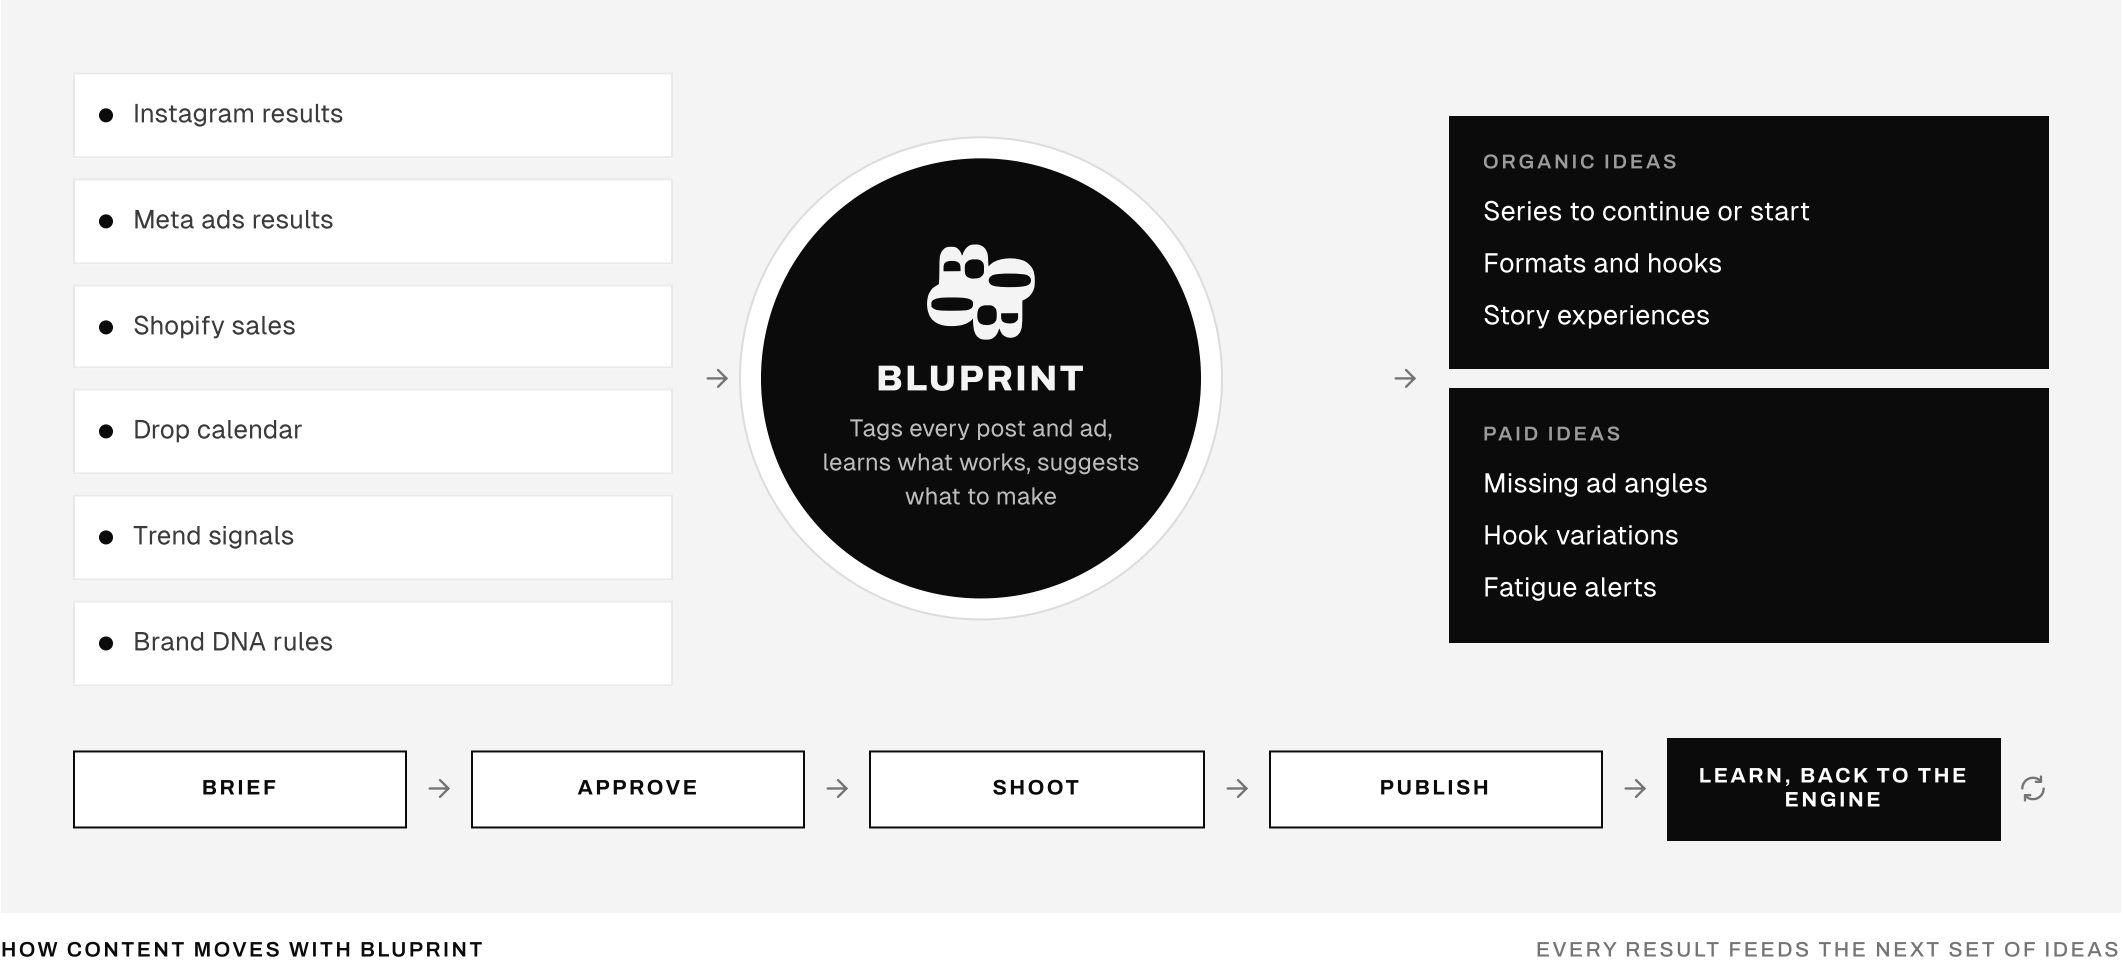

6.1 CURRENT-STATE CONTENT SYSTEM ("AS-IS")

Observations:

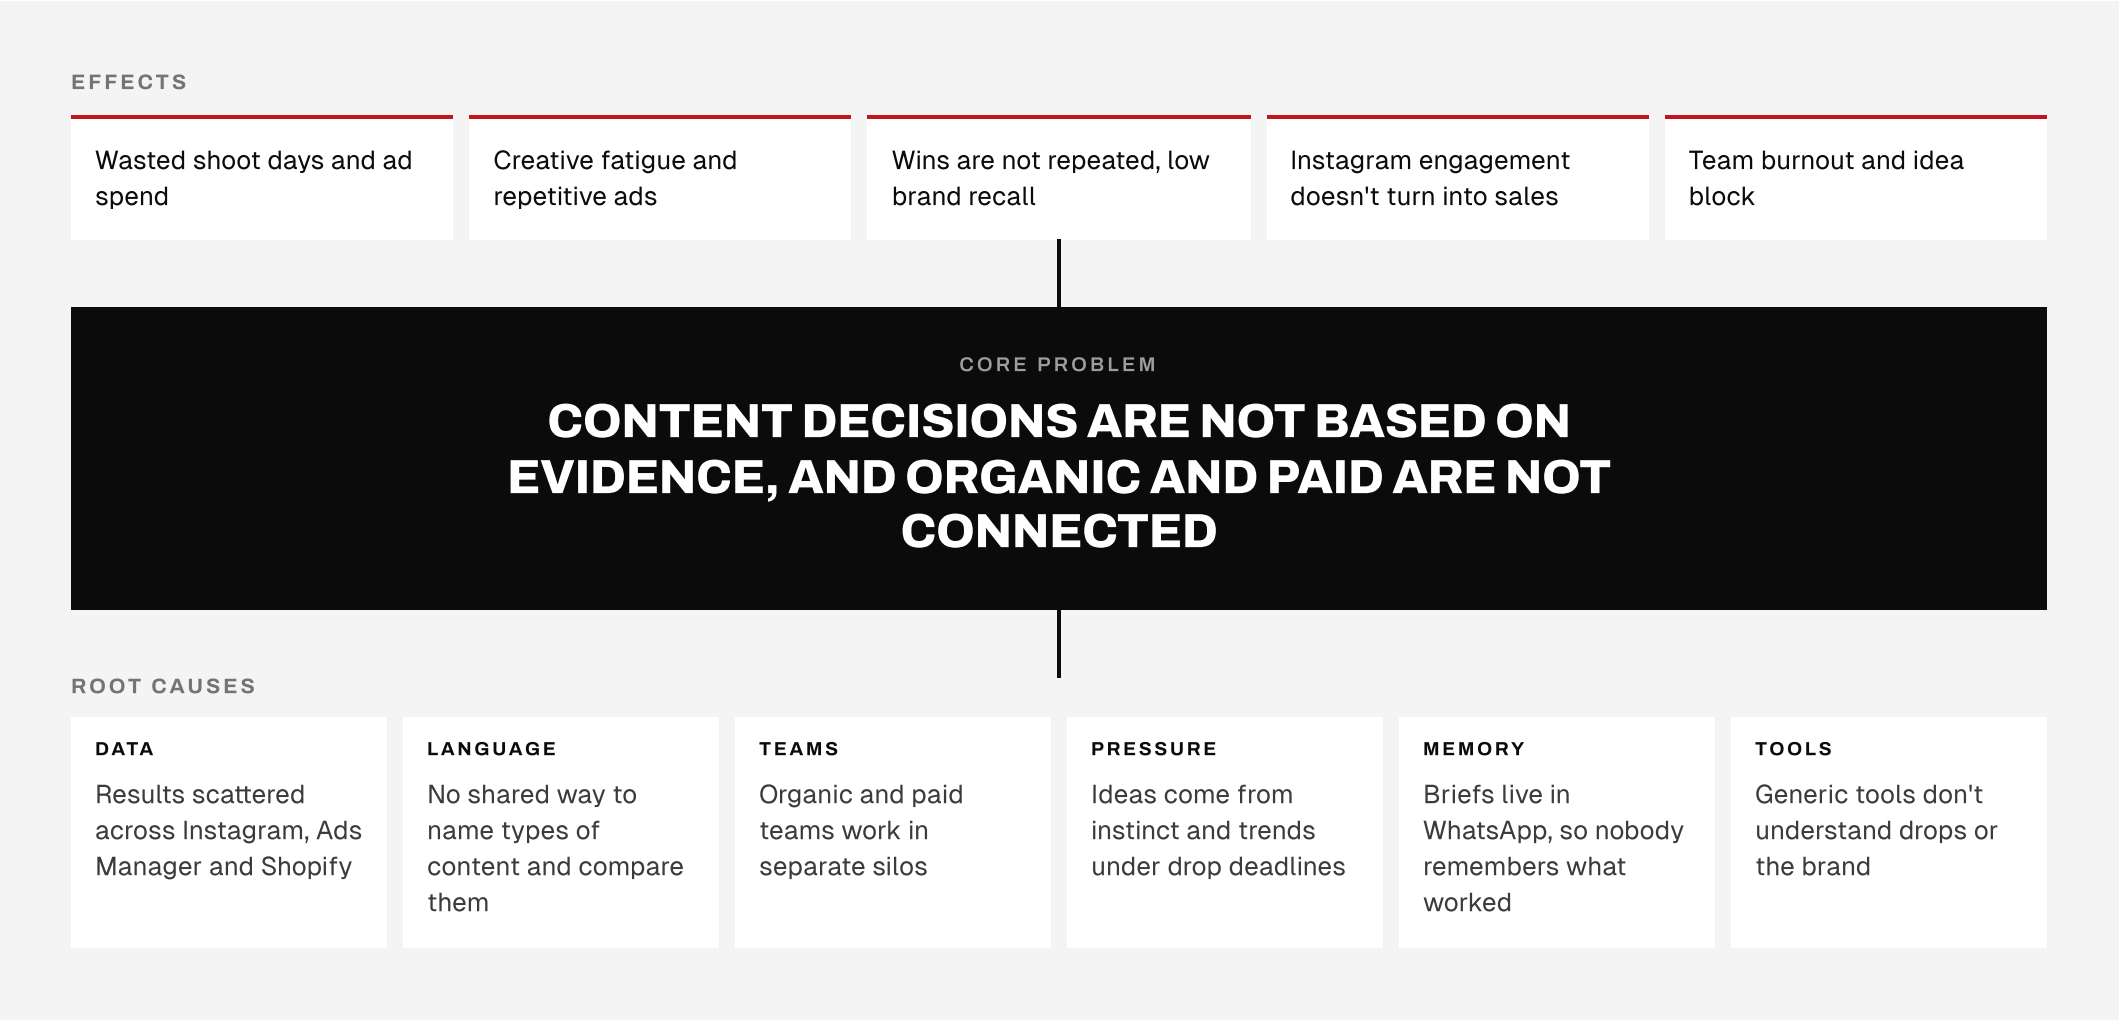

- Broken feedback loop:** measurement data rarely flows back into ideation in a structured way.
- Organic ↔ paid silo:** the organic team and the performance marketer use different tools and metrics, and organic winners are rarely promoted systematically.
- Single point of decision:** founder approval is the bottleneck, and the criteria are taste-based and undocumented.
- Memory loss:** what worked last drop lives in people's heads and chat history.
- Production is expensive:** every shoot day matters, so wrong ideas are costly.

6.2 FUTURE-STATE SYSTEM ("TO-BE" WITH BLUPRINT)

7. PROBLEM IDENTIFICATION & ANALYSIS (PROBLEMS MAPPING)

7.1 PROBLEM TREE

PROBLEM TREE

CAUSES AT THE ROOTS, EFFECTS IN THE BRANCHES

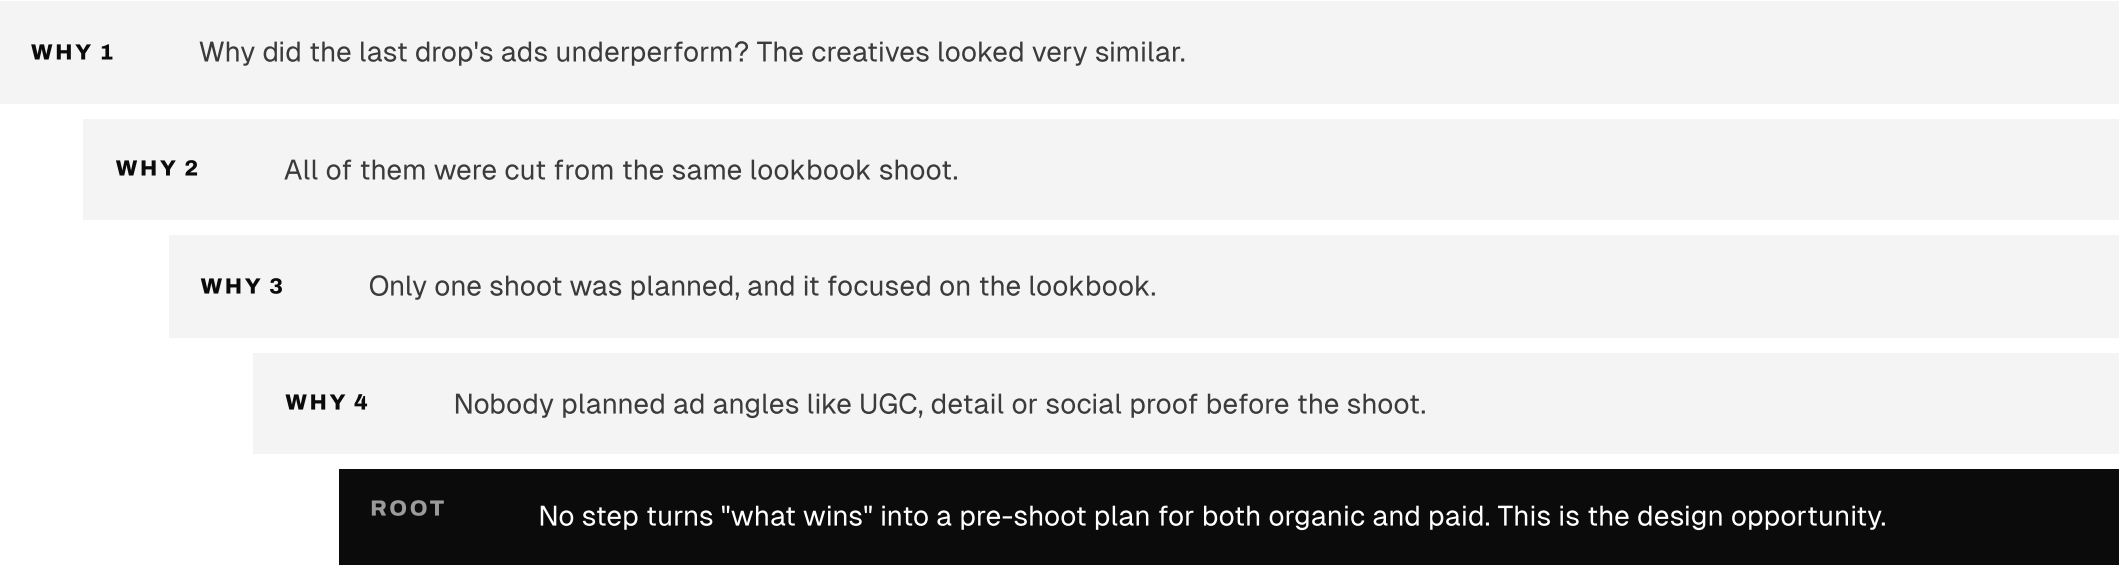

7.2 PROBLEM CLUSTERS (AFFINITY)

CLUSTER	PROBLEMS	SEVERITY
A. Knowing what works	Can't link a post's type to its result. Vanity metrics. No benchmark against own history.	H
B. Ideation	Idea block. Trend-chasing feels off-brand. Same ideas repeated.	H
C. Organic and paid	Organic winners not promoted. Ads made separately. Different KPIs.	H
D. Ad creative	Too few variations. Fatigue noticed late. Unclear what to test next.	H
E. Briefing and production	Vague briefs, re-shoots, missing aspect ratios, last-minute changes.	M
F. Planning	Content not aligned to the drop calendar. Last-minute rush before drops.	M
G. Approvals	Founder bottleneck. Taste criteria never written down.	M
H. Brand consistency	Fear of looking mass-market or salesy. No brand guardrails.	M

8 PROBLEM CLUSTERS, 4 HIGH SEVERITY

H AND M ARE DRAFT RATINGS, CONFIRM WITH RESEARCH

7.3 5 WHYS (EXAMPLE)

8. DEFINED PROBLEM AREA & TARGET USERS

8.1 PROBLEM AREA

The ideation-to-brief stage of content creation, meaning the point where a streetwear brand's team decides *what to make* for Instagram and Meta ads. Today it is disconnected from performance data, brand rules and the drop calendar.

8.2 TARGET USERS

PRIMARY CONTENT TEAM AND PERFORMANCE MARKETER They decide what gets made and run, every week.	SECONDARY MAKERS AND FOUNDERS Cinematographers, editors, and the brand head who approves.	TERTIARY AGENCIES AND CREATORS They receive briefs and need brand context.	INDIRECT THE AUDIENCE Gets better, more relevant content.	SCALE-UP MARKET OTHER PREMIUM D2C BRANDS Indian, Instagram-led, drop-based, 5 to 50 person teams.
--	--	---	--	--

PRIMARY RESEARCH

8 STAGES

How we learn from the team and the audience, the instruments, and what we expect to find.

- RESEARCH PLAN
- SEGMENTATION
- QUESTIONNAIRES
- INTERVIEWS
- FOCUS GROUP
- ETHNOGRAPHY
- REPORT
- INFERENCES

Read this first: This part gives you the research **plan, instruments, analysis method and report structure**, filled with **hypotheses** where the results will go. You must run the research yourself; the jury will check that the data is real. Every ☐ / ☐ cell is a slot for your real findings. Hypotheses (H1–H10) are what we *expect* to find. Your data will confirm or reject them, and a rejected hypothesis is a good finding too.

9. PRIMARY RESEARCH PLAN

9.1 RESEARCH QUESTIONS

RESEARCH QUESTION	SHADOWING	INTERVIEWS	SURVEY A	SURVEY B	FOCUS GROUP	CONTENT AUDIT	CONCEPT TEST
RQ1. How does the team decide what to make?	●	●					
RQ2. Which data do they use, and for what?		●	●				
RQ3. Where are time, money and morale lost?	●		●				
RQ4. How do organic and paid coordinate?		●					
RQ5. What does the audience engage with and buy from?				●	●	●	
RQ6. What would make them trust AI suggestions?		●					●

6 QUESTIONS X 7 METHODS

EVERY QUESTION IS COVERED BY AT LEAST ONE METHOD

9.2 HYPOTHESES

H1

Most content decisions come from intuition and trends, not structured data.

SURVEY A Q5

H2

Teams check data, but fewer than half use it to plan the next content.

A Q6, Q7

H3

Organic winners are rarely turned into ads.

A Q11

H4

Performance marketers don't get enough ad variations.

A Q14

H5

Vague briefs cause re-shoots or re-edits at least sometimes.

A Q17

H6

Drop weeks create last-minute content pressure.

A Q18

H7

The audience prefers BTS, ASMR detail and styling over plain product posts.

AUDIT

B Q6–8

H8

The audience prefers creator-style ads to ads that look like ads.

B Q10

H9

Teams trust AI only if it explains itself and can be edited.

A Q20

H10

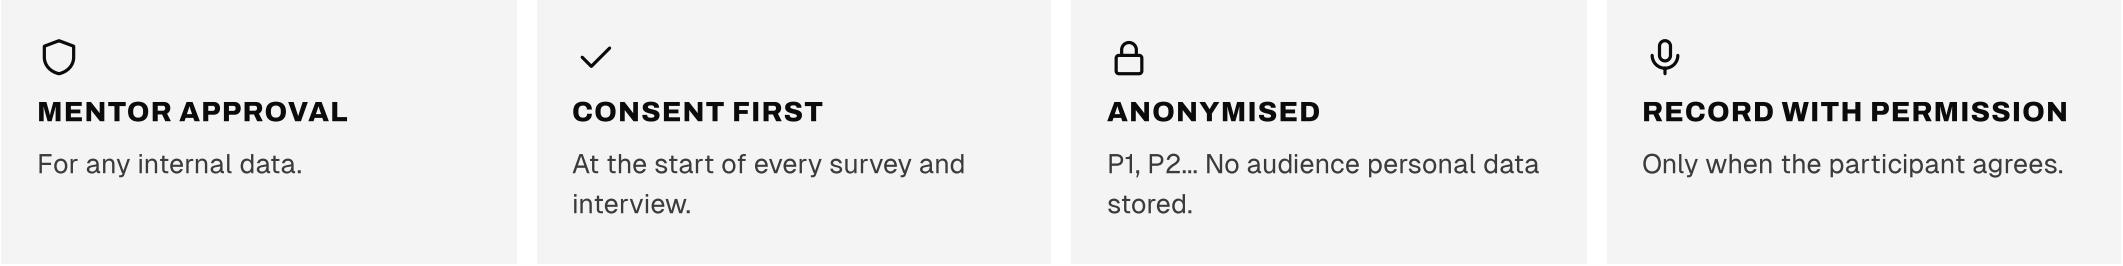

Brand consistency is a top concern for premium brands.

INTERVIEWS

9.3 METHODS & SAMPLE

9.4 ETHICS

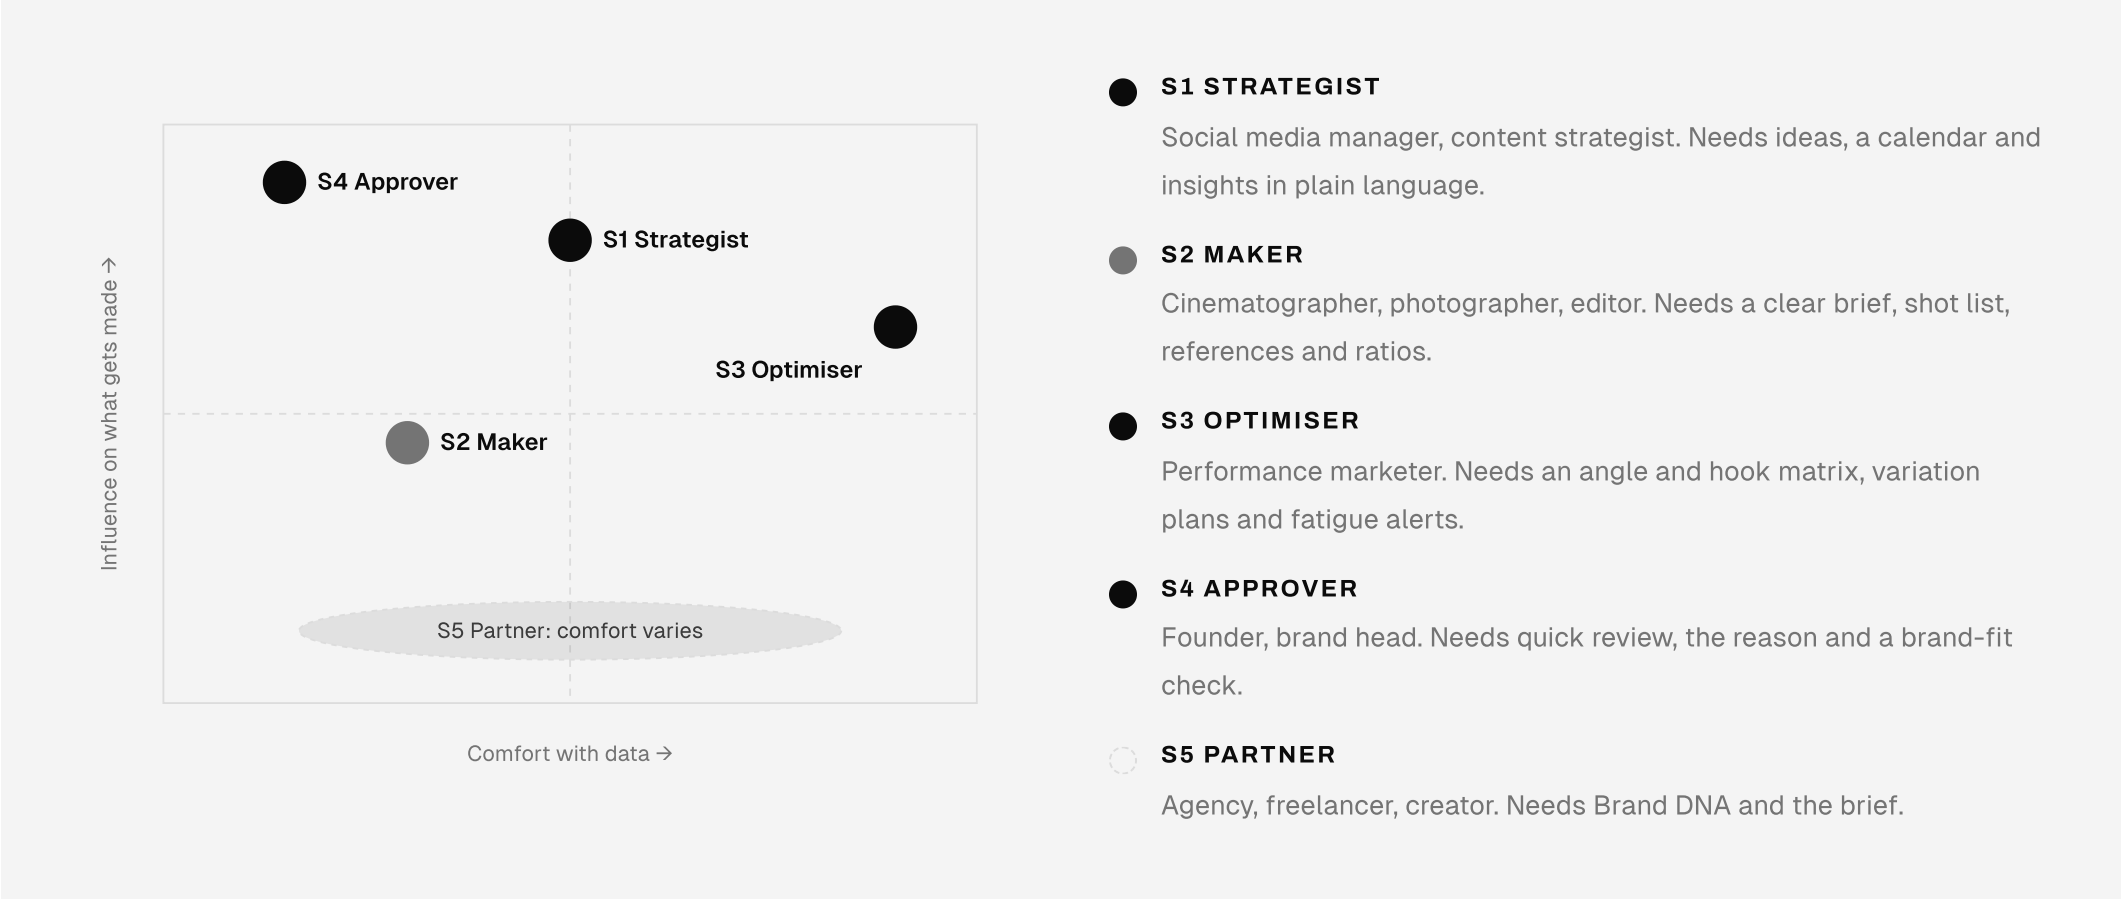

10. USER STUDY: USER BASE & USER SEGMENTATION

10.1 USER BASE

Internal users (product users): people who create or decide on content at drop-led fashion brands.

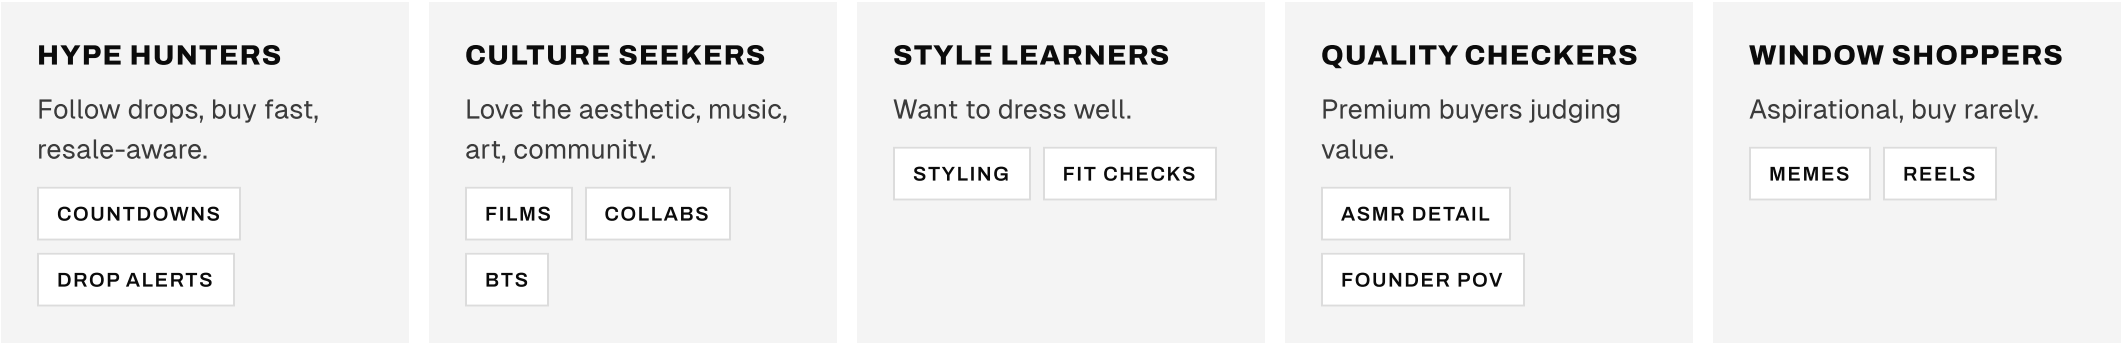

10.2 SEGMENTATION

INTERNAL SEGMENTS

PLACED FROM THE SEGMENTATION TABLE, QUALITATIVE

AUDIENCE SEGMENTS, USED FOR THE CONTENT TAXONOMY

11. RESEARCH INSTRUMENTS

SURVEY A, PRACTITIONERS 22 questions 10 minutes. 5 sections: about you, deciding content, organic and paid, briefs, pain and wishes.	SURVEY B, AUDIENCE 14 questions 5 to 7 minutes. Discovery, what people watch, save, share and buy from.	INTERVIEW GUIDE 10 prompts 30 to 45 minutes, plus a founder variant.
FOCUS GROUP 5 activities 60 minutes, including a 15-post card sort.	SHADOWING LOG 8 fields Day, time, activity, people, tools, time spent, pain, quote.	CONTENT AUDIT SHEET 14 fields Format, series, hook, emotion, goal, reach, saves, shares, CTR, CPA and more.

11.1 SURVEY A: PRACTITIONERS (GOOGLE FORM)

Intro: "I'm a design student researching how fashion brands decide what content to create. 10 minutes, anonymous."

Section 1: About you

1. Your role? *(Social media manager / Content strategist / Cinematographer-photographer / Editor / Performance marketer / Founder / Agency / Other)*
2. Brand type? *(Streetwear / Premium fashion / Mass fashion / Other D2C)*
3. Team size? *(1–3 / 4–10 / 11–25 / 25+)*
4. Years of experience? *(<1 / 1–3 / 3–5 / 5+)*

Section 2: How you decide content

5. How do you mainly decide what content to make? *(multi-select: Gut/experience, Trends/audio, Competitors, Past performance data, Founder/manager decides, Agency suggests, Audience comments/DMs)*
6. How often do you look at content performance data? *(Daily / Weekly / Monthly / Rarely / Never)*
7. When you look at data, do you use it to plan the next content? *(Always / Often / Sometimes / Rarely / Never)*
8. Which tools do you use? *(IG Insights, Meta Ads Manager, Meta Business Suite, Later/Hootsuite/Sprout, Notion, Google Sheets, WhatsApp, ChatGPT, Motion/Foreplay, Other)*
9. Rate (1–5): "I know clearly which *type* of content works best for our brand."
10. Rate (1–5): "Coming up with fresh content ideas every week is hard."

Section 3: Organic ↔ paid

11. How often are your best organic posts turned into ads? *(Always ... Never)*
12. Rate (1–5): "Organic and paid teams plan content together."
13. *(Perf. marketers)* How many new ad creatives do you test per month? *(0–2 / 3–5 / 6–10 / 10+)*
14. *(Perf. marketers)* Rate (1–5): "I get enough creative variations to test."
15. How do you notice an ad is fatigued? *(open)*

Section 4: Brief & production

16. How are content briefs usually shared? *(Verbal, WhatsApp, Doc/Notion, Deck, No brief)*
17. How often do vague briefs cause re-shoots or re-edits? *(Very often ... Never)*
18. Rate (1–5): "Drop weeks are stressful for content."

Section 5: Pain & wishes

19. Rank your top 3 problems: *(Idea block, Not knowing what works, Too little time, Too few ad variations, Unclear briefs, Approval delays, Staying on-brand, Reporting takes time)*
20. Would you trust content suggestions from an AI tool? *(Yes / Only if it explains why / Only as inspiration / No)*
21. What must such a tool NEVER do? *(open)*
22. If you had a magic content assistant, what's the first thing it would do for you? *(open)*

11.2 SURVEY B: AUDIENCE

SURVEY B / QUESTION 6 OF 14

CONTENT YOU WATCH FULLY

43%

Which content from fashion brands do you watch till the end?

☒

☐ No brief

HOW THE FORMS LOOK ON A PHONE

SELECTIONS SHOWN ARE ILLUSTRATIVE

1. Age, 2. City, 3. Do you follow BLUORNG?, 4. Have you bought from BLUORNG? *(Yes / Planning to / No)*
2. Where do you **discover** new streetwear brands? *(IG Reels, IG Explore, Friends, Creators, Ads, Stores, Reddit/Discord, Other)*
3. Which content from fashion brands do you **watch fully**? *(multi: Drop teasers, Lookbooks, BTS/studio, ASMR/fabric close-ups, Styling guides, Fit checks/street style, Memes/culture, Collabs, Founder stories, Interactive stories)*
4. Which do you **save or share**? *(same list)*
5. Which content made you **buy** (or want to)? *(same list + open)*
6. Rate (1–5): "Brand ads on Instagram annoy me."
7. Which ads make you stop scrolling? *(Creator wearing it, Close-up details, Drop countdown, Store/queue hype, Model lookbook, Price/offer)*
8. How often should a streetwear brand post? *(Daily, 3–5/week, 1–2/week)*
9. Do you take part in polls/quizzes in brand stories? *(Often, Sometimes, Never)*
10. One thing you'd love BLUORNG to post more of? *(open)*
11. One thing you'd want them to stop? *(open)*

11.3 INTERVIEW GUIDE (TEAM / PRACTITIONERS): 30–45 MIN

1. **Warm-up:** Walk me through your role and a normal week.
2. **Last piece of content:** Tell me about the last Reel/ad you worked on. Where did the idea come from? Who decided? What happened after?
3. **Data:** What numbers do you check? Show me (screen-share). What do you do with them?
4. **Wins & losses:** Tell me about a post/ad that did really well. Why do you think it did? Did you make more like it? And one that flopped?
5. **Organic ↔ paid:** How does content move from Instagram to ads (or the reverse)?
6. **Briefs:** Show me a recent brief. What's usually missing?
7. **Drops:** Walk me through the last drop week, day by day.
8. **Brand:** How do you know something is "BLUORNG" or "not BLUORNG"?
9. **AI/tools:** Have you used ChatGPT or any tool for ideas? What was good or bad?
10. **Magic wand:** If one part of this process could be fixed, which?

Founder variant: Add "What makes you approve or reject a content idea?" and "How do you judge if content is working: sales, buzz, or feel?"

11.4 FOCUS GROUP GUIDE (AUDIENCE): 60 MIN

1. Ice-breaker: Your favourite streetwear brand on IG and why.
2. **Card sort:** Show 15 printed BLUORNG and peer-brand posts/ads → group them into "would watch / save / share / buy / skip".
3. Discuss: What makes a brand post feel premium vs cheap? Ad vs content?
4. Show 3 ad styles (studio lookbook vs creator UGC vs ASMR detail) and discuss reactions.
5. Co-create: "Design BLUORNG's next IG series."

11.5 ETHNOGRAPHY / SHADOWING LOG (TEMPLATE)

DAY	TIME	ACTIVITY	PEOPLE	TOOLS USED	TIME SPENT	PAIN / WORKAROUND OBSERVED	QUOTE
Mon		Drop planning meeting					
Tue		Shoot day					
...							

11.6 CONTENT AUDIT SHEET (TEMPLATE)

POST ID	DATE	FORMAT (REEL/CAROUSEL/STATIC/STORY/AD)	IP/SERIES	HOOK (FIRST 3 S)	EMOTION	GOAL	REACH

11.7 PILOT TEST (SAMPLE TEST OF THE QUESTIONNAIRE)

- Run both surveys with **3–5 people** before launch (e.g. 2 BLUORNG teammates + 2 peers + 1 audience member).
- Track: time to complete, confusing questions, missing options, drop-off.
- Record a change log:

Q#	PROBLEM FOUND IN PILOT	CHANGE MADE
e.g. Q5	"Trends" was unclear (audio vs fashion trends)	Split into "Trending audio/memes" and "Fashion trends"

12. PRIMARY RESEARCH REPORT

12.1 PARTICIPANTS (FILL IN)

AD COST BY ANGLE
Audit / H8

12.3 FINDINGS TABLE (FILL IN WITH YOUR REAL NUMBERS)

HYPOTHESIS	EVIDENCE (NUMBERS + QUOTE)	RESULT
H1 Intuition-led	☐ % chose gut/trends vs ☐ % past data. Quote: "..."	Yes / No / partial

HYPOTHESIS	EVIDENCE (NUMBERS + QUOTE)	RESULT
H2 Data not used to plan	☐ % check weekly, ☐ % use it to plan	
H3 Organic→ads rare	☐ % "rarely/never"	
H4 Too few variations	avg ☐ /5	
H5 Brief re-shoots	☐ % "often/sometimes"	
H6 Drop-week stress	avg ☐ /5	
H7 BTS/ASMR/styling > product	audit: ☐ × saves vs product posts	
H8 UGC > polished ads	☐ % picked creator ads	
H9 Explainable AI	☐ % "only if it explains why"	
H10 Brand consistency	☐ mentions in interviews	

12.4 QUALITATIVE ANALYSIS METHOD

1. Transcribe interviews → pull **quotes on sticky notes** (Miro/FigJam).
2. **Affinity map** into themes (use the clusters A–H in Part 3 as a starting frame and add new ones).
3. Count frequency (how many participants mention each theme) → **priority**.
4. Turn each theme into an **insight statement**: "*[User] needs [need] because [insight].*"

12.5 EXPECTED INSIGHT STATEMENTS (VALIDATE OR REWRITE WITH YOUR DATA)

1. **"Data without direction."** The team sees numbers, but nobody turns them into "make more of X, less of Y".
2. **"The idea treadmill."** A drop-led brand needs constant novelty, and idea block peaks right before drops.
3. **"Two teams, one feed."** Organic and paid share the same audience but not the same plan.
4. **"Same shoot, same ads."** Ad variations are limited by what was shot, so planning ad angles *before* the shoot is the real fix.
5. **"Brief is a WhatsApp voice note."** Makers lose time to unclear briefs and re-edits.
6. **"Protect the cool."** Any suggestion that feels mass, salesy or trend-chasing will be rejected.
7. **"Show me why."** Trust in AI depends on explanation, examples from the brand's own past, and the ability to edit.

12.6 PRIORITY AREAS OF CONCERN (SHORTLIST)

1	KNOWING WHAT WORKS, BY TYPE Root cause of everything else	→	Auto-tagging and "why it worked" insights
2	IDEAS FOR ORGANIC SERIES The most frequent pain	→	Series recommender and idea bank
3	AD VARIETY AND FATIGUE Direct money impact	→	Angle and hook matrix, fatigue alerts
4	ORGANIC TO PAID BRIDGE Quick win	→	"Promote this winner" and a shared calendar
5	BRIEFS Saves the makers' time	→	One-click brief with shot list
6	BRAND GUARDRAILS Condition for adoption	→	Brand DNA and brand-fit score

13. RESEARCH ANALYSIS & INFERENCES

13.1 IMMERSION INTO THE RESEARCH

- **Insider access as a strength:** I work inside BLUORNG's content team, so I can shadow real planning meetings, shoots and ad launches. My inside role is also a **bias risk**. I control for it with external practitioner interviews, the audience survey, and by separating *observation* from *interpretation* in my shadowing log.
- **Data access:** with mentor approval, export IG Insights and Meta Ads data (indexed) for the content audit.

13.2 DEFINING (REDEFINING) THE PROBLEM

ORIGINAL BRIEF

A platform to help BLUORNG know what content to make for organic and Meta ads.

→

REDEFINED BRIEF, UPDATE WITH EVIDENCE

Design BLUPRINT, a decision and ideation tool for small, drop-led fashion content teams. It (1) learns which types of content work from the brand's own organic and paid data, (2) turns that into on-brand suggestions for Instagram series and Meta ad angles, and (3) turns chosen ideas into shootable briefs planned around the drop calendar, so one shoot feeds both organic and paid.

SUGGEST CONTENT → INSIGHT, IDEA, BRIEF, SHOOT

+ BRAND GUARDRAILS

+ EXPLAINABILITY

13.3 ELABORATED SCOPE OF DESIGN

End goal: a tested hi-fi prototype of BLUPRINT (web dashboard + mobile companion) and a design system.

Modules in scope:

- 1. **Pulse (Insights):** what worked and why, by content type.
- 2. **Ideas (Recommendations):** organic IPs & formats, paid angles & hooks.
- 3. **Briefs:** auto-generated shot lists, references, ratios, captions.
- 4. **Plan (Drop calendar):** organic + paid on one timeline.
- 5. **Brand DNA:** guardrails, tone, do's & don'ts.

User segments who benefit and can afford it: BLUORNG's in-house team (sponsor), then other Indian premium D2C fashion brands with 5–50 person teams that spend on Meta ads. They already pay for tools like Later or Motion, so a focused SaaS tier is realistic.

How we proceed: research findings → personas → problem statement → design goals → ideation → 3 concepts → final concept → IA → wireframes → UI → prototype → testing.

13.4 ENVIRONMENT & CONTEXT

STUDIO AND OFFICE

PLAN AND ANALYSE

Laptop. Weekly planning, monthly reviews, brief writing.

SHOOTS AND STORES

CAPTURE AND EXECUTE

Phone, on the go, with patchy network on set.

FOUNDER, ANYWHERE

REVIEW AND APPROVE

Phone, in short bursts between other work.

WHO BENEFITS MOST

CONTENT TEAM: TIME

MARKETER: COST PER SALE

FOUNDERS: CONTROL

MAKERS: CLARITY

AUDIENCE: BETTER POSTS

13.5 FACTORS & CONSTRAINTS → FINE-TUNED BRIEF

FACTOR	CONSTRAINT	DESIGN IMPLICATION
Technology	AI needs enough tagged data; cold start	Manual tagging + templates at start; learning improves over time
Business	Must show ROI quickly	"Quick wins" view (promote organic winners)
Brand	Premium, "cool", never desperate	Brand-fit score; no discount-style suggestions by default
People	Creative team resists "algorithm telling us what to do"	AI as co-pilot: suggest, explain, let humans decide
Time	Drop weeks are chaotic	Mobile, fast, glanceable
Ethics	Creator/model rights, data privacy	Usage-rights field in briefs; no audience PII

Sectors needing immediate attention before ideation: (1) a shared **content taxonomy**, (2) the **insight** → **idea** link, (3) the **organic** ↔ **paid** bridge.

PEOPLE AND PROBLEM

5 STAGES

Who we design for, how their week feels today, and the problem in one sentence.

- PERSONAS
- EMPATHY MAPS
- JOURNEY MAP
- PROBLEM STATEMENT
- DESIGN GOALS

These are **proto-personas** built from secondary research and in-house observation. After your interviews and surveys, update the quotes, numbers and frustrations with real data so they become **data-backed personas**.

14. PERSONAS

RM

RIA MALHOTRA, 26

Social media manager. 4 years, 2 at an agency.

PRIMARY

"I don't need more data. I need someone to tell me what the data means for next week."

GOALS

- Keep the feed fresh and on-brand
- Grow reach and saves
- Make every drop feel like an event

FRUSTRATIONS

- Can't tell why a Reel worked
- Idea block right before drops
- Builds reports by hand
- Founder feedback arrives late

IG INSIGHTS

NOTION

WHATSAPP

PINTEREST

CAPCUT

DATA COMFORT

AM

ARJUN MEHTA, 29

Performance marketer, Meta ads. 6 years across D2C brands.

PRIMARY

"Creative is my targeting now, and I'm always out of creative."

GOALS

- Hit return targets on drops
- Keep cost per sale stable
- Test 10+ creatives a month

FRUSTRATIONS

- Three edits from one shoot, all alike
- Notices fatigue too late
- Has to chase creator content

ADS MANAGER

SHEETS

SHOPIFY

ADS LIBRARY

DATA COMFORT

KS

KABIR SINGH, 24

Cinematographer and editor.

SECONDARY

"Tell me the story and the hook before I pick up the camera, not after the edit."

GOALS

- Shoot beautiful, purposeful content
- Avoid re-shoots
- Grow his craft

FRUSTRATIONS

- Briefs arrive as voice notes
- Finds out about 9:16 and 4:5 after the shoot
- Last-minute add-ons

CAMERA

PREMIERE

DAVINCI

DRIVE

DATA COMFORT

SK

SIDDHARTH K., 30

Co-founder and brand head. Approves content.

APPROVER

"If it looks like every other brand, it's not us. I don't care how many views it gets."

GOALS

- Protect the premium, cultural image
- Grow sales and recall

FRUSTRATIONS

- Too many approval pings
- Can't see the bigger picture
- Fears the brand looking mass-market

WHATSAPP

INSTAGRAM

DATA COMFORT

15. EMPATHY MAPS

RM

RIA

The strategist

SAYS "What's trending this week?" "That Reel did 3x reach, let's do more like that?"	THINKS "Am I just guessing?" "Will the founders like this?"
DOES Scrolls competitors, saves audio, keeps ideas in Notes, pastes Insights screenshots into decks.	FEELS Pressure before drops, creative burnout, proud when a post takes off.
PAINS No link between data and ideas. Manual reports.	GAINS Confidence. Repeatable wins. Time to be creative.

AM

ARJUN

The optimiser

SAYS "Need 5 new hooks by Thursday." "Frequency is 4.2, we're burning out."	THINKS "The organic team had a great Reel and nobody told me."
DOES Duplicates ad sets, swaps headlines, logs tests in Sheets.	FEELS Stuck waiting on creative. Stressed on launch days.
PAINS Few variations. Late fatigue alerts. Silos.	GAINS Steady cost per sale. A planned test pipeline.

KS

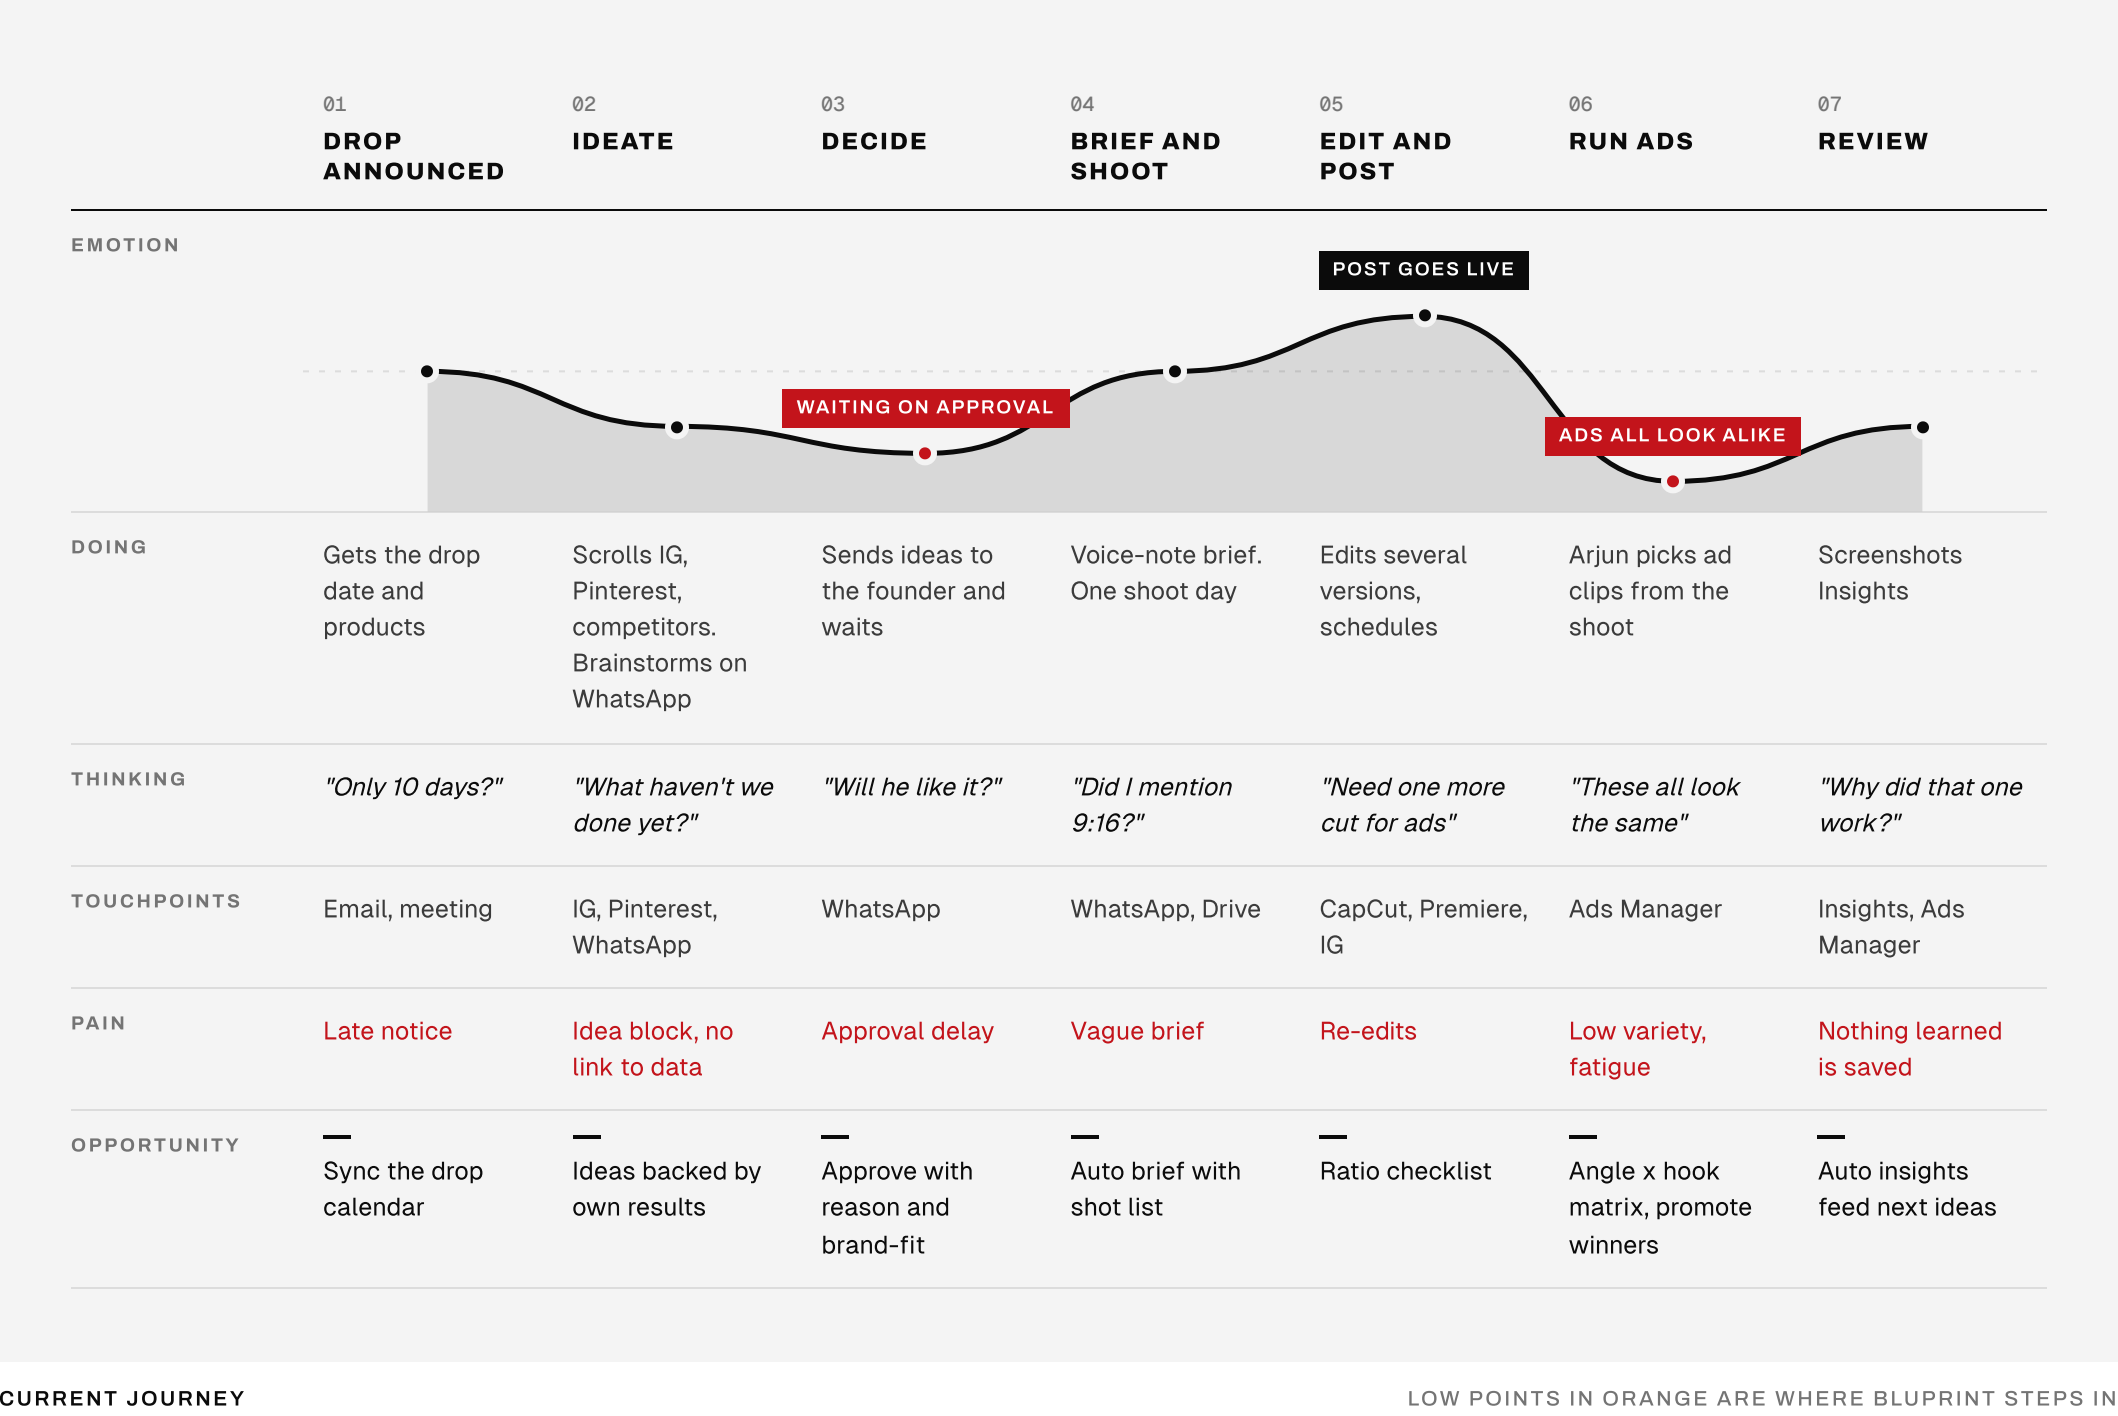

KABIR

The maker

SAYS "What's the ratio?" "Can I get references?"	THINKS "This shot would make a great ASMR ad, but nobody asked."
DOES Shoots extra coverage just in case, then re-edits.	FEELS Undervalued when plans change. Energised by a clear brief.
PAINS Vague briefs. Re-shoots.	GAINS A clear shot list. Creative ownership.

16. USER JOURNEY MAP: "PLANNING CONTENT FOR A NEW DROP" (RIA + ARJUN, AS-IS)

Ria and Arjun planning content for a new drop, as it works today.

17. PROBLEM STATEMENT

PROBLEM STATEMENT

Content teams at drop-led fashion brands like BLUORNG lack a connected, brand-aware system that turns their own organic and paid results into clear, explainable ideas and shootable briefs. The result: guesswork content, repetitive ads, wasted production and spend, and little learning between drops.

HOW MIGHT WE...

HMW 1 Help the team see why content worked, by type, not just by number?	HMW 2 Turn insights into fresh, on-brand ideas for Instagram series?	HMW 3 Help performance marketers plan diverse ad angles before the shoot?
HMW 4 Make one shoot feed both organic and paid?	HMW 5 Make briefs so clear that makers never need a re-shoot?	HMW 6 Keep AI suggestions on-brand and trustworthy?

18. DEFINED DESIGN GOALS

G1 MAKE PERFORMANCE MEANINGFUL < 1 min To name the top series and why it works.	G2 RECOMMEND, DON'T DICTATE 80% Of testers understand why an idea was suggested.	G3 BRIDGE ORGANIC AND PAID 3 → 10 Ad variations planned per shoot.
G4 BRIEF IN ONE CLICK < 5 min To create a brief. Makers rate clarity 4/5 or higher.	G5 PROTECT THE BRAND 70% Of suggestions approved without major edits.	G6 PLAN AROUND DROPS 2+ wks Drop plan visible ahead of time.
G7 LEARN CONTINUOUSLY Linked Every idea shows the insight behind it.	G8 FIT THE CONTEXT Mobile Key tasks work on a phone.	G9 ACCESSIBLE AA WCAG 2.2 contrast and touch targets.

IDEAS TO DIRECTION

19.2 BRAINWRITING (6-3-5)

METHOD 6-3-5

90

6 people x 3 ideas x 5 rounds, each round building on the last.

THREE IDEA CHAINS

ROUND 1

Show which Reels worked

ROUND 2

Tag them by series to compare series

ROUND 3

Suggest the next episode of the winner

ROUND 1

Ad fatigue warning

ROUND 2

Suggest a replacement from organic winners

ROUND 3

Auto-brief to shoot new hooks

ROUND 1

Better briefs

ROUND 2

Brief generated from the chosen idea

ROUND 3

Mobile on-set checklist with ratios

19.3 SCAMPER (APPLIED TO THE CURRENT WORKFLOW AND EXISTING TOOLS)

S

SUBSTITUTE

WhatsApp briefs become structured mobile brief cards.

C

COMBINE

Insights, Ads Manager and calendar become one Pulse board.

A

ADAPT

Spotify's Discover Weekly becomes "Ideas Weekly" every Monday.

M

MAGNIFY

The hook: a hook library with hook-level results.

P

PUT TO OTHER USE

Organic Reels become ads through "Promote winner".

E

ELIMINATE

Manual reporting, replaced by an automatic digest.

R

REVERSE

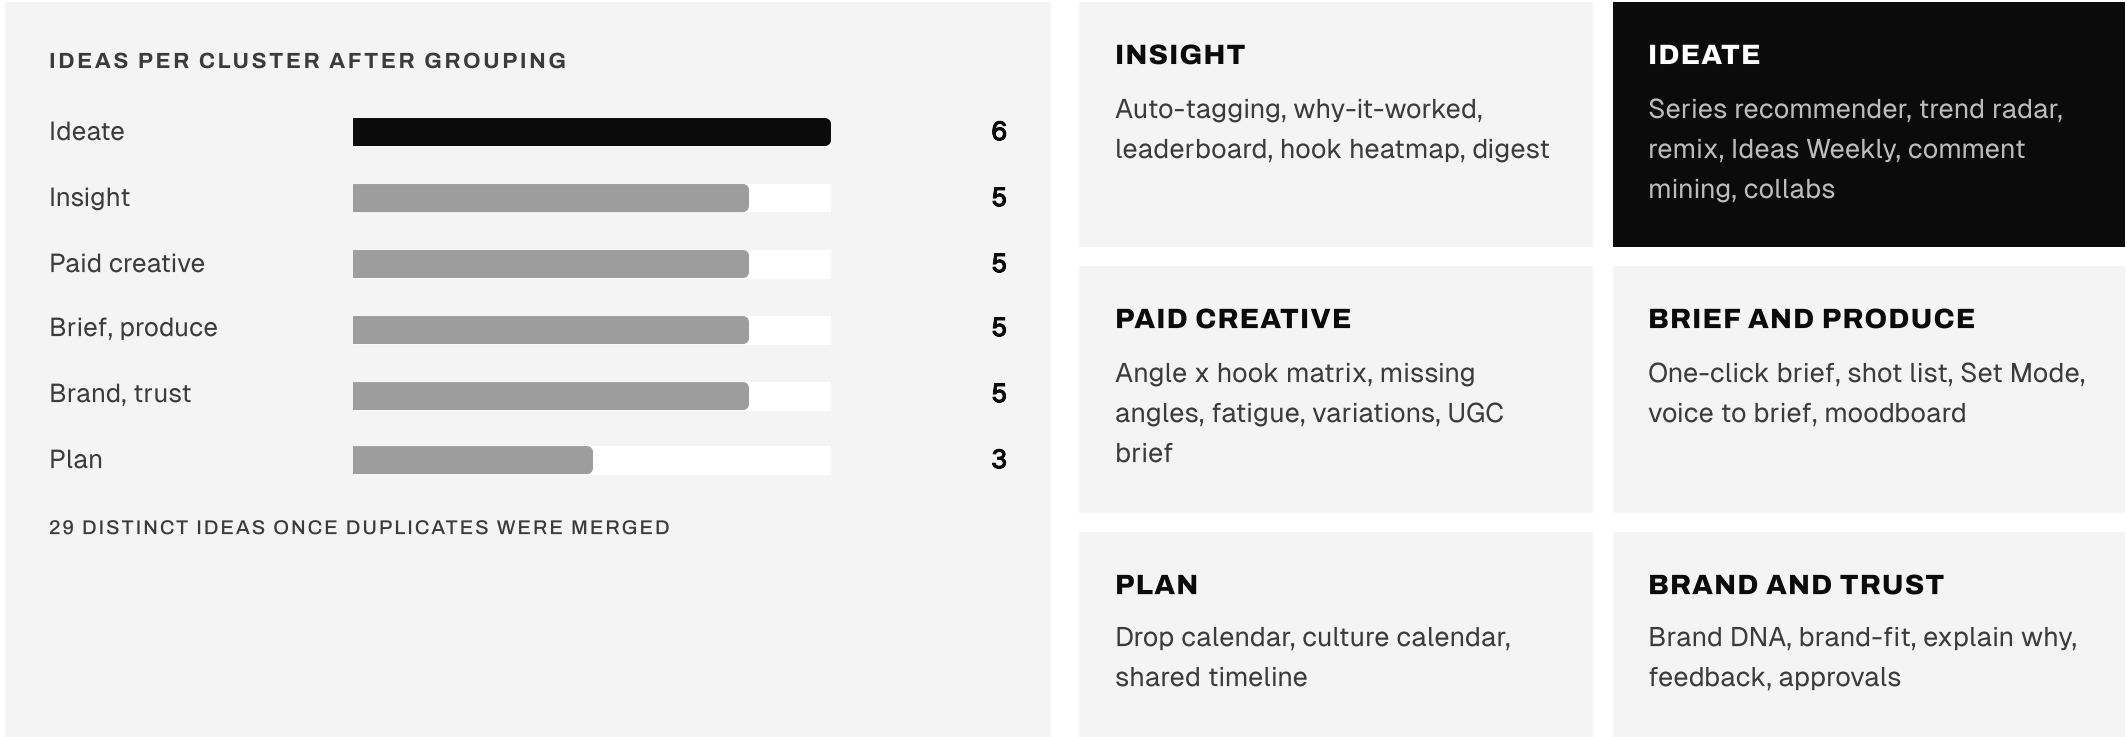

Plan ads before the shoot instead of after it.

RESULT

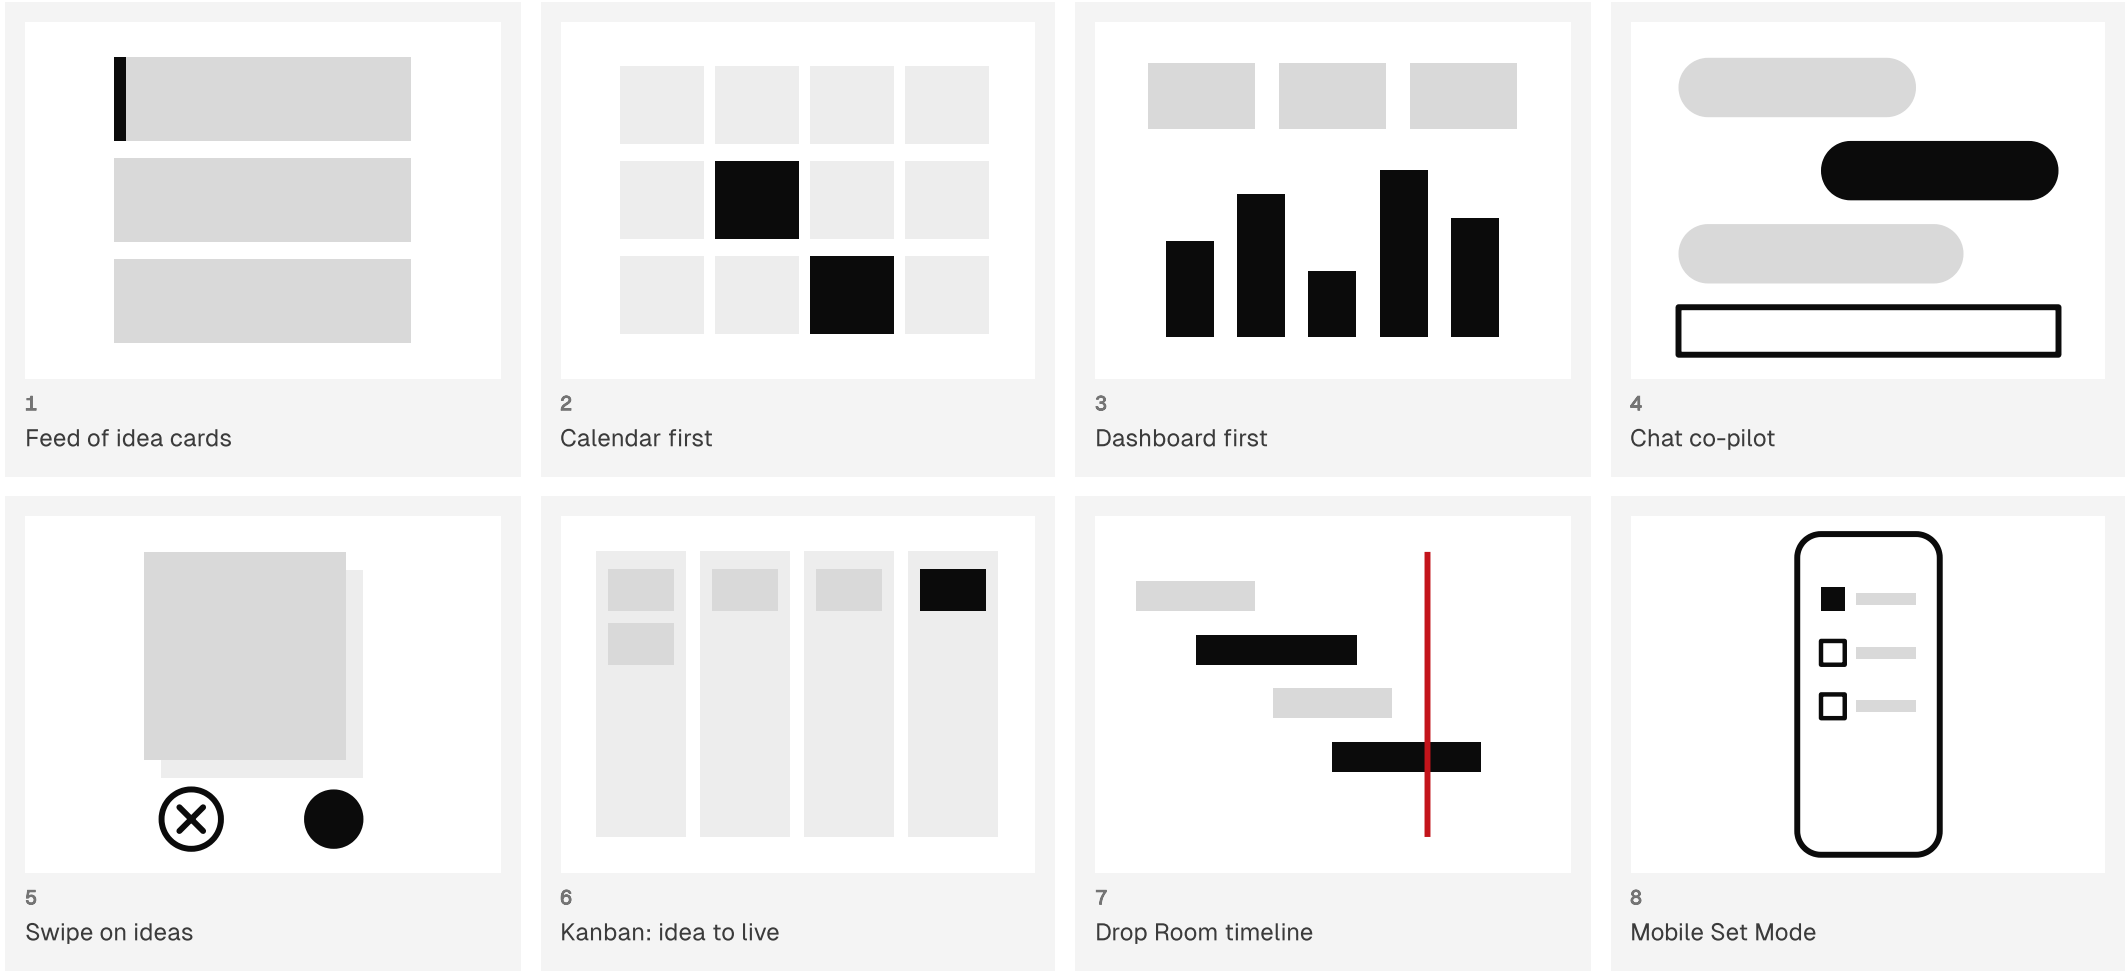

7

New ideas added to the pool.

19.4 SPACE SATURATION & GROUP (AFFINITY OF ALL IDEAS)

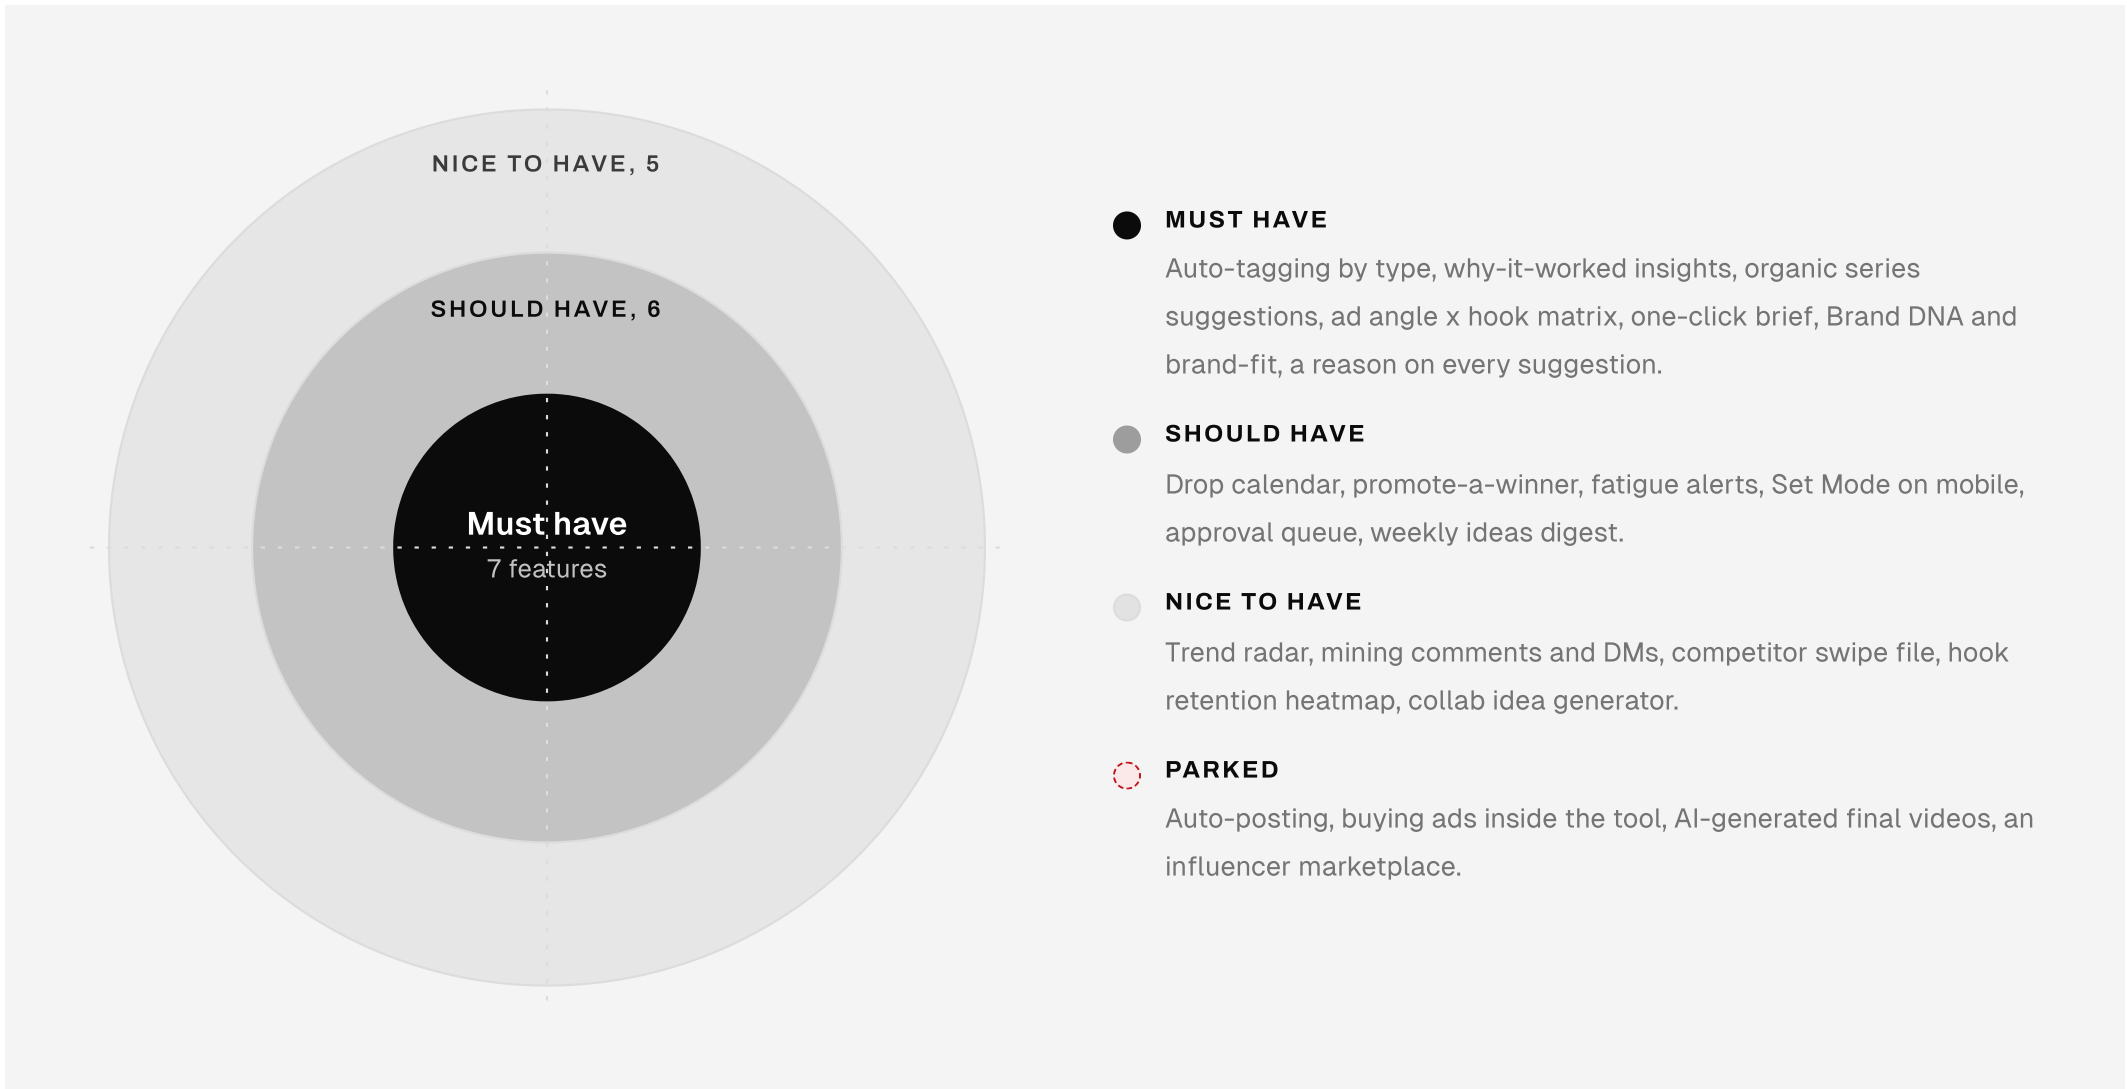

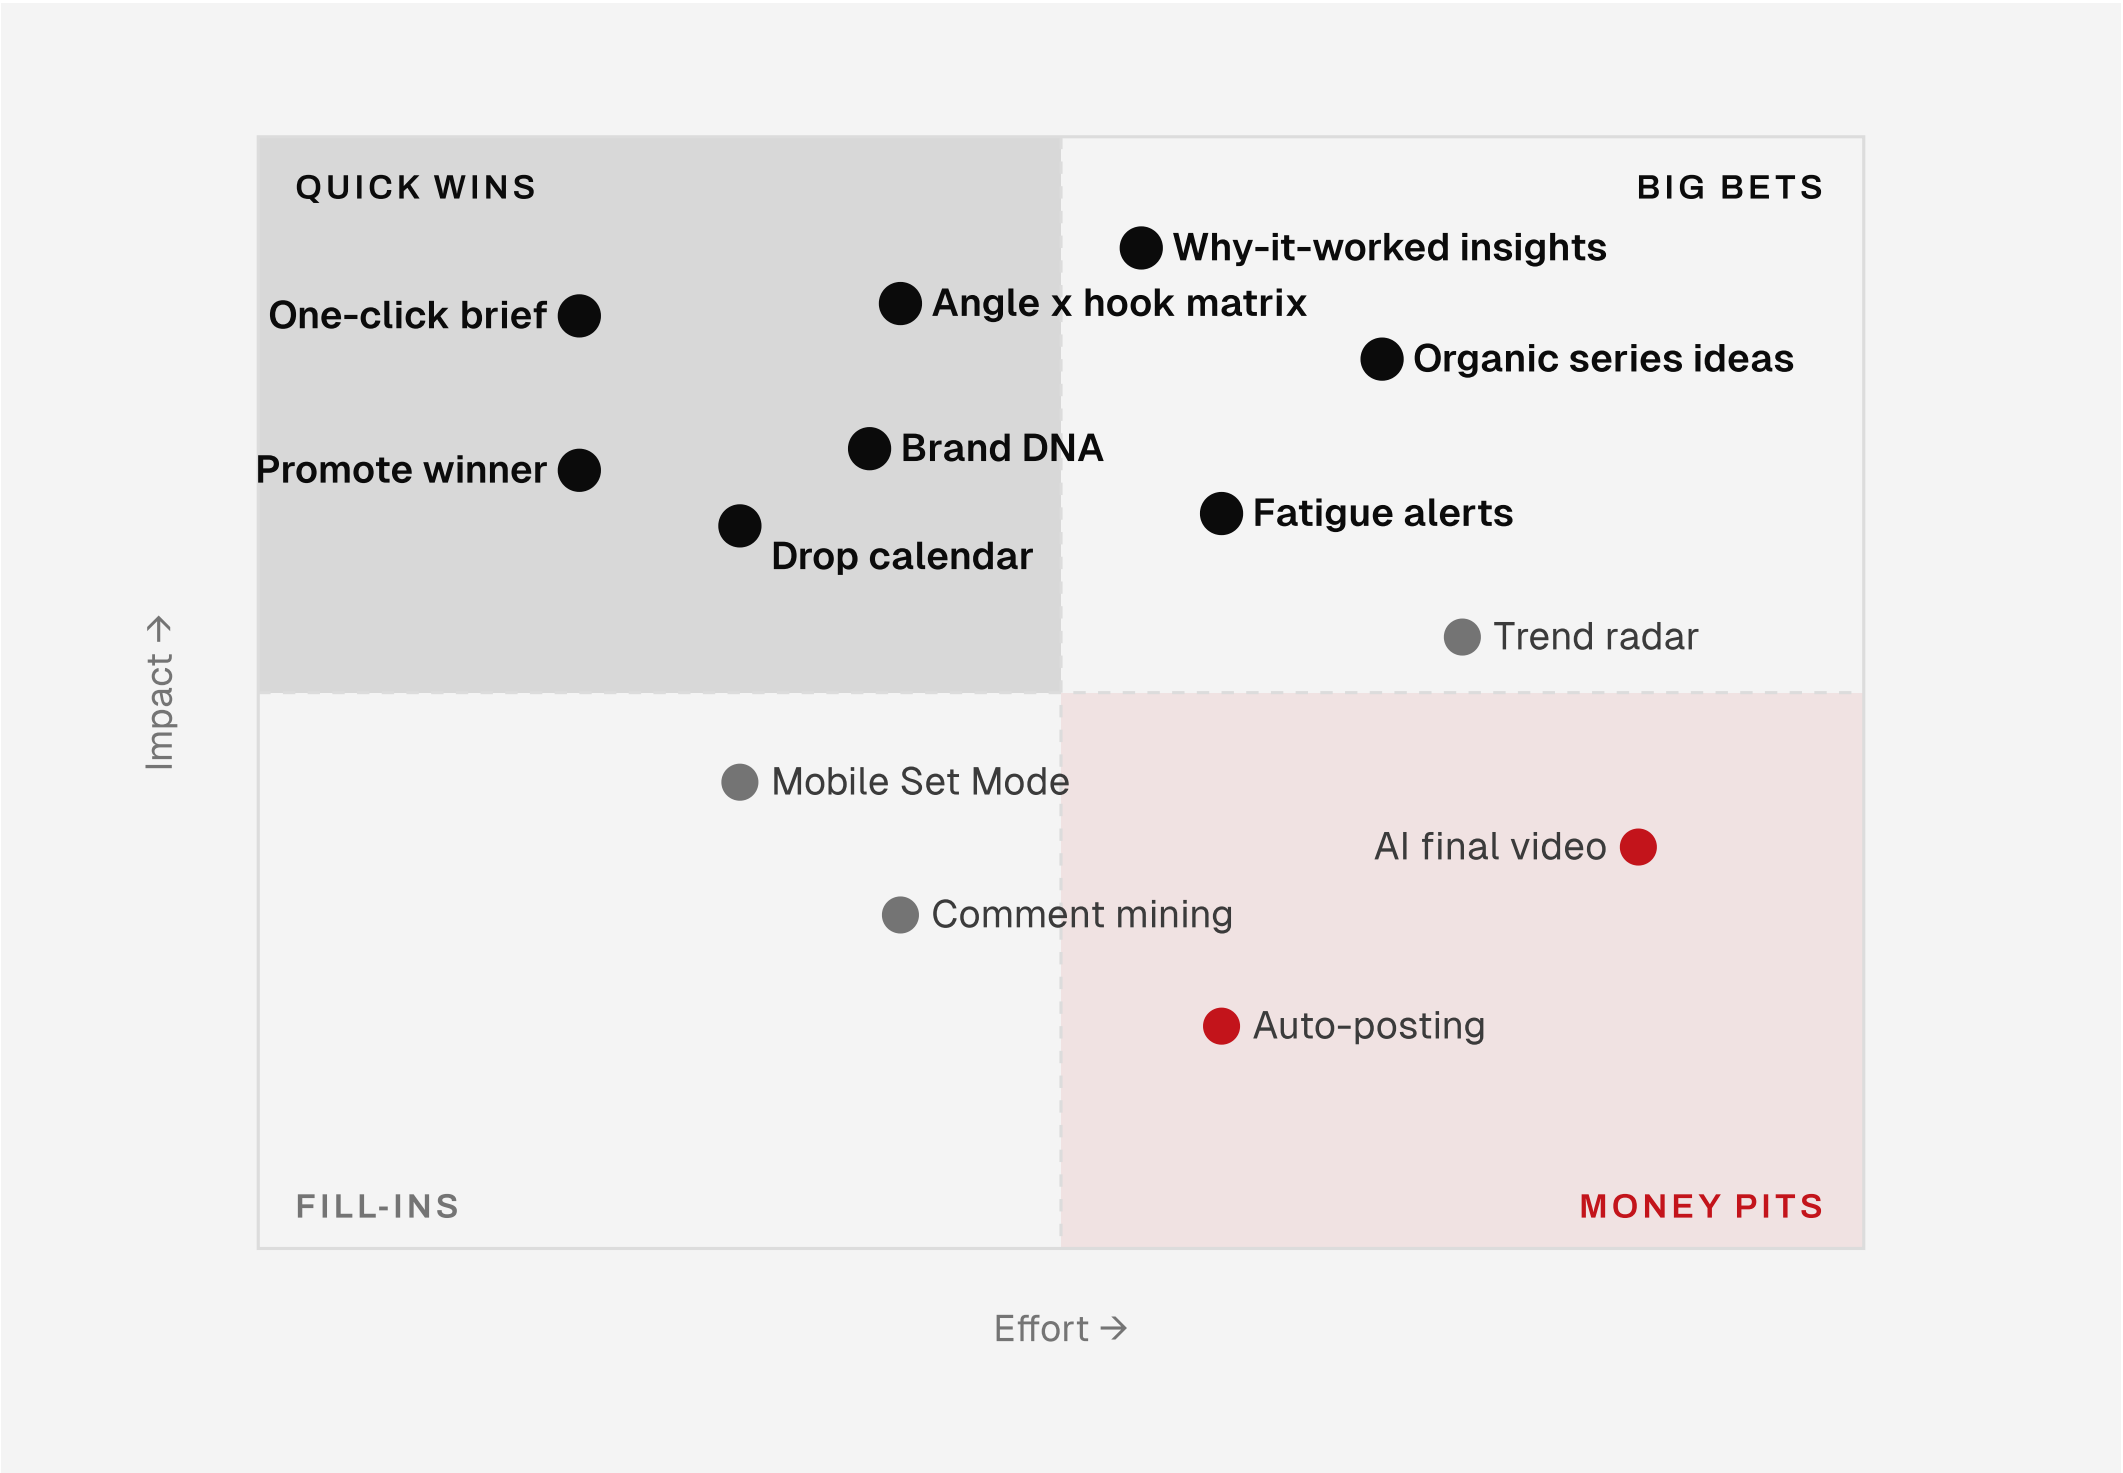

19.5 CRAZY 8S (RAPID SKETCHES)

20. IDEATION FILTRATION

20.1 BULLSEYE DIAGRAM

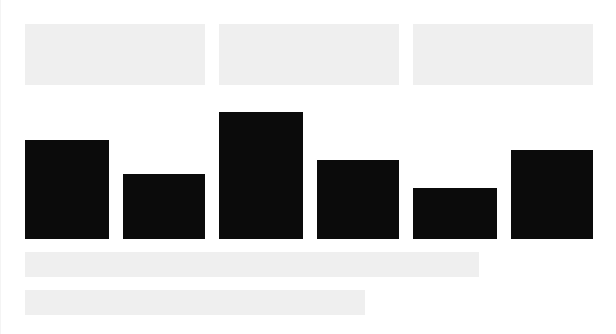

PRIORITY MATRIX

QUICK WINS SHIP IN THE FIRST RELEASE, BIG BETS FOLLOW

21. THREE CONCEPTS

Three directions, each sketched as a home screen and scored against the research needs and feasibility.

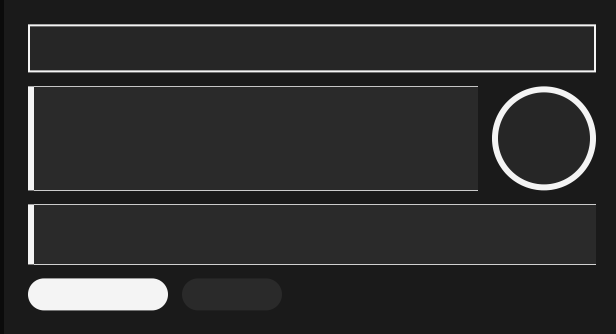

CONCEPT A

PULSE

An insight-first dashboard that pulls Instagram, Meta and Shopify data and ranks recommendations.

- + Strong data base, great for the marketer and founders
- + APIs already exist
- Doesn't help write ideas or briefs
- Risks becoming a dashboard nobody opens

3.35 / 5

CONCEPT B

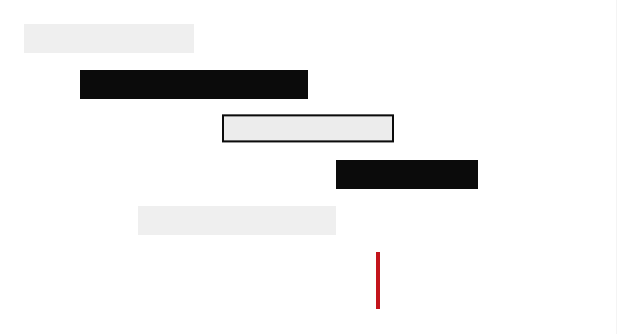

STUDIO

An ideation co-pilot. Pick a goal and get on-brand ideas for series and ad angles, each with a hook, a reason and a one-click brief.

- + Solves idea block, writes briefs
- + Loved by the strategist and the maker
- Generic without real results behind it
- Trust depends on clear reasons

CORE OF THE FINAL CONCEPT

4.05 / 5

CONCEPT C

DROP ROOM

A calendar-first command centre. Each drop gets a room with a timeline, the organic plan, ad variations, shoot plan and approvals.

- + Matches how BLUORNG actually works
- + Joins organic and paid
- Weak on why and on new ideas
- Overlaps with Notion

3.60 / 5

21.1 CONCEPT EVALUATION MATRIX (SCORE 1–5, WEIGHTED)

CRITERION	WEIGHT	A. PULSE	B. STUDIO	C. DROP ROOM
Solves "what to make"	25%	3	5	2
Uses the brand's own data	15%	5	3	2
Organic and paid bridge	15%	3	4	5
Brief and production help	10%	1	5	4
Brand safety and trust	10%	4	3	4
Fits workflow, adoption	10%	2	4	5
Technical feasibility	10%	5	4	5
Cost and time to build	5%	4	3	5
Weighted total	100%	3.35	4.05	3.60

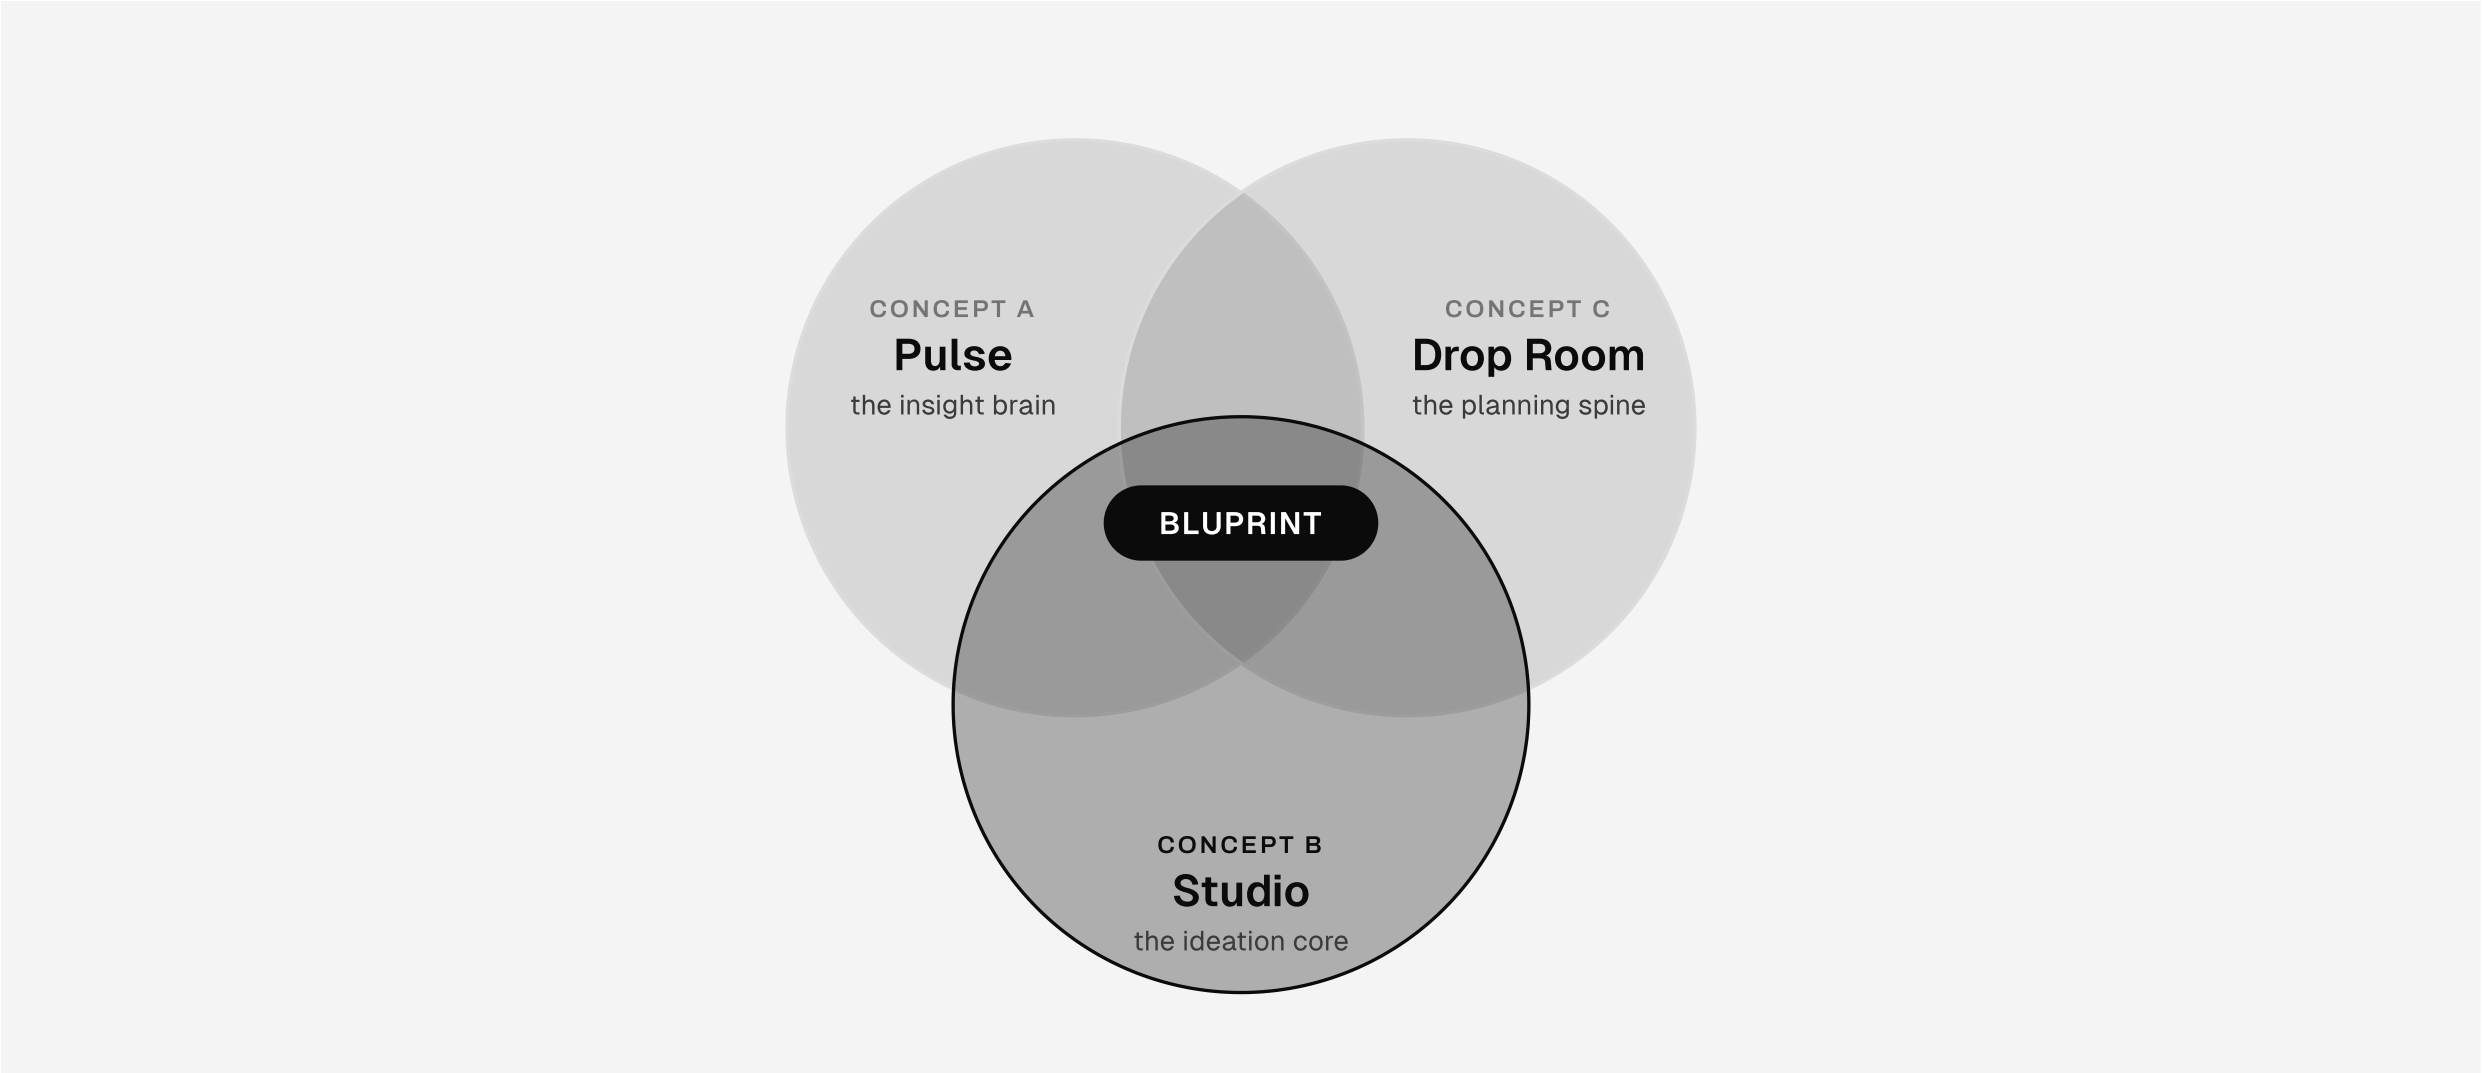

WEIGHTED SCORE OUT OF 5

DRAFT SCORES, RE-SCORE WITH MENTORS

RESULT

Studio leads on solving "what to make". Pulse and Drop Room each win on data and workflow, so the final concept combines all three.

22. Final Concept: BLUPRINT = Studio core + Pulse brain + Drop Room spine

FINAL DIRECTION

STUDIO EXPERIENCE, POWERED BY PULSE, ORGANISED BY DROP

Selected direction: Concept B (Studio) as the core experience, powered by A's insight engine (so ideas come from real data, not generic AI) and organised on C's drop timeline (so it fits how BLUORNG works).

22.1 Justification

1. **Against research needs:** It addresses the top 3 priority areas (knowing what works → Pulse; ideation → Studio; organic ↔ paid → Drop Room) and the adoption conditions (explainable, brand-safe, editable).
2. **Against viability:** - *Technology:* Instagram Graph API and Meta Marketing API provide post and ad metrics. LLMs can produce ideas and briefs. Tagging can start manually or semi-automatically. - *Cost/time:* An MVP can be built as a web app on existing APIs. No custom hardware. - *Process:* It fits the existing weekly planning and drop cycle; it doesn't replace people. - *Modularity:* Modules (Pulse, Ideas, Briefs, Plan, Brand DNA) can ship one at a time. - *Accessibility:* WCAG 2.2 AA, mobile companion for on-set use.
3. **Mentor input:** (*Add: "Industry mentor emphasised...", "University guide suggested..."*)

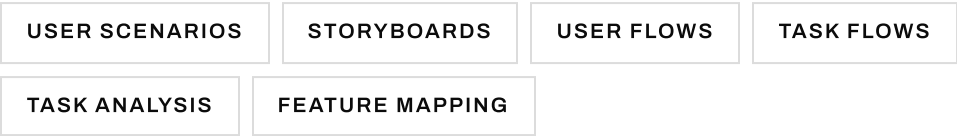

22.2 Low-fidelity mock-up plan

- Paper prototype of: Home (Ideas feed), Idea detail (with *why*), Brief builder, Drop timeline, Pulse board, Mobile set mode.
 - Test with 3 team members using 3 tasks (see Part 7, Task Analysis).
-

SCENARIOS AND FLOWS

6 STAGES

How each person moves through BLUPRINT, step by step.

23. USER SCENARIOS

RM

RIA / MONDAY / LAPTOP

PLANS A DROP

Drop Room suggests ASMR Ep. 4 (2.6x saves) and a T-7 colourway poll. Brand-fit 92. She creates the brief.

AM

ARJUN / PRE-SHOOT / LAPTOP

PLANS 12 ADS

The matrix flags Craft and Creator as missing angles. He adds 4 angles x 3 hooks to the shoot plan.

KS

KABIR / SHOOT DAY / PHONE

SHOOTS FROM SET MODE

One merged shot list with hooks, ratios and safe zones. A nudge: shot 7 needs a 2s close-up.

SK

FOUNDER / ANYWHERE / PHONE

APPROVES IN MINUTES

Swipes 9 organic and 12 ad ideas. Approves 8, comments on 1, rejects 1, and BLUPRINT learns.

P

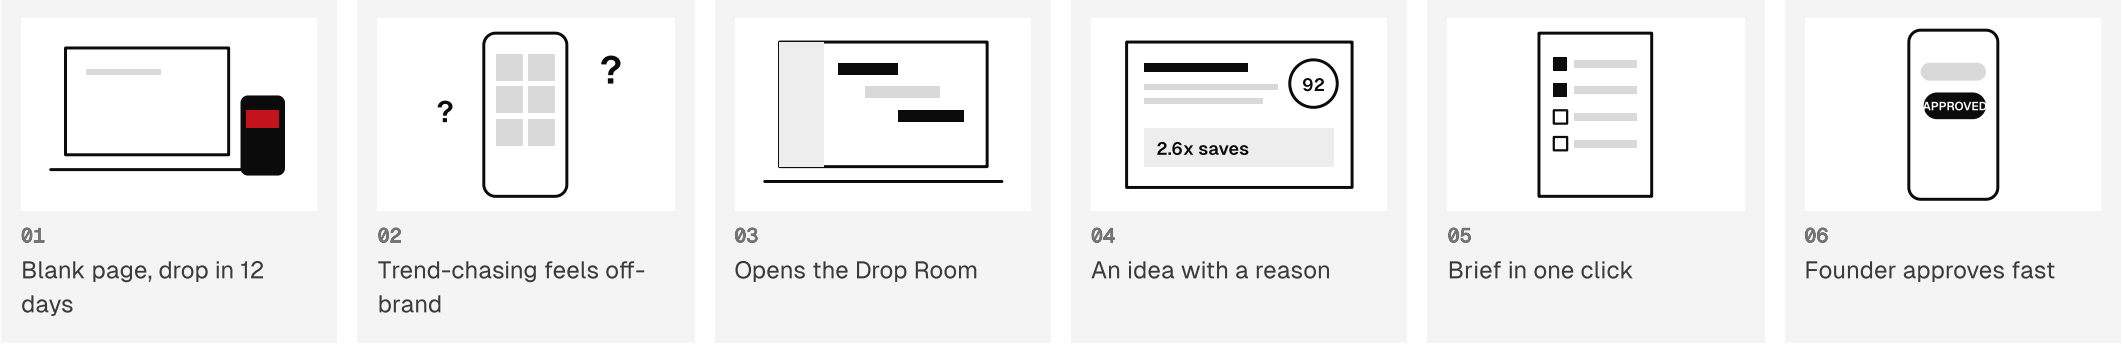

TEAM / T+7 / DIGEST

LEARNS

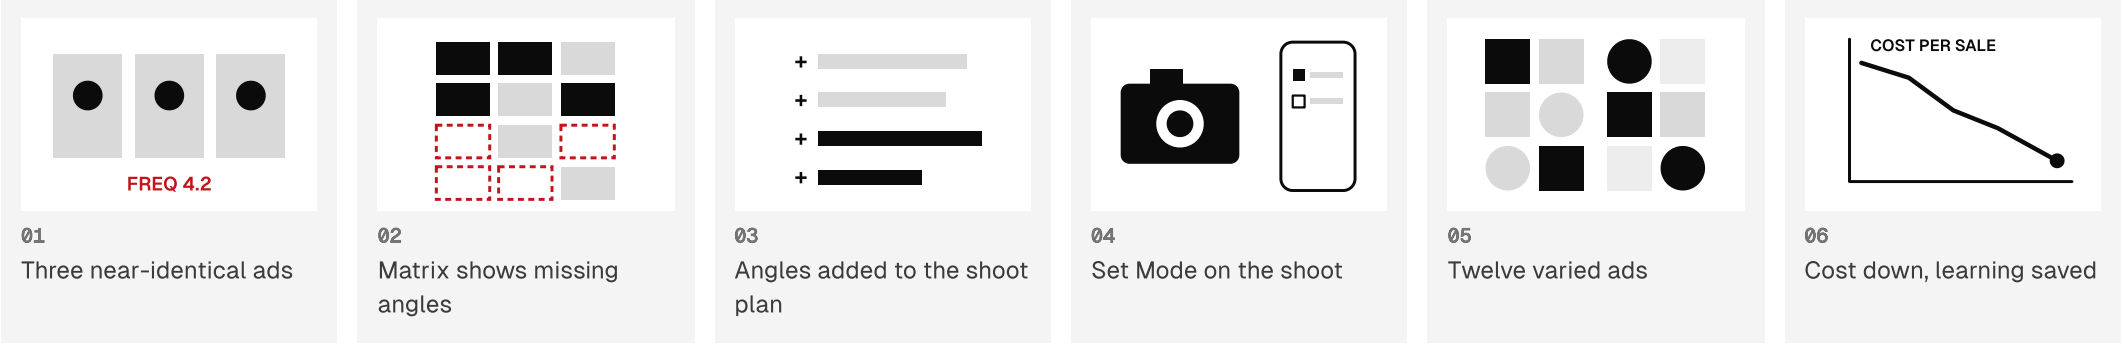

Creator ads beat lookbook ads on cost per sale (indexed). Next: make ASMR bi-weekly, brief 2 more creators.

24. STORYBOARDS

STORYBOARD 1: FROM IDEA BLOCK TO DROP PLAN (RIA)

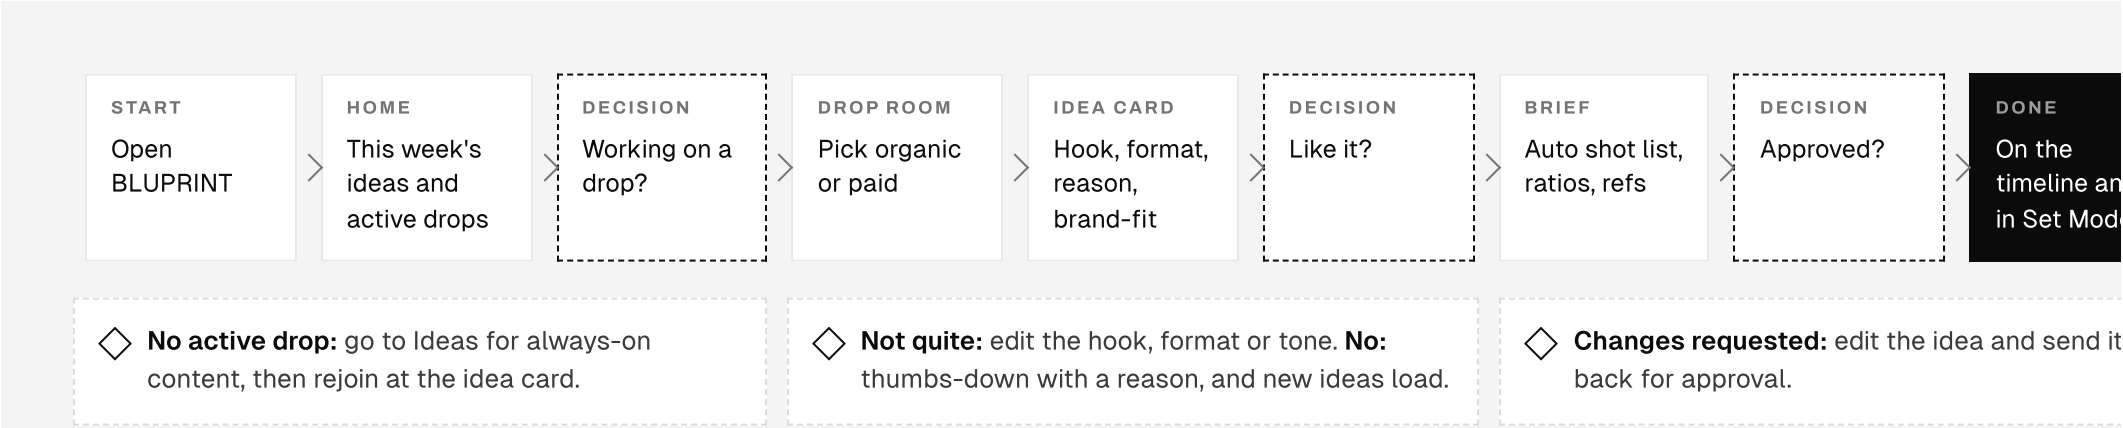

STORYBOARD 2: ONE SHOOT, TWELVE ADS (ARJUN AND KABIR)

25. USER FLOWS & TASK FLOWS

25.1 PRIMARY USER FLOW: GET AN IDEA → BRIEF → PLAN

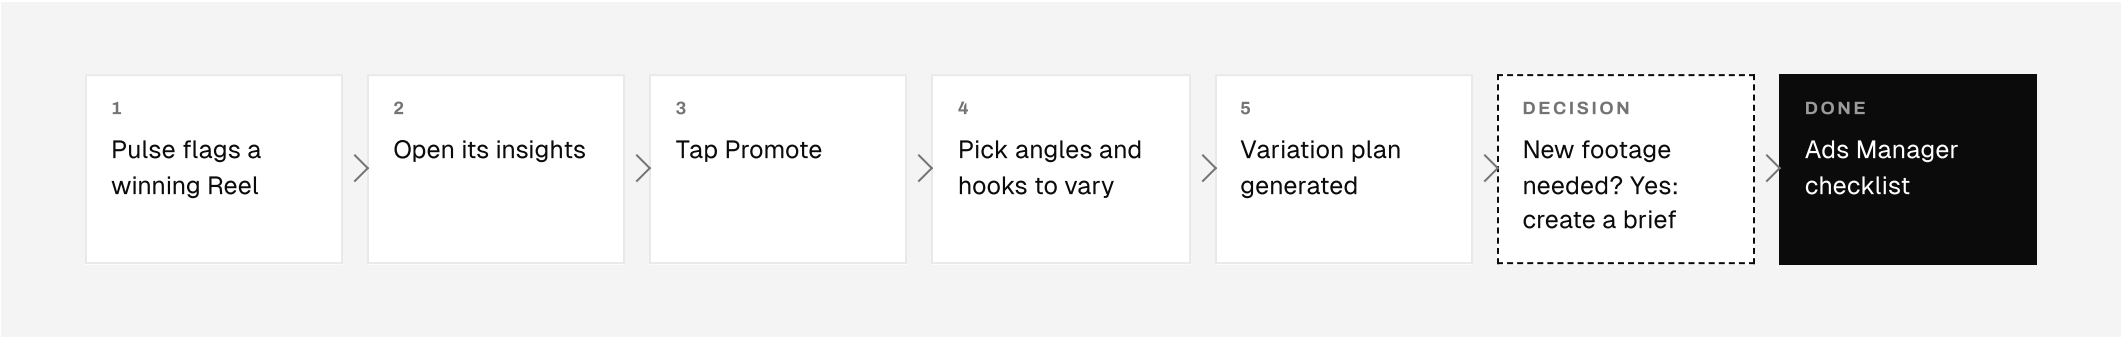

25.2 TASK FLOW: CREATE A BRIEF FROM AN IDEA (LINEAR)

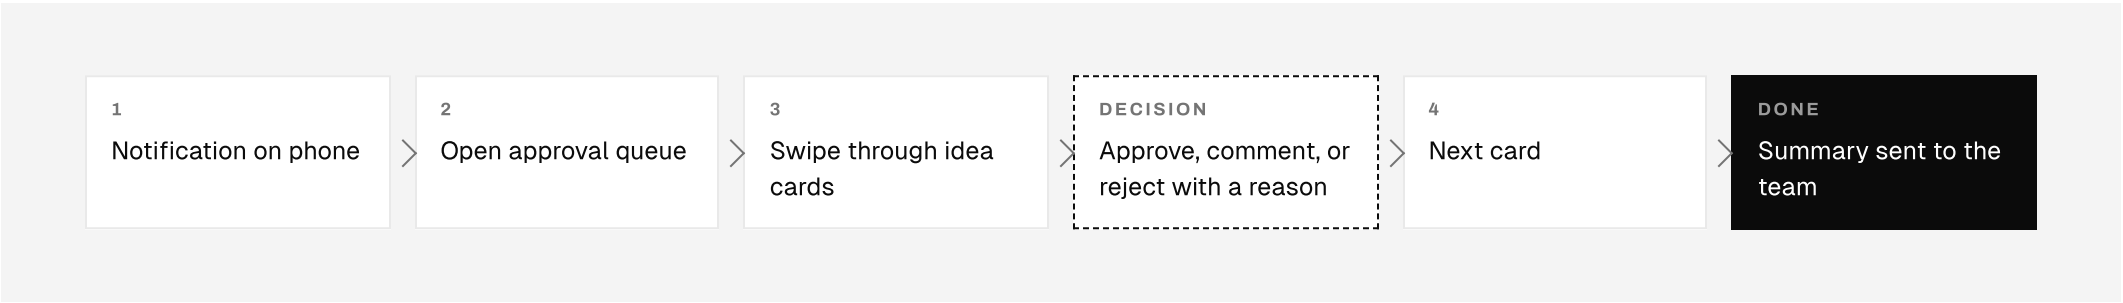

TASK FLOW: CREATE A BRIEF TARGET: UNDER 5 MINUTES

25.3 TASK FLOW: PROMOTE AN ORGANIC WINNER TO ADS

TASK FLOW: PROMOTE AN ORGANIC WINNER THE BRIDGE BETWEEN ORGANIC AND PAID

25.4 TASK FLOW: APPROVE A PLAN (FOUNDER, MOBILE)

TASK FLOW: APPROVE A PLAN FOUNDER, ON MOBILE, UNDER 10 MINUTES

26. TASK ANALYSIS

26.1 HIERARCHICAL TASK ANALYSIS (HTA): "PLAN CONTENT FOR A DROP"

0. Plan content for a drop

1. Open the drop

1.1 Open Drop Room from Home

1.2 Check drop date, products, goals

2. Get organic ideas

2.1 Open Organic tab

2.2 Filter by goal (hype / saves / reach)

2.3 Read idea card + "why"

2.4 Edit or give feedback

2.5 Add to plan

3. Plan paid variations

3.1 Open Paid tab → Angle × Hook matrix

3.2 Review missing angles + fatigue alerts

3.3 Select angles × hooks

3.4 Add to shoot plan

4. Create briefs

4.1 Create brief from idea

4.2 Review shot list, ratios, references

4.3 Assign maker & date

5. Get approval

5.1 Send plan to approver

5.2 Resolve comments

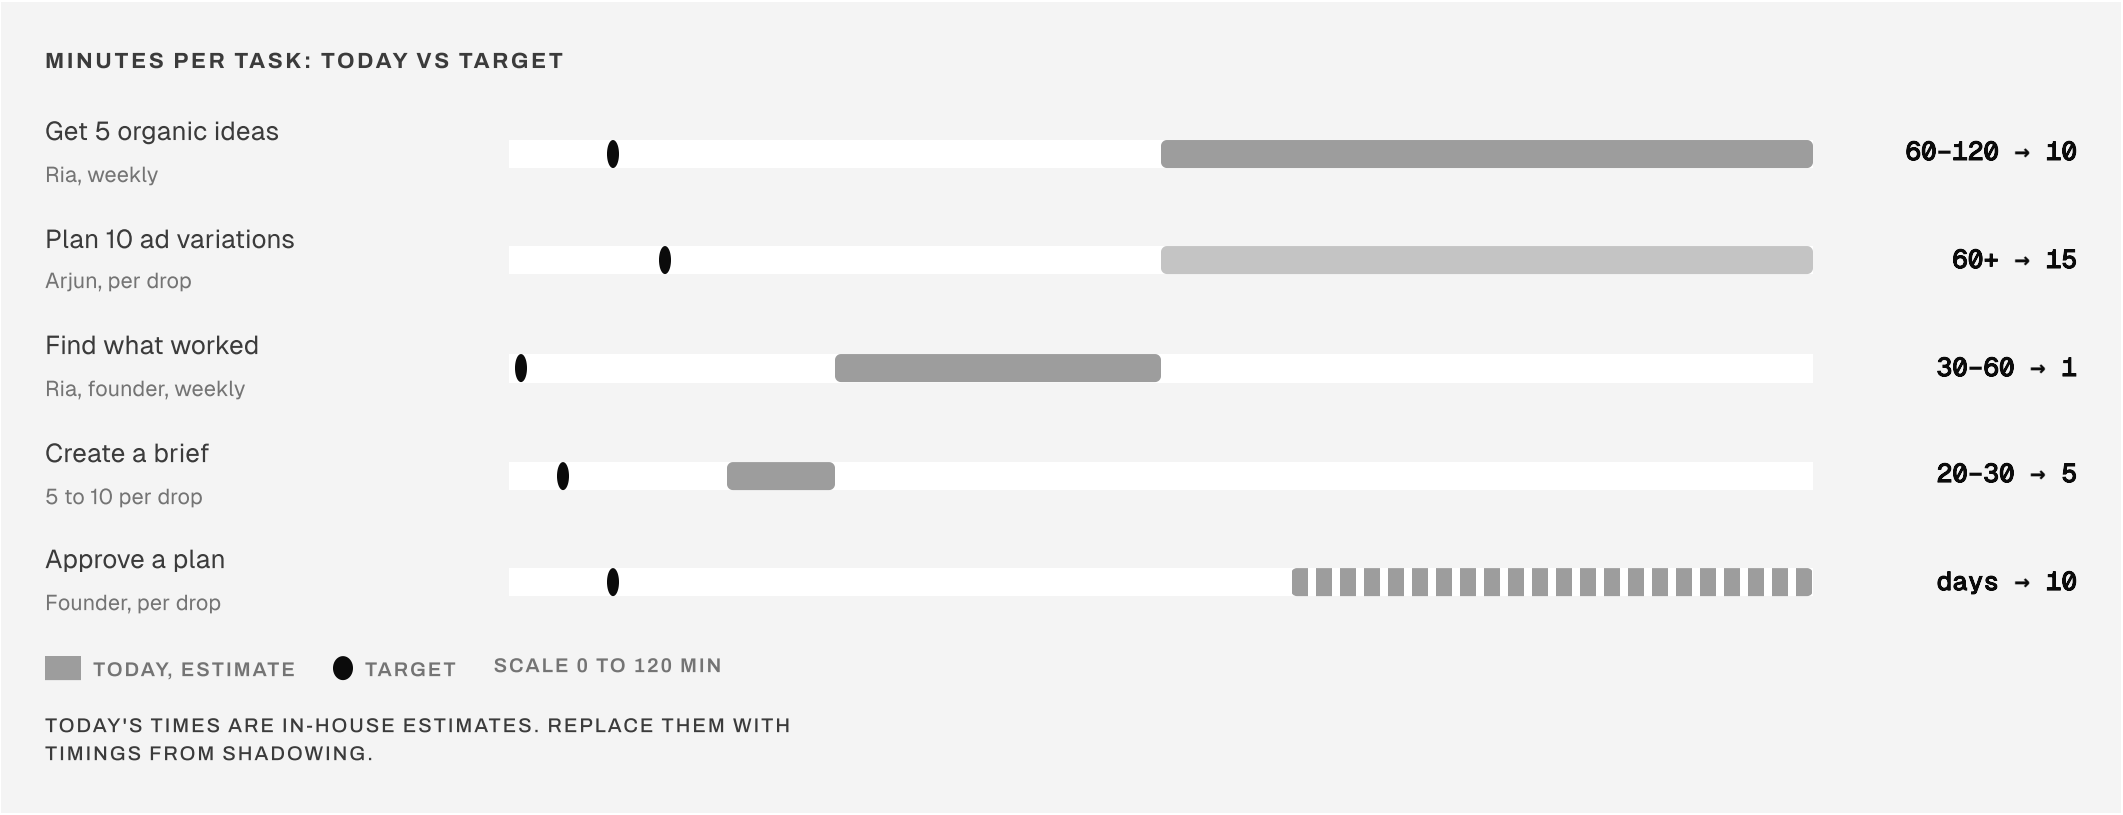

6. Execute & learn

6.1 Shoot with Set Mode

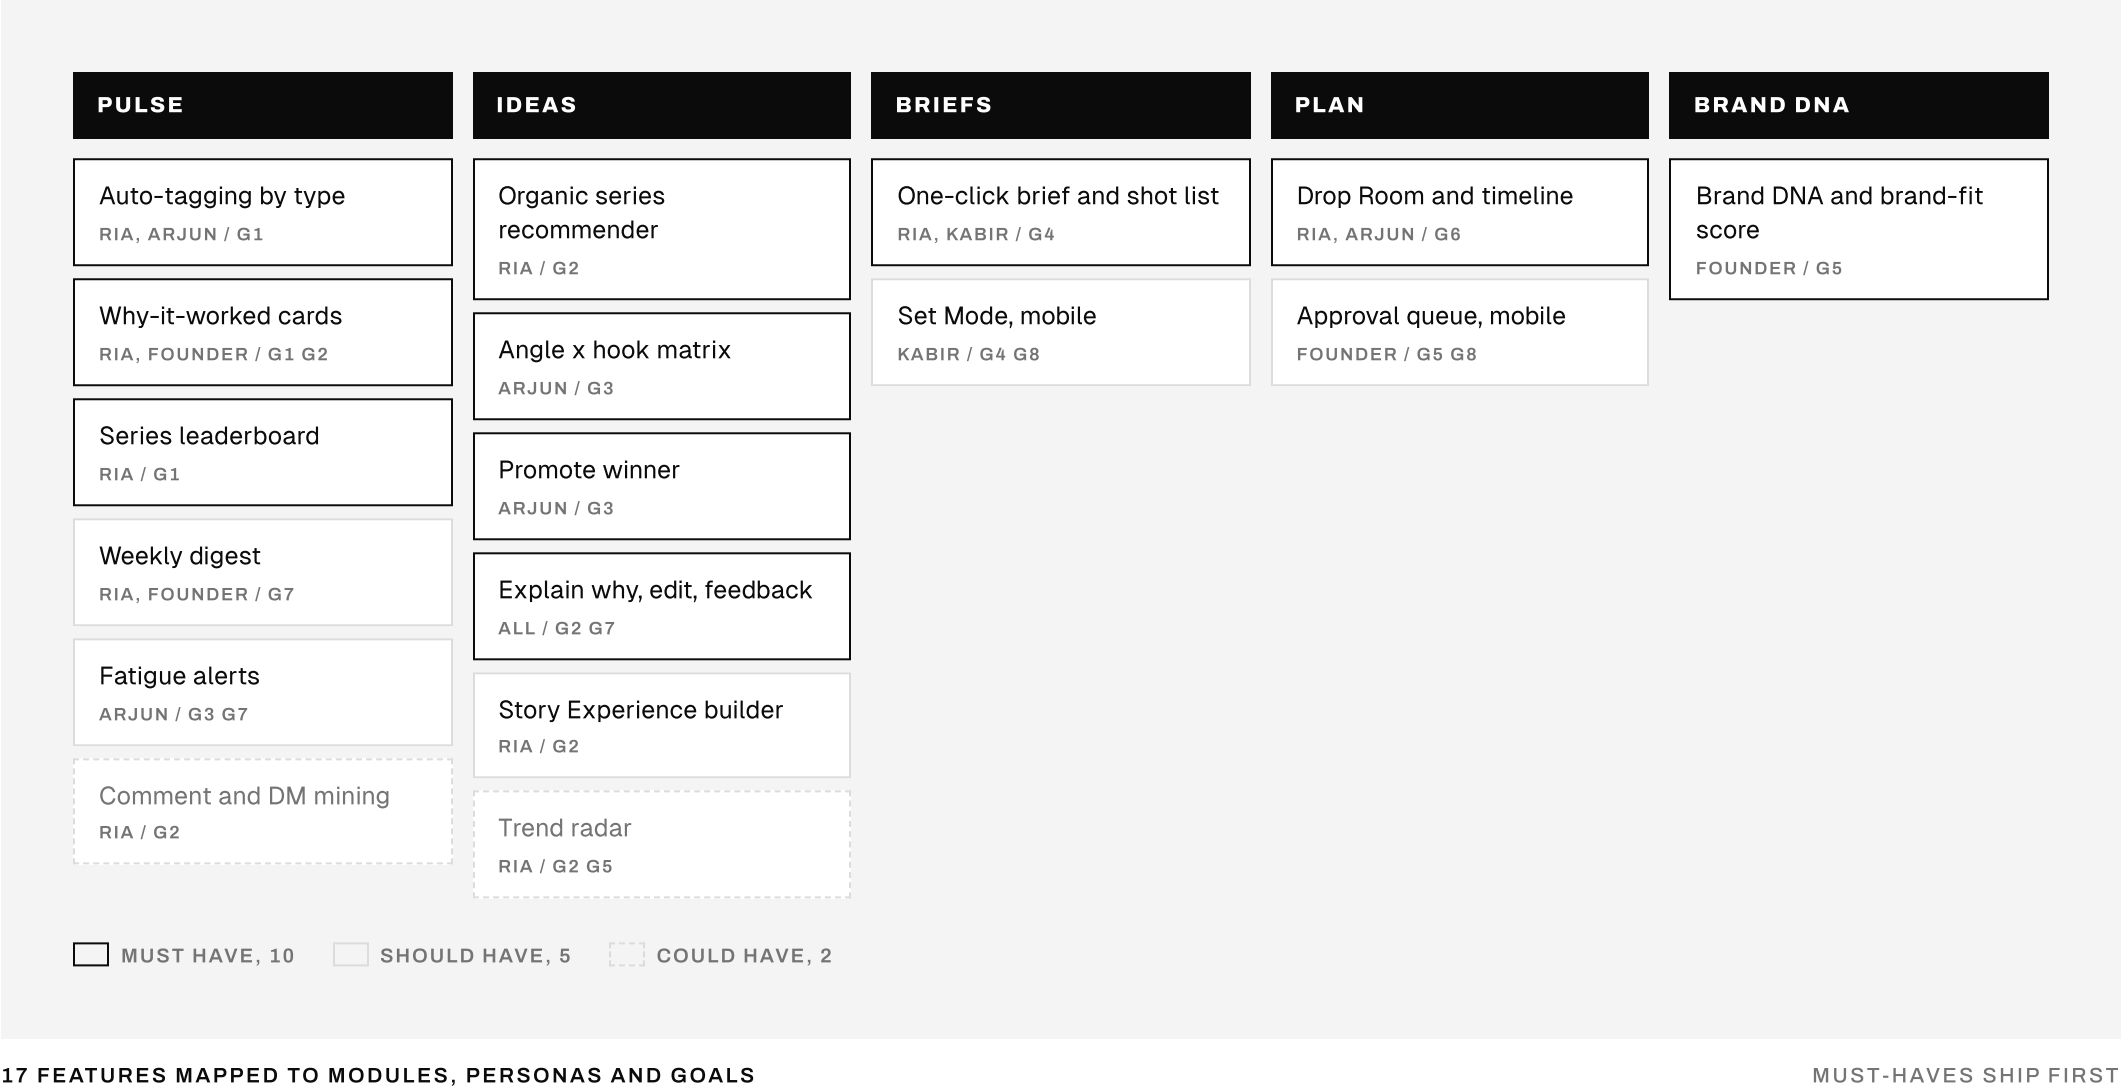

6.2 Publish / launch ads (outside BLUPRINT)

6.3 Review Pulse digest → feedback

Plan 0: do 1 → (2 and 3 in any order) → 4 → 5 → 6

27. FEATURE MAPPING

INFORMATION ARCHITECTURE

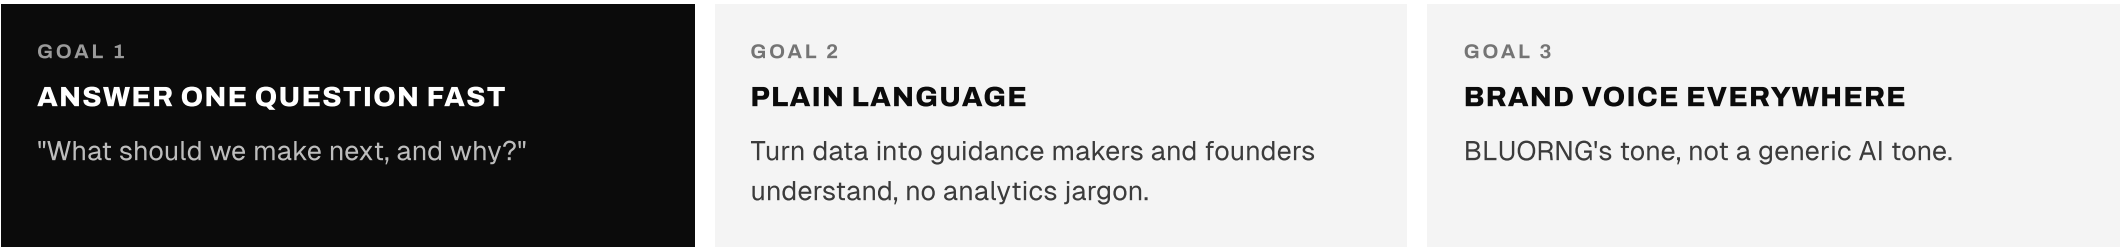

6 STAGES

How the product is organised, named and navigated, and the final proposal.

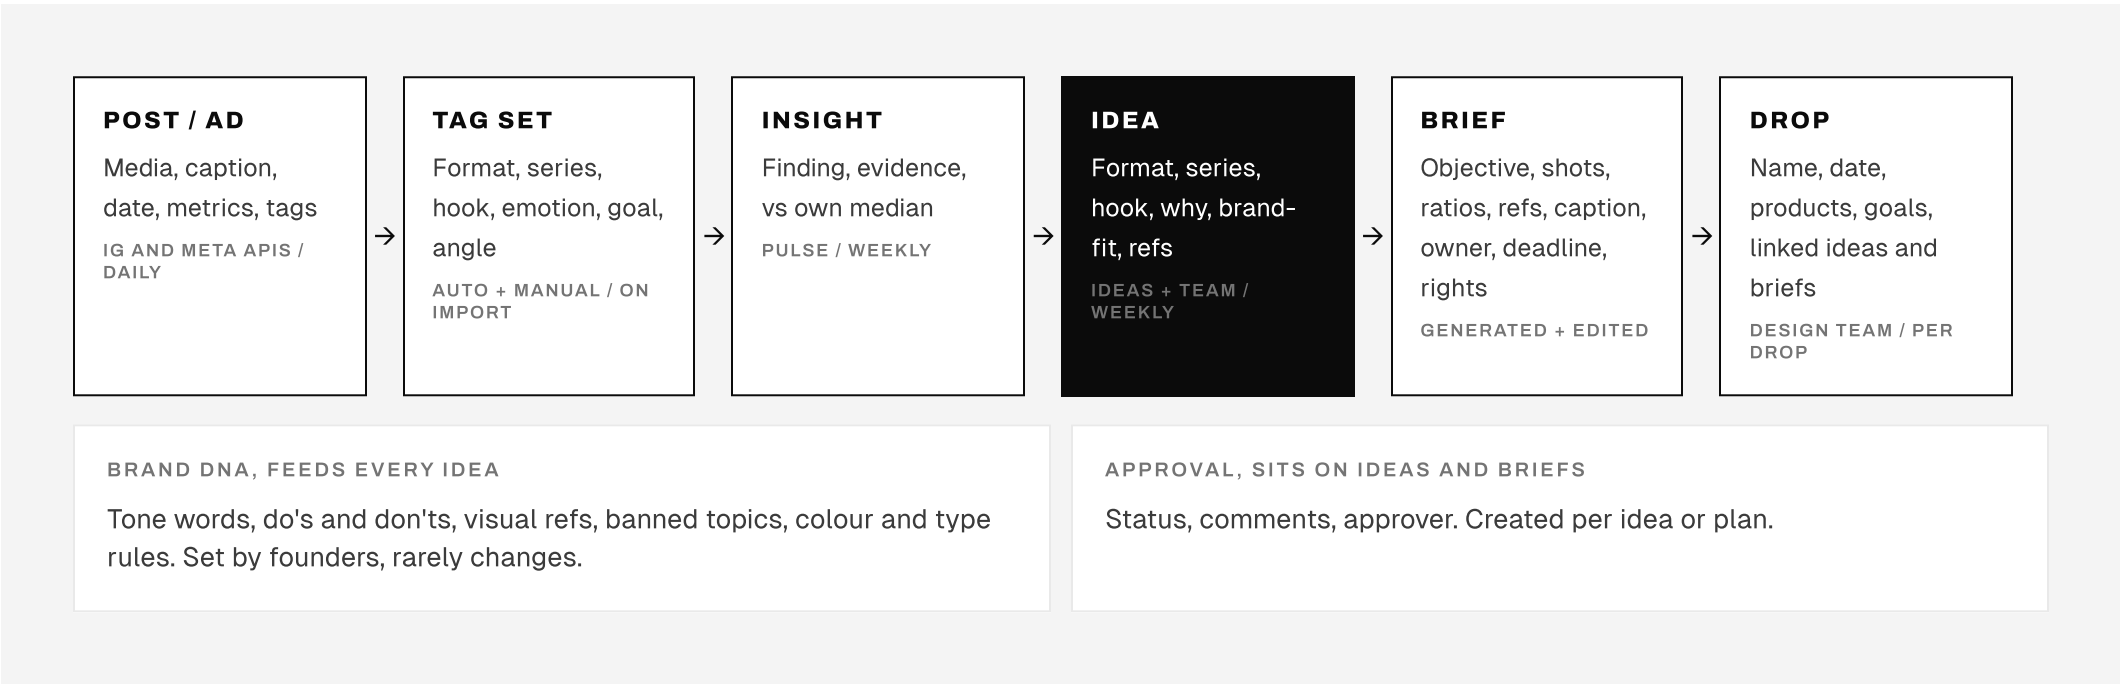

28. CONTENT STRATEGY & ANALYSIS

28.1 CONTENT GOALS OF THE PRODUCT

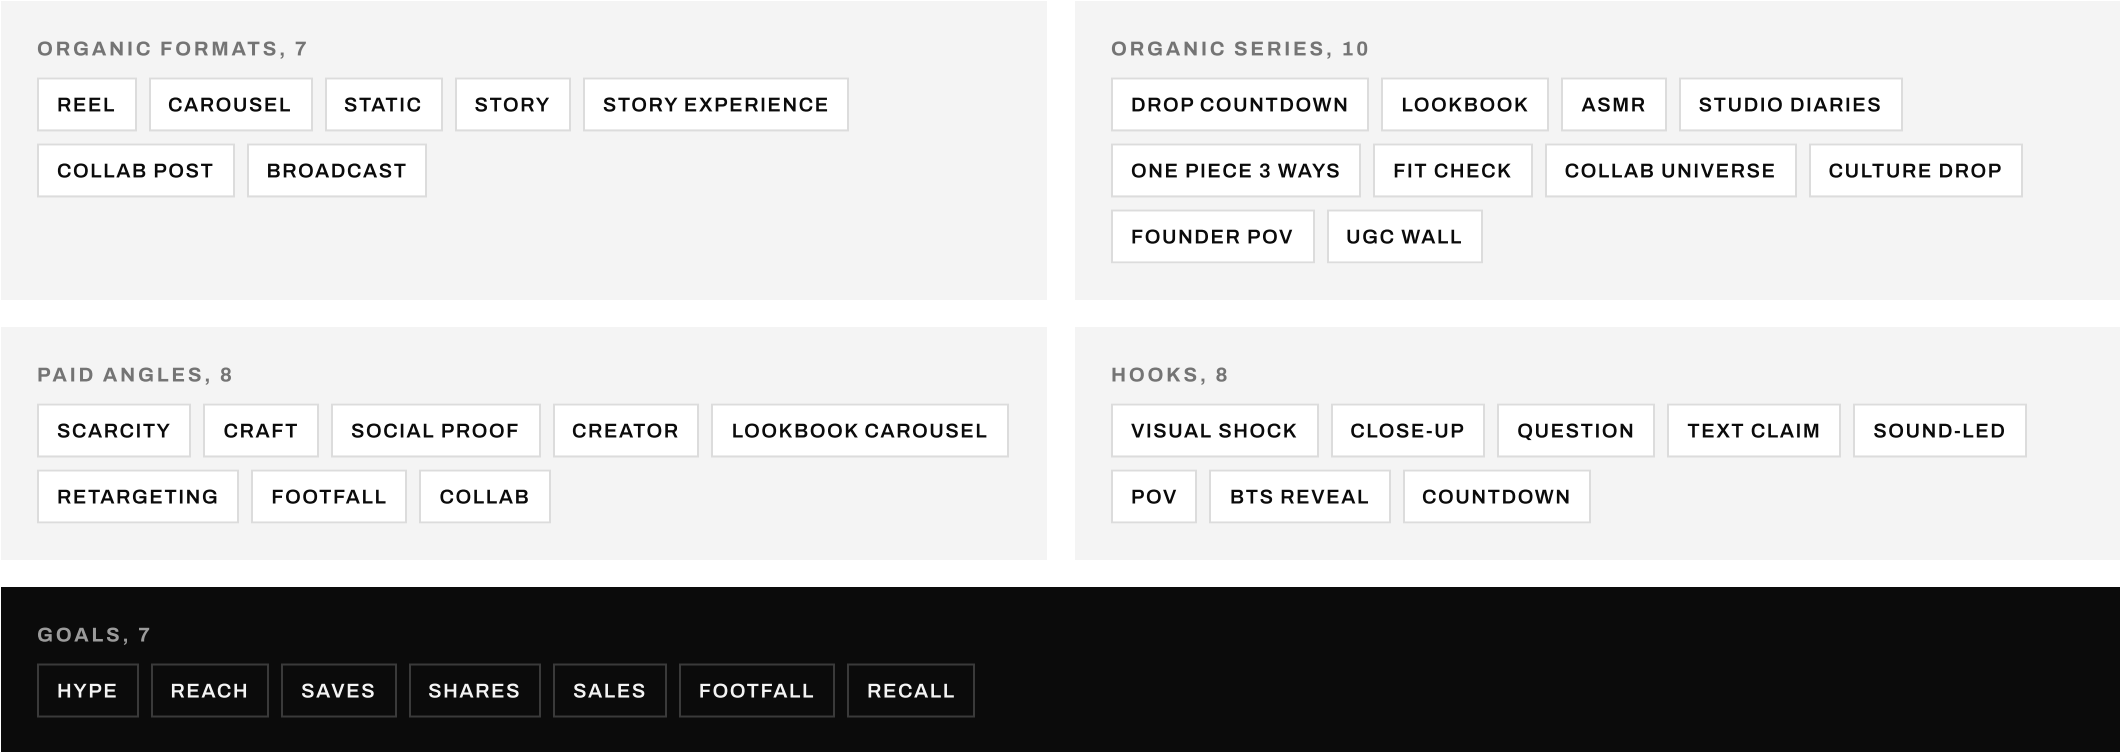

28.2 CONTENT INVENTORY (WHAT INFORMATION LIVES IN BLUPRINT)

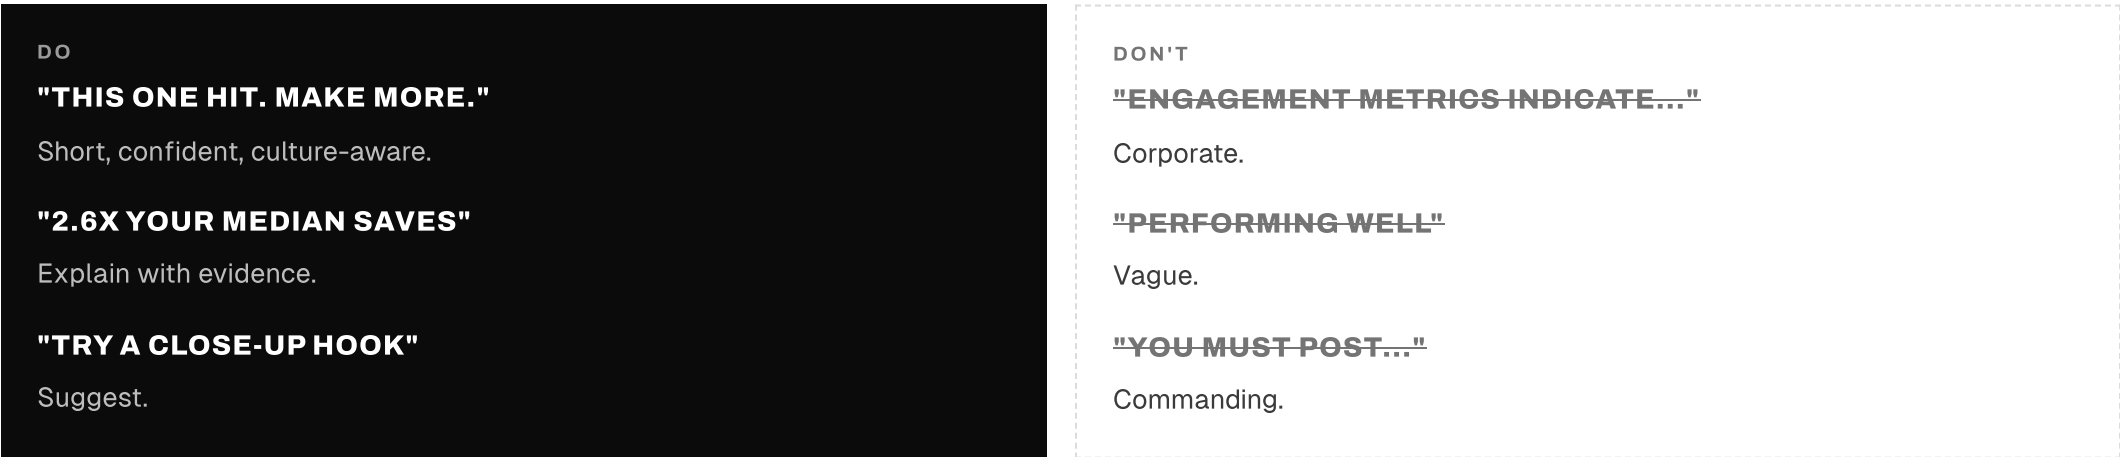

CONTENT OBJECT MODEL

8 OBJECTS, ONE CHAIN FROM POST TO DROP

28.3 CONTENT TYPES FOR RECOMMENDATIONS (TAXONOMY USED ACROSS THE PRODUCT)

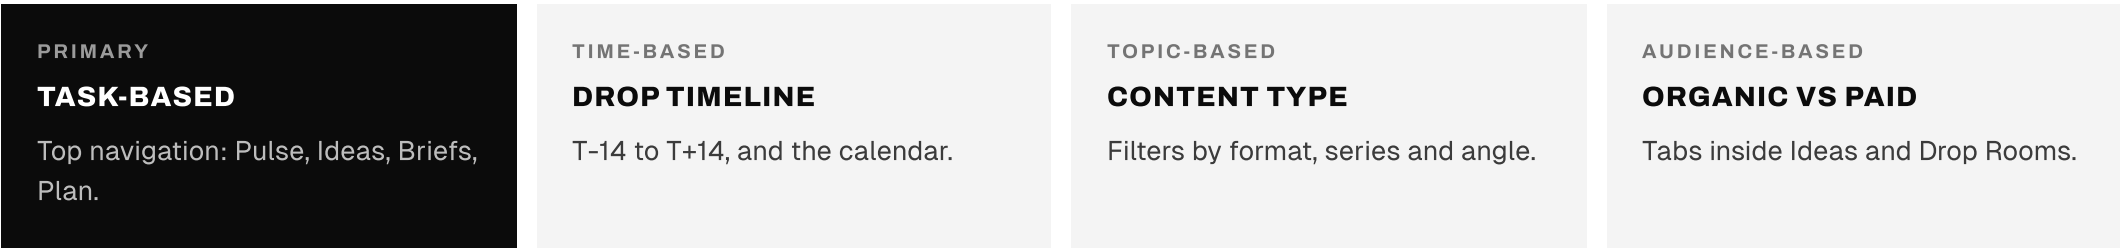

28.4 VOICE & TONE OF THE UI

29. ORGANISATION

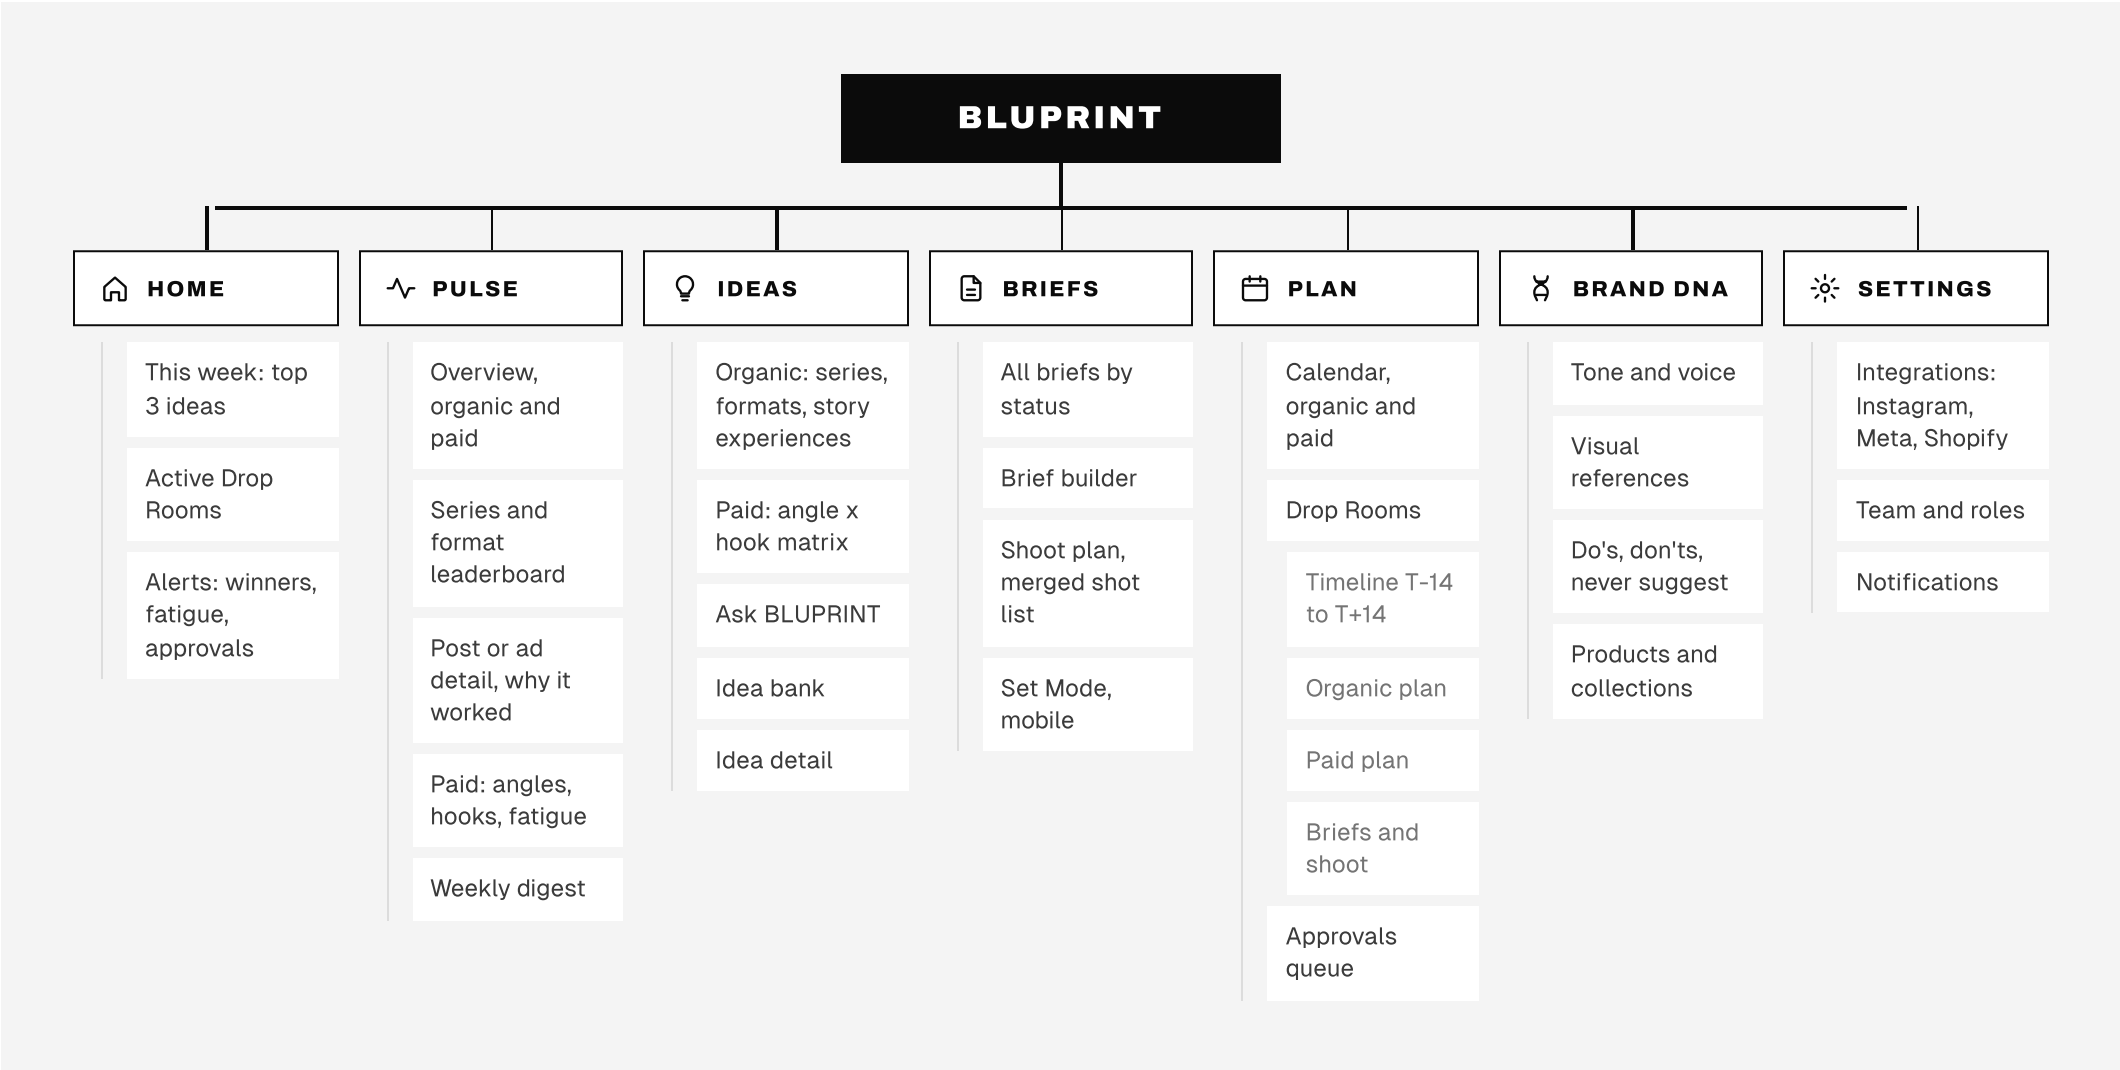

29.1 ORGANISATION SCHEMES

29.2 CARD SORTING PLAN (TO VALIDATE LABELS AND GROUPS)

30. STRUCTURING: SITEMAP

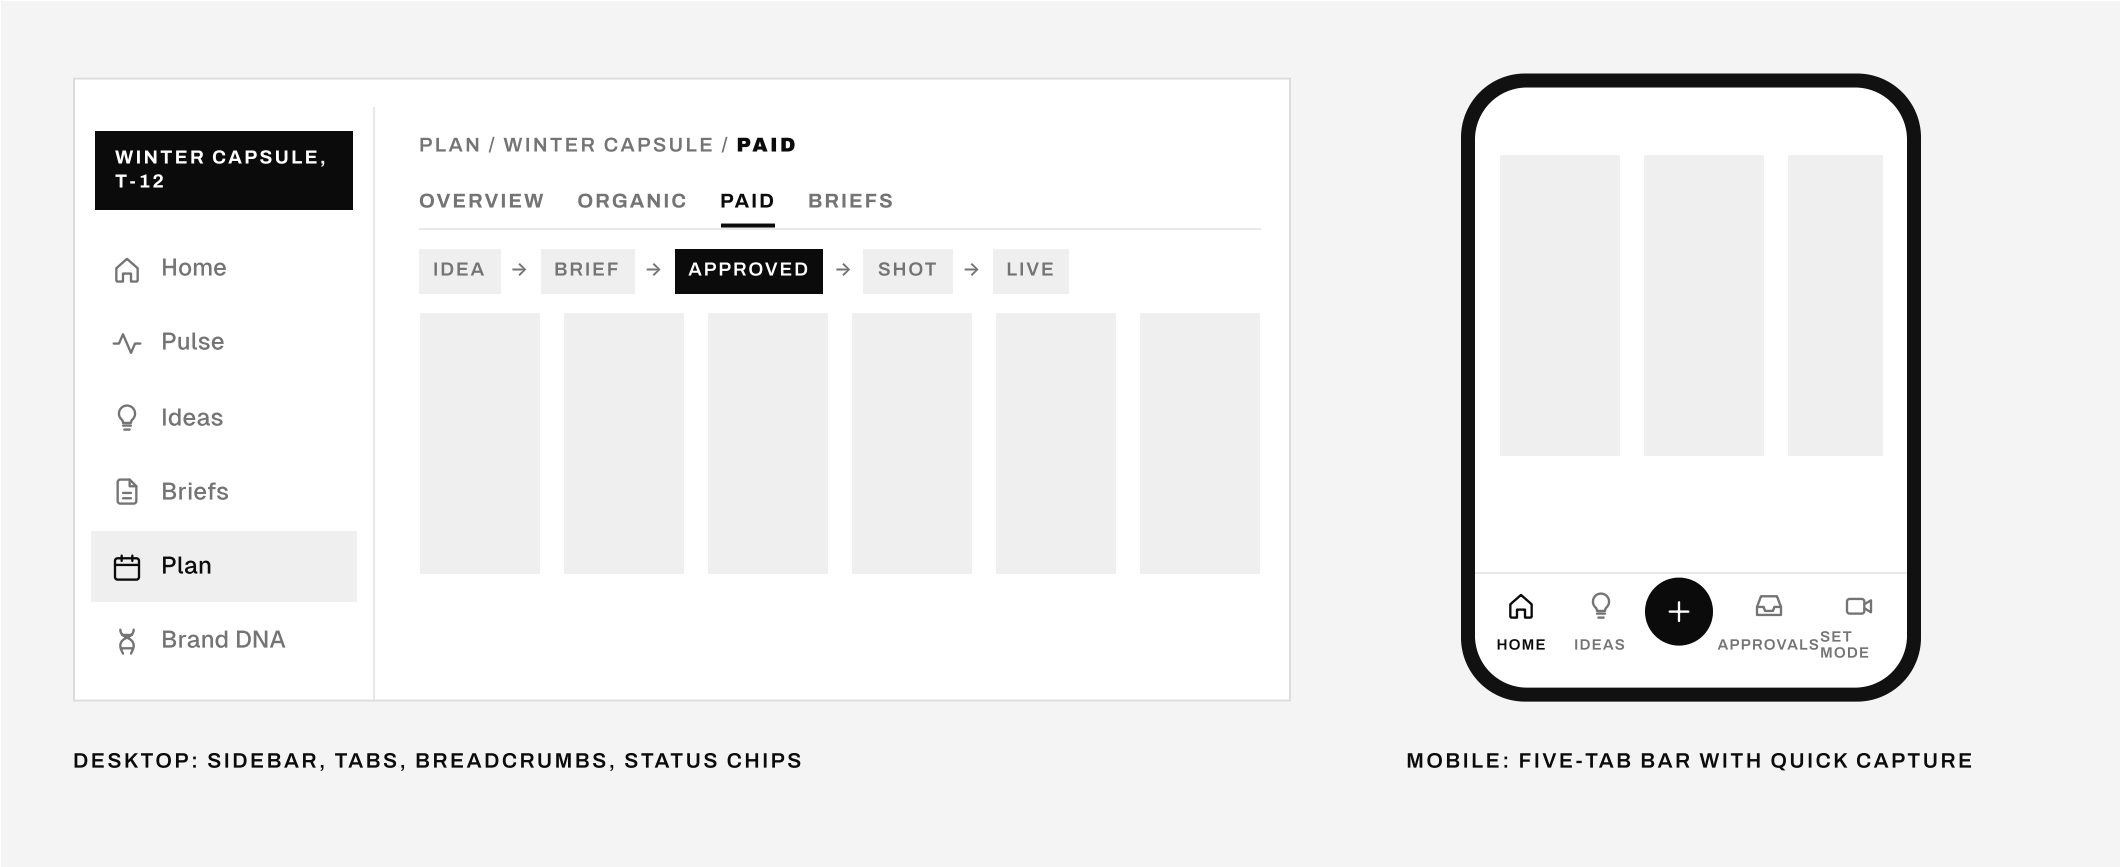

SITEMAP, WEB APP

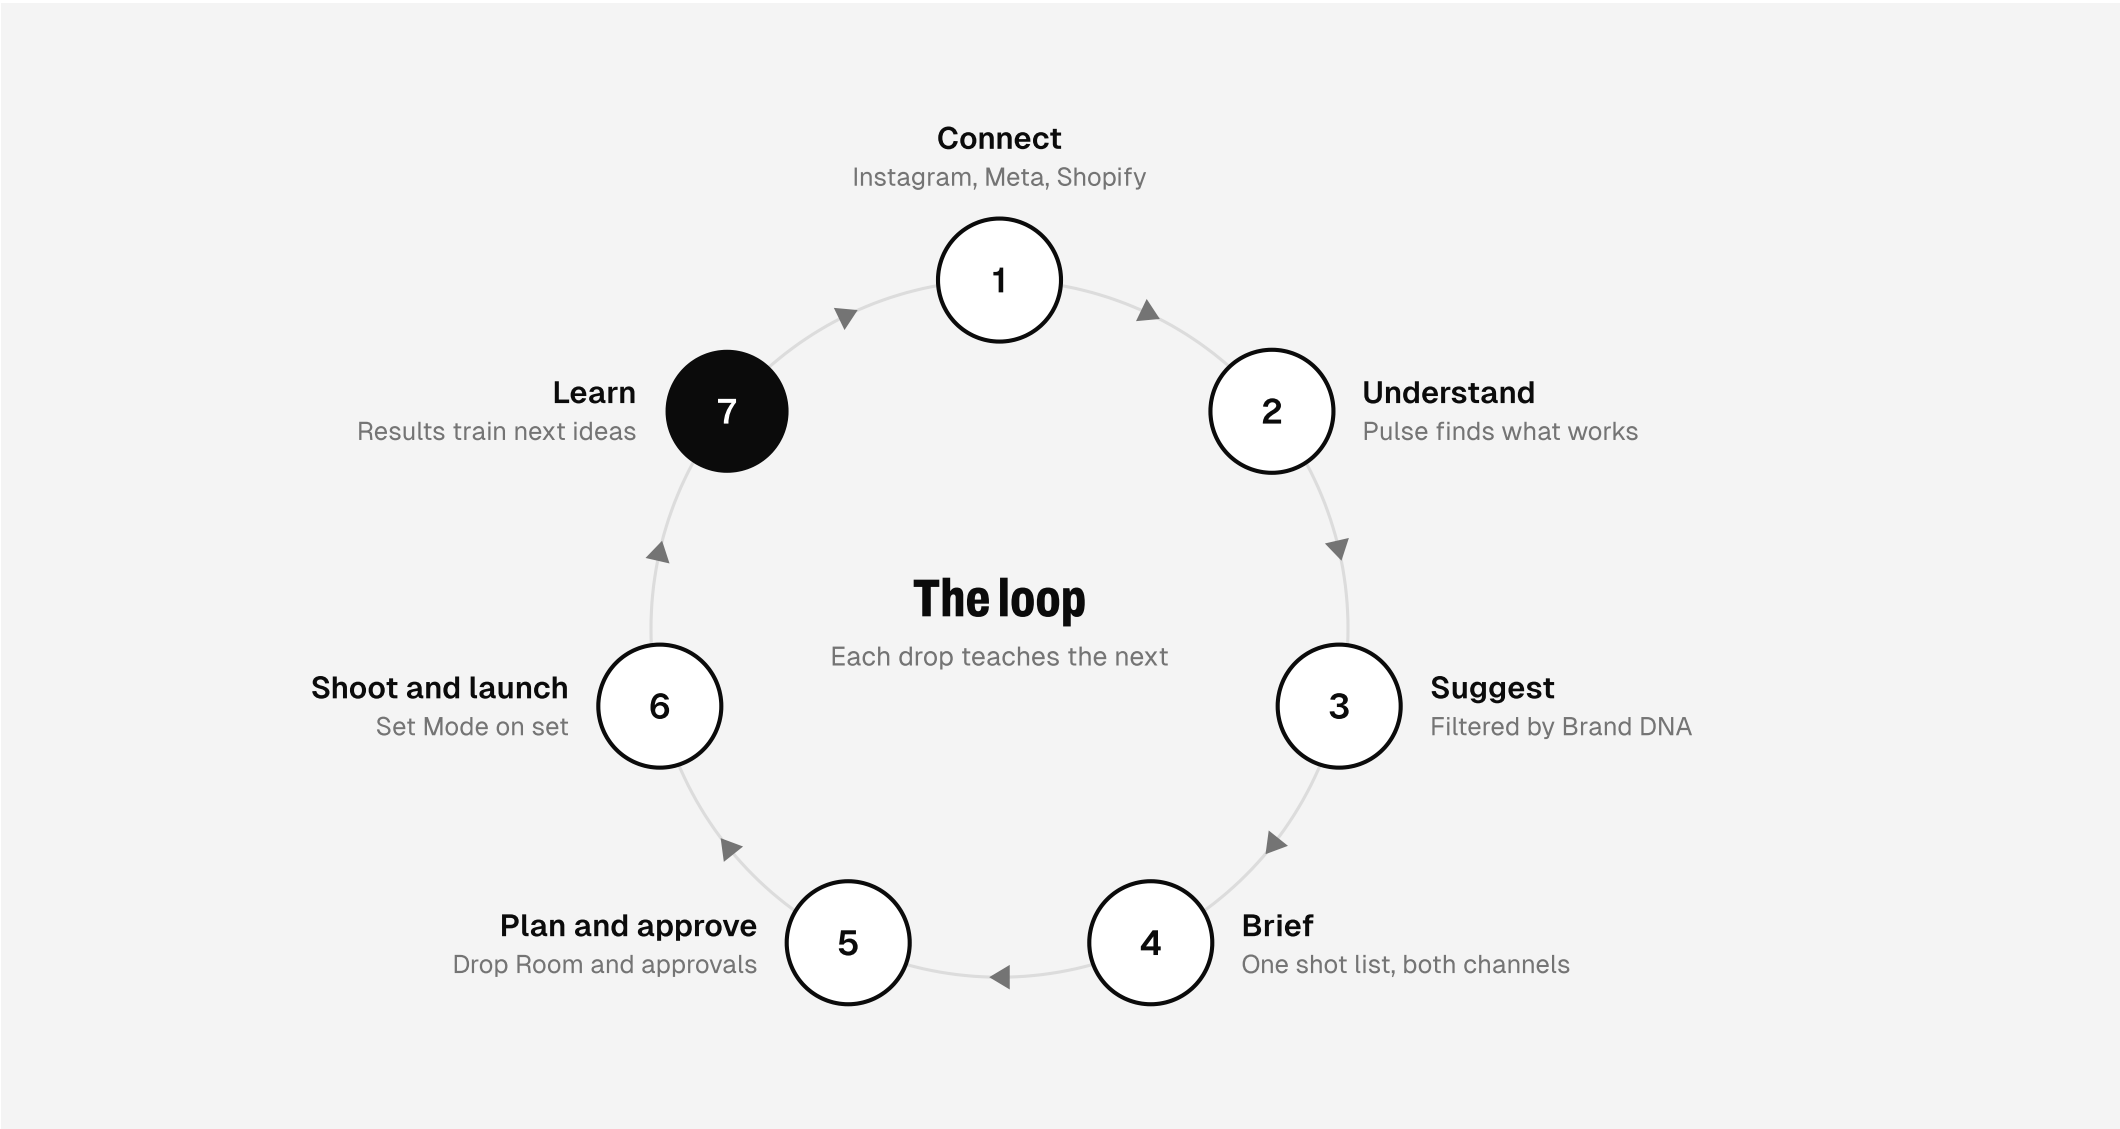

MOBILE COMPANION: HOME, IDEAS, CAPTURE, APPROVALS, SET MODE

Mobile companion (subset): Home, Approvals, Set Mode, Ideas (quick capture), Pulse digest

31. NAVIGATION

33.2 HOW IT WORKS

HOW BLUPRINT WORKS

SEVEN STEPS, REPEATED EVERY DROP

33.3 CORE MODULES

PULSE

What worked and why.

ORGANIC

Series leaderboard, format and hook results

PAID

Angle and hook cost, fatigue, winners

IDEAS

Explainable, on-brand suggestions.

ORGANIC

Series, formats, hooks, culture moments

PAID

Matrix, missing angles, promote-winner

BRIEFS

Brief, shot list, Set Mode.

ORGANIC

Reel, carousel and story briefs

PAID

Variation shots, ratios, creator briefs

PLAN

Drop Rooms, calendar, approvals.

ORGANIC

Content timeline

PAID

Ad flighting and refresh dates

BRAND DNA

Guardrails for every idea.

ORGANIC

Tone, visual refs, never-suggest

PAID

Premium tone, no discount-led ads

33.4 PLATFORMS

WEB APP, DESKTOP FIRST

Planning, analysis and ideation.

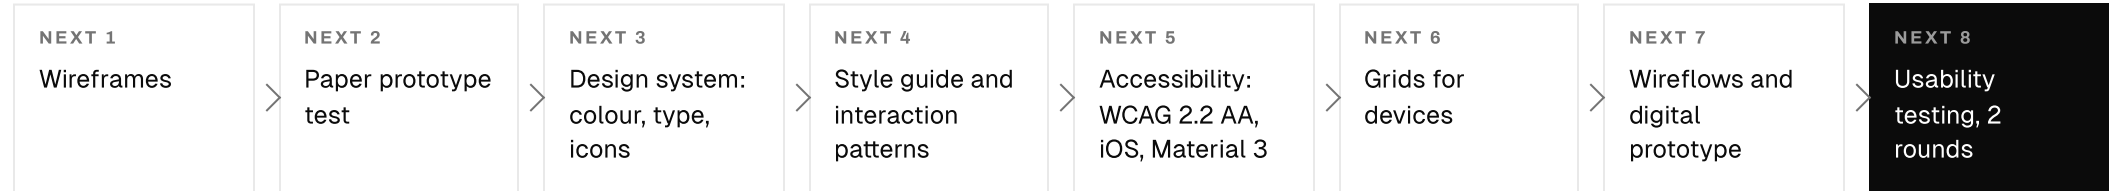

MOBILE COMPANION, IOS AND ANDROID

Approvals, Set Mode, quick idea capture, the digest.

33.5 VALUE SUMMARY

WHO	BEFORE	AFTER, TARGET
Social media manager	Guessing, idea block, manual reports	→ Ideas backed by data every week, auto digest
Performance marketer	3 similar ads per drop, late fatigue	→ 10+ planned variations, early alerts
Maker	WhatsApp voice-note briefs	→ A clear shot list on the phone
Founder	Scattered approvals, brand risk	→ One queue, brand-fit score, the reason
Business	Spend on guesswork	→ Repeatable wins, better cost per sale, stronger recall

33.6 NEXT STAGES (AFTER THIS DOCUMENT)
